INTRODUCTION

THE Osmania University has come into existence in response to a wide-spread demand in the Dominions for a type of higher education calculated to satisfy the intellectual and cultural aspirations of the people and having its foundations deep in their national consciousness. For over half a century higher education in the State was controlled by the Madras University; but the connection proved so unfructuous that enlightened public opinion in the State became averse to its continuance and proposals were mooted from time to time either to affiliate educational institutions in the State to another University or better still to have an entirely self-contained system of higher education. These proposals continued to be discussed for a long time without taking a definite shape until the accession of the present ruler of the State, whose reign has been the startingpoint of an era of unprecedented educational progress. Early in his reign an Educational Adviser was appointed to report on the improvements to be effected in the educational organization of the State and on his advice the whole system of Primary and Secondary education was overhauled, the number of schools was largely increased and all institutions were provided with better teachers and equipment. The question of higher education was then taken up and early in 1917 the Right Hon. Sir Akbar Hydari (Nawah Hyder Nawaz Jung Bahadur), then Secretary to His Exalted Highness' Government in Educational Department, submitted a memorandum to His Exalted Highness in which after surveying the existing educational conditions and discussing the disadvantages of imparting knowledge through the medium of a foreign language he recommended that considering the peculiar needs and conditions of the State:—

"we require a new University free from the evils inherent in the present system and calculated to undo its deplorable effects. The University so founded shall be based on the fundamental principles of education, and shall take into consideration the peculiar needs of the people and their national characteristics. It shall preserve all that is best in the present and ancient systems of education. It should be both an examining and a teaching body and in addition to this undertake to compile and translate books, using the Urdu language

both for the imparting of knowledge and the training of the intellect."

the course of this memorandum. Sir A. Hvdari pointed out the defects inherent in the present system of education through the medium of a foreign language, such as the undue and unwarranted strain on the students' memory, the time wasted in mastering the intricacies of a foreign language at the sacrifice of the subject-matter taught, the stifling of originality and the inability of the graduates to impart knowledge to their fellow countrymen in their mother-tongue and the unbridgeable gulf thus created between the educated classes and the mass of the general public. He also referred to the two possible objections that might be urged against the selection of Urdu as the medium of instruction in the proposed University, firstly that the majority of the people spoke other languages and secondly the absence of good books in Urdu. As to the first it was pointed out that although it was true that those whose mother-tongue is Urdu are in a minority, yet Urdu is the cultural and official language of the State and of polite society, and is generally spoken by those calsses from which students proceeding to a college course are drawn. The Rt. Hon. Sir Akbar Hydari met the second objection by stating that if a Bureau of compilation and translation were attached to the University, books required for College Classes; could be produced in a short time. His opinion has proved to be well-founded as the Bureau of Translation has, during this short period, produced almost all the books required as text-books for the Intermediate and the B.A. Classes and is at present engaged in the translation of books on Law, Medicine, Engineering and those required for M.A. & The capacity of Urdu as the vehicle for express-M.Sc. Classes. ing scientific ideas is generally recognised. The well-known historian, Mr. Vincent A. Smith, bears testimony to this fact in the last chapter of his History of India. While welcoming the inauguration of the Osmania University, he says:-

"The Urdu language which resembles English in simplicity and flexibility of its syntax and in the extraordinary wealth of its vocabulary drawn from Western Hindi, Sanskrit, Persian, Arabic, English and other sources should be capable of expressing ideas on any subject, literary, philosophical and scientific."

His Exalted Highness, whose deep and abiding interest in the advancement of education is well known, was graciously pleased to approve of the proposal and has ever since shown the greatest interest in the progress of the movement, which but for his princely generosity and sympathetic guidance could not have made any headway. The words of his gracious Farman dated the 4th Rajab 1335 II. (Khurdad (1326 F.—April 1917) are well worth reproduction:—

"I am pleased to express my approval of the views set forth in the Arzdasht and the memorandum submitted therewith. regarding the inauguration of a University in the State, in which the knowledge and culture of ancient and modern times may be blended so harmoniously as to remove the defects created by the present system of education and full advantage may be taken of all that is best in the ancient and modern systems of physical, intellectual, and spiritual culture. dition to its primary object of deffusing knowledge. it should aim at the moral training of the students and give an impetus to research in all scientific objects. The fundamental principle in the working of the University should be that Urdu should form the medium of higher education but that a knowledge of English as a language should at the same time be deemed compulsory for all students. With this in view I am pleased to order that steps be taken for the inauguration on the lines laid down in the Arzdasht. of a University for the Dominions, to be called the Osmania University of Hyderabad in commemoration of my accession to the throne."

In pursuance of the august commands of His Exalted Highness, the Educational Department proceeded at once with the preliminary spade-work necessary for the launching of this great project. Representative Committees were formed to consider courses of studies for the Faculties of Arts and Theology of the proposed University, and the draft curricula prepared by these Committees were circulated widely in educational circles in England and in India with the result that the promoters of the University had the satisfaction of seeing that their conclusions were more or less approved of by eminent educational authorities.

The main features of these curricula are that in the Matriculation, the students can have a good grounding in the subjects which they will study at College. In the Intermediate Examination, a greater latitude has been given in the selection of subjects than in other Indian Universities, whilst at the same time the subjects have been so grouped as to enable a student to take up more or less cognate and allied subjects. This division of

subjects into distinctive groups makes intensive study possible in the B.A. Classes since besides English and Theology or Morals which are compulsory, a student can take up only one particular subject in which he can specialise and later carry on research work. It may also be noted that Theology or Morals is compulsory for all under-graduates in the Faculties of Arts and Science.

The standard of compulsory English is nearly the same as in other Universities, which enables the *alumni* of the Osmania University to keep in touch with the currents of thought in the English-speaking world and prevents them from being confined to the publications of the University. They are also encouraged by the staff to consult English books on various subjects from which questions are set to them to criticise and to explain. English is taught only as a language, so that the students may be able to speak and write it with ease and accuracy and to appreciate all that is best in modern English Literature.

The first constructive work of the University was the establishment of a Bureau of Translation with a staff of eight qualified translators under the direction of a noted scholar and The Bureau has been very successful in its work considering the immense difficulties in the way, specially in the coining of scientific terms for which expert committees are constantly at work and have devised a terminology for a number of sciences. The work attempted by the Bureau embraces the whole range of University studies including History (Eastern and Western,) Philosophy, Economics, Sociology, Mathematics (pure and applied), Physics, Chemistry, Law, Botany and Zoology, Engineering, Pedagogics and Medicine. The books translated by the Bureau are printed at the University Press attached to the The Dairat-ul-Maarif (Oriental Publication Bureau) which publishes rare Arabic books not available in print has recently been placed under the control of the University. scrvices rendered by this institution to the cause of Arabic learning have been universally recognised not only in Islamic countries but also by European Orientalists.

Under the Charter, the constitution of the University, which has been framed to suit local conditions of official and public life, differs in some respects from that of the older Indian Universities. Academic and administrative functions are vested in distinct bodies specially constituted for these purposes. With this object the Faculties have been so constituted as to perform academic functions, which in many Indian Universities are performed by the Syndicate. The number of Fellows appointed to the Faculties is restricted, so that all members of the Senate

do not necessarily belong to one or other of the Faculties, which consist mainly of the professorial staff who have a preponderating voice in academic matters. The Syndicate is on the other hand a business and not an academic Committee of the Senate. The Executive Government of the University including the general supervision and control over the colleges is vested in the Council, which is the highest governing body of the University and practically performs most of the functions of Government in British Indian Universities.

The Osmania University College was opened in August 1919. The enrolment in the various classes has been most encouraging and the College has now 1023 students on its rolls. The first Intermediate Examination was held in April 1921, and the first B. A. Examination in 1923. As there is more than one paper in every subject it has been found possible to have external examiners in all subjects, who are generally professors in other Universities. They have expressed satisfaction with the standard reached by the students. It may be noted that the University does not experience any difficulty in securing the services of highly qualified examiners from other Universities, as Urdu is a language widely known in every part of India specially in the North.

A staff of three Professors and ten Assistant Professors was originally sanctioned to meet the requirements of an Intermediate College, but in view of the opening of the B. A. and subsequently the M. A., M.Sc. and LL.B classes a number of new appointments has been created and the sanctioned staff of the Osmania University College now consists of the following:—

	Professors	 Rs.	500-50-1,000
1	Professor	 B.G. "	1,500
2	Professors	 29	600-800
28	Readers	 ,,	350-25-600
27	Lecturers	 "	250-15-400
1	Librarian	 ,,	250-15-400
1	Medical officer	 ,,	300

New buildings of the University are being constructed at Adikmet at about four miles from the city at an estimated cost of about 2.22 erores of rupees. As these buildings will take some time to be built temporary buildings have been constructed at a cost of nearly ten lacs of rupees which are quite adequate for the present requirements of the University. The permanent Arts building which will cost nearly 27 lacs of rupees is nearing complection, and two commodious double-storied hostels are also ready.

The University is at present imparting instruction in the Faculties of Arts, Theology, Science, Medicine, Engineering, Law and Education and the total number of students is 1806.

The increasing number of students in the Intermediate classes in the University College has led to the opening of Intermediate colleges in the City of Hyderabad and at Aurangabad, Warangal and Gulbargah. Intermediate classes are also attached to the Zenana School, Nampalli Degree courses in Arts and Science have now been introduced into this institution, so as to bring the blessings of higher education within the reach of pardah ladies.

The budget provision for the various Departments of the University for the year 1346 Fasli (October 1936 to October 1937) is as follows:—

		Rs.
Registrar's Office		202439
Osmania University College		728439

FACULTY OF THEOLOGY. (For 1346 and 1347 Fash).

- 1. Nawab Nazir Yar Jung Bahadur, M.A., IL.D. (Dean).
- 2. Maulvi Abdul Qadeer Sahib.
- 3. Abdul Haq, Esq., B Litt., D.Phil. (Oxon.).
- 4. Maulvi Abdullah Emadi Sahib.
- 5. Mufti Abdul Latif Sahib.
- 6. Haroon Khan Sherwani, Esq., M.A. (Oxon.) Bar-at Law.
- 7. Maulvi Muhd. Elias Burney Sahib, M.A., LL.B. (Alld.).
- S. Maulvi Hamidullah Sahib, M.A., I.L.B. (Osm.), Ph.D. (Bonn.), D.Litt. (Paris).

- 9. Maulvi Zahiruddin Sahib, M.A. L.T., D.Litt. (Egypt.).
- 10. Maulvi Syed Muhiuddin Sahib, B.A Bar-at-Law.

11. Abdul Qadir Sahib, M.A.

- 12. Maulvi Abdul Bari Sahib Nadvi.
- 13. Maulvi Manazir Ahsan Sahib Gilani.
- 14. Maulvi Syed Hashim Sahib Nadavi.
- 15. Maulvi Hakim Maqsud Ali Khan Salub.

FACULTY OF ARTS.

(For 1346 and 1347 Fasli).

1. Nawab Mirza Yar Jung Bahadur, B.A., LL.B. (Dean)

2. Ghulam Yazdani Esq., M.A., O.B.E.

- 3. Kishen Chand, Esq., M.A. (Cantab.).
- 4. Qazi Muhammad Husain, Esq., B.A., LL.B. (Cantab.).
- 5. Haroon Khan Sherwani, Esq., M.A., (Oxon.), Bar-at-Law.
- 6. Hosain Ali Khan, Esq., B.A. (Oxon.).
- 7. Muhammad Elias Burney, Esq., M.A., LL.B.
- 8. Khalifa Abdul Hakim, Esq., M.A., LL.B., Ph.D. (Heidelberg).
- 9. Sayyid Muhammad Azam, Esq., M.A. (Cantab.).
- 10. Abdul Haq, Esq., B.Litt., D.Phil. (Oxon.).
- 11. Muhammad Nizamuddin, Esq, Ph.D. (Cantab.).
- 12. Maulvi Abdul Haq Sahib, B.A.
- 13. Qadir Husain Khan, Esq., M.A. Bar.-at-Law.
- 14. Dr. Amina Pope, M.A., D.Litt. (Allahabad).
- 15. Khan Fazl Muhd. Khan, Esq., M.A., (Cantab.).
- 16. Sayyid Ali Akbar, Esq., M.A. (Cantab.).

FACULTY OF SCIENCE.

(For 1346 and 1347 Fasli).

- 1. Qazi Muhammad Husain, Esq., B.A., IL.B., (Cantab.), M.A. (Punjab).....(Dean.).
- 2. Khan Fazl Md. Khan, Esq., M.A. (Cantab.).

3. Dr. Haji Hyder Ali Khan, F.R.C.S.E.

- 4. Muhammad Ahdul Rahman Khan, Esq., B.A., B.sc. (Lond.).
- 5. Sayyid Muhammad Azam, Esq., M.A., B.Sc. (Cantab.).

6. Wahidur Rahman, Esq., B.sc.

7. Muzaffaruddin Quraishi, Esq, M.sc., Ph.D. (Berlin).

8. Kishen Chand, Esq., M.A. (Cantab.).

- 9. Sayyid Husain, Esq., M.sc., Ph.D. (London).
- 10. Samiullah Shah, Esq., B.sc. Hons. (Manchester).

- 11 M. Sayecduddin, Esq., M.A. (Edin.).
- 12. J. C. Kameshwar Rao, Esq., p.sc.
- 13. Khwaja Habib Hasan, Esq., M.sc. (Leeds), Ph.D. F.c.s.
- 14. Razuddın Siddiqi, Esq., M.A. (Cantab.), Ph.D (Gottmgen).
- 15. B. K. Das, Esq., p.sc. (London).
- 16. Qazi Momuddin, Esq., Ph.D. (London).

FACULTY OF LAW.

(For 1345 and 1346 Fasli).

- 1. Nawab Mirza Yar Jung Bahadur, B.A., LL.B. (Dean.).
- Nawab Zulqadar Jung Bahadur, M.A. (Cantab.). Bar-at-Law.
- 3. Nawab Hashim Yar Jung Bahadur, M.A., LL.B.
- 4. Nawab Sir Amin Jung Bahadur, M.A., B.L., LL.D., K.C.I.E..
- 5. Nawab Nazir Yar Jung Bahadur, M.A., LL.D.
- 6. Raja Bishesharnath Sahib, B.A., LL.B.
- 7 Muhammad Abdul Rahman Khan, Esq., B.A., B.Sc. (London).
- 8. Hosain Ali Mirza, Esq., Barrister-at-Law.
- 9. Mir Akbar Ali Musavi, Esq., B.A., LL.B. (Bombay).
- 10. Qazi Muhd. Husain, Esq., B.A., LL.B. (Cantab.).
- 11. Mirza Hosain Ali Khan, Esq., B.A. (Oxon.), Bar-at-Law.
- 12 Mir Siyadat Ali Khan, Esq., M.A., B.C.L., Ph.D. (Oxon.).
- 13. Khalifa Abdul Hakim, Esq., M.A., 11.B., Ph.D.
- 14. Mir Valiuddin, Esq., M.A., Ph.D. (London).
- 15. Akbar Ali Khan Esq, Bar-at-Law.
- 16. Khaliuz-Zaman, Esq., Bar-at-Law.

FACULTY OF MEDICINE.

(For 1346 and 1347 Fasli).

- 1. Dr. Haji Hyder Ali Khan, F.R.C.S.E. (Dean.).
- 2. Lt.-Col. Nawab Faiz Jung Bahadur, M.B., Ch.B. (Edin.).
- 3. Lt.-Col. Muhammad Ashraf, M.B., Ch.B. (Edin.).
- 4 M. M. Siddiq Hosain. Esq., M.R.C.S. (Eng.), M.R.C.P. (Lond.).
- 5. Captain K N. Waghray, M.B.B.S., M.R.C.P. (Eng.).
- 6. Khurshid Husain, Esq., M.B., Ch.B. (Edin.).
- 7. Syed Abdul Rahim, Esq., B.A., M.B.B.S., D.O.
- 8. Mufti Shah Nawaz, Esq., M.B.B.S.
- 9. Captain M. G. Sanichar, I.M.S., F.R.C.S.E.

- 10. Brij Mohan Lal, Esq., BA., M.B.B.S., M.Sc. (London).
- 11. Hasan Ali Khan, Esq., M.B., Ch.B. (Edin.).
- 12. Ali Ilusain, Esq., M.B.B.S., Ph.D. (Durham).
- 13. A. Latif Sayced, Esq., M.B., Ch.B. (Edin.).
- 14. S. W. Hardikar, Esq., M.D., M.R.C.P. (Edin.)
- 15. Sayyid Abdul Rahman, Esq., M.B., Ch.B. (Edin.).
- 16. Dr. V. G. Borgaonkar, M.B.B.S., M.R.C.S., L.R.C.P., (Lond.). L.M. (Dublin).

FACULTY OF ENGINEERING.

(For 1346 and 1347 Fasli).

- 1. Nawab Ali Nawaz Jung Bahadur, F.C.H. (Dean).
- 2. Mehir Ali Fazil, Esq., L.C.E.
- 3. Syed Arifuddin, Esq., B.sc. Hons. (Manchester).
- 4. Sayyid Ali Raza, Esq., B A., B.sc. Hons. (Manchester).
- 5. Samullah Shah, Esq., B.sc. Hons. (Manchester).
- 6. C. E. Presion, Esq., M.Sc., M.LE.E.
- 7. P. K. Ghosh, Esq., B.Sc. (Cal.), B.A., (Cantab.).
- 8. M. Gopalan, Esq.
- 9. Md. Hafizullah, Esq., B.sc. (Alld.).
- 10. The Professor of Mechanical Engineering.
- 11. The Professor of Physics.
- 12. The Professor of Chemistry.
- 13. The Professor of Mathematics.
- 14. S. P. Raju, Esq, B.A. (Mad.), B.E. (Poona), A.M.I.E. (Ind.) Dr. Ing. (Munich.).

FACULTY OF EDUCATION.

(For 1346 and 1347 Fasli).

- 1. Khan Fazl Muhammad Khan, Esq., M.A., (Cantab.).
 (Dean.).
- 2. Sayyid Muhammad Husain, Esq., B.A. (Oxon.).
- 3. Sayyid Ali Akbar, Esq., M.A. (Cantab.).
- 4. Muhammad Sajjad Mirza, Esq., M.A. (Cantab.),
- 5. Ghulam Rabbani, Esq., B.A., B.T.

THE ROYAL CHARTER.

Promulgated with His Exalted Highness' Firman dated the 16th Zilhijja 1337 Hijri (17th Aban 1327 F., 22nd September 1918) published in Gazette Extraordinary, Volume XLIX, No. 64 of the 30th Aban 1327 Fasli (5th October 1918).

Whereas the prosperity and well being of our devoted and loyal subjects are the objects of our most earnest solicitude, and whereas these objects can be secured only when the existing organisation of education in our Dominions is freed to an appreciable extent from the control of outside Universities, and higher education is organised within the State, with reference to local needs and conditions; We are pleased to order:—

- 1. that a University called the Osmania University be established at Hyderabad on the first day of Muharram 1337 Hijri.
- 2. the object of the Osmania University is to provide higher education, in theology, morals, literature, philosophy, science history, medicine, law, agriculture and commerce, besides providing instruction in arts, industries and other useful branches of knowledge and promoting research in all of these subjects.
- 3. the chief characteristic of the Osmania University will be that instruction will be imparted in all branches of learing through the medium of the Urdu language while a study of the English language and literature will be compulsory.
 - 4. The University shall have power-
- (a) to provide for instruction in all such branches of learning as the University may decide and also for research, and for the advancement and dissemination of knowledge.
- (b) to grant to and confer degrees and other acudemic distinctions on persons who shall have pursued a prescribed course of study in, and passed the examinations held by the University.
- (c) to grant diplomas, certificates or other distinctions to persons who have pursued a course of study under conditions approved by the University.
- (d) to admit graduates of other Universities to degrees of the same or similar rank.
 - (e) to confer honorary degrees, or other distinctions.
- (f) to withdraw or cancel degrees, diplomas, certificates or other distinctions granted or conferred, and

- (g) to exercise all such other powers and to do all such other acts as may be required in order to further the objects of the University and to carry on its work.
- 5. The University shall be able and capable in law to take, purchase, and hold any property movable or immovable which man become vested in it for the purposes of the University by purchase, grant, testamentary disposition or otherwise, and shall be able and capable in law to grant, demise, alien or otherwise dispose of, all or any of the property, movable or immovable belonging to the University; and also to exercise such other powers and do other acts incidental or appertaining to a body corporate.
- 6. The University shall be able and capable to establish colleges on its initiative, or to exercise all of its powers with regard to colleges founded for it or transferred to its control, or to those to which it recognises as colleges, and all these shall be deemed to be its constituent colleges.
 - 7. The organization of the University will be as follows:—

- 8. We shall be pleased to be the Patron of the University, and the other officers and executive bodies shall be as follows:-
 - (1) The Chancellor.—The Chancellor shall be the highest controlling authority of the University and may at any time direct an inspection and supervision of the University institutions, including buildings, laboratories and other appurtenances generally, and to direct the inspection of one or all of these for the purpose of seeing that the proceedings of the University are in conformity with this Charter and the rules framed thereunder.
 - The Chancellor may also by order in writing annul any proceedings which is not in his opinion in conformity with this Charter and the rules framed thereunder.
 - His Excellency the Minister shall be the ex-officio Chancellor of the University.

- We shall be pleased to be the Patron of the University.
 The Vice-Chancellor.—The Assistant Minister of Education or the officer charged with the administration of the University shall be the Vice-Chancellor of the University and he shall take rank in the University next to the Chancellor
 - He shall exercise general supervision over the educational arrangements of the University, and it shall be his duty to see that the provisions of this Charter and the rules framed thereunder are faithfully observed.
 - If any emergency arises the Vice-Chancellor shall be empowered to pass such orders or to take such action as he deems necessary and intimate the fact to the officer who in the ordinary course would have dealt with the matter
- (3) The Council.—The Executive Government of the University including the general superintendence and control over the Constituent Colleges shall be vested in the Council; provided that the Government may by rules framed in this behalf from time to time reserve to themselves such powers relating to the appointment, punishment, removal and leave of the officers as they may deem fit.
 - The Council shall consist of not less than nine and not more than eleven members excluding principals of Constituent Colleges and shall comprise:—
 - (i) His Excellency the Minister.
 - (i) The Assistant Minister, Education, or the Officer charged with the Administration of the University.
 - (111) The Assistant Minister, Ecclesiastical Department.
 - (iv) The Assistant Minister of Finance.
 - (v) The Secretary to Government, Education Department.
 - (vi) The Director of Public Instruction.
 - (vii) The Principals of Constituent Colleges.
 - (viii) The remaining members appointed by the Government.
 - The Secretary to the Government, Education Department will be the Secretary to the Council.

- (4) The Senate.—The Senate shall, subject to this Charter and the rules framed thereunder, have the entire charge of the organization of instruction in the University and the Constituent Colleges, the curriculum, and the examination and discipline of students and the conferment of ordinary and honorary degrees.
 - The Senate shall consist of such number of members not less than forty and not more than seventy as may be fixed from time to time by the Chancellor. Such members shall be styled Fellows and shall hold office for a term of two years and their powers and duties shall be set forth in detail in the rules.
 - The first members of the Scnate shall be appointed for that period by Government.
 - After the lapse of the said term of two years, the Senate shall be composed of—
- (a) The Vice-Chancellor and the other members of the Council mentioned in Section (3).
- (b) The University Professors.
- (c) Four members elected by the Senate, two from the list of registered graduates and two from members of the Faculties.
- (d) The remaining members nominated by the Chancellor provided that the election and nomination of persons as Fellows shall be so regulated as to secure in the Scnate a majority of persons connected with or following the profession of education.
- (5) The Syndicate —The Syndicate will be the business committe of the Senate and will consist of not less than 5 nor more than 7 members of the Senate, and its powers and duties shall be set forth in detail in the rules.
- (6) Faculties.—These will be academical Committees of the Senate, entrusted with the framing of curricula and arranging for examinations and other matters. These Committees will be appointed from time to time in accordance with rules framed hereafter, and for each branch of konwledge there will be a separate Faculty. The University shall include at present the Faculties of Arts and Theology.
 - Each Faculty shall be composed of not less than 12 nor more than 16 members of whom at least two in excess of half the number shall be from the Professors of the University.

- Each Faculty shall elect from among its members a Dean.
- A Faculty shall have power to consider and report on any matter referred to it by the Senale or by the Council.
- (7) Boards of Studies.—There shall be a Board of Studies in Theology and for every branch of knowledge.
 - The members of the Bourds shall be recommended by the Faculties to the Senate and on its recommendation appointed by the Council and shall consist of University Professors and other persons possessing special knowledge of the subjects dealt with by the Boards to which they are appointed.
 - The duties of the Boards shall be to recommend to the Faculties text-books for study and for translation, courses of study and examiners in their respective departments, and generally to advise in all matters referred to them by the Council or by the Faculty to which they belong.
- (8) Board of Audit.—This Board will be empowered to audit all the accounts of the University and of its property, etc...It shall be appointed every year by the Scnate and shall consists of three Fellows not being members of the Council The accounts of the University shall also be audited on behalf of Government every year, by an officer appointed for the purpose by Government, the interval between each audit being not more than 15 months.
 - The Government auditor shall have access to all the accounts and offices of the University.
- (9) Registrar.—The Registrar shall also be Secretary to the Senate and Syndicate. The Registrar may be a member of the Senate or Syndicate but shall not be a member of the Council.
 - The Registrar shall be appointed by Government on the recommendation of the Council but the first Registrar shall be appointed by Government.
- (10) Other persons and bodies in the rules in force.
- 9. The Council may, subject to the provisions of this Charter and the rules in force, appoint Committees consisting of Fellows of the University and also, if the Council think fit, of persons who are not Fellows of the University, and may delegate to such

Committees such duties as they think fit, as regards administrative or other matters affecting the University or any particular Faculty or Department, or the management or supervision of any building or property of the University.

The Senate, the Faculties and the Boards of Studies, shall be similarly empowered to appoint such committees within their respective spheres.

- 10. The University shall, in the discharge of its functions, use a seal, the design of which has been approved by us.
- 11. Subject to the provisions of this Charter and the rules in force the Council may from time to time make any rules and regulations required for carrying out all or any of the purposes of this Charter.

The Council may from time to time make additional rules or amend or repeal the rules in force, but all new rules and additions to the rules and all amendments and repeals of the rules shall, before they come into effect, require the previous approval of the Government who will be empowered to pass suitable orders thereon.

The first rules shall be framed and enforced by Government.

- 12. The Senate shall have power to draft and propose to the Council rules to be made by the Council and it shall be the duty of the Council duly to consider the same.
- 13. All grants made by Government from time to time and all sums paid or endowments made by private persons or local authorities, for the purposes of the University shall form a fund styled "the University Fund" which shall be at the disposal of the University to be employed for any of the purposes set forth in this Charter.
- 14. The Council shall have prepared and laid before the Senate every year, accounts of receipts and expenditure of the University. The budget after consideration by the Senate shall be submitted to Government and it shall be competent to Government to pass suitable orders on it.
- 15. The duties and powers of the University and its executive officers and bodies shall be set forth in further detail in the rules.

(By Order)
A. HYDARI,
SECRETARY TO GOVERNMENT,
Judicial, Police & General Departments.

REGULATIONS

CHAPTER I.

PRELIMINARY DEFINITIONS.

Definitions.—In these rules unless there is something repugnant to the subjects or context:—

"THE CHARTER" means the "ROYAL CHARTER" dated the

16th Zilhijja 1336 Hijri.

"CLEAR DAYS" means a period exclusive of both the first and last days.

and last days.

- "THE JARIDAH" means the Jaridah-i-Ailamia Sarkar-i-Ali, i.e., His Exalted Highness the Nizam's Government Gazette.
- "THE RULES" means the rules of the Osmania University for the time being in force.
- "THE UNIVERSITY" means the Osmania University.

"RESOLUTION" means an original proposal.

- "Motion" means any proposal moved either in the shape of a resolution or an amendment.
- All words or expressions used in these Rules and defined in the Charter shall invariably bear the signification established by these definitions.

Notices.— Any notice, intimation or information required to be given, and any paper, minutes or proceedings required to be sent, to any person under the Rules shall, unless otherwise provided, be considered as despatched if it is sent to the address of that person, or forwarded by post.

Addresses.—Every Fellow of the University shall give an intimation of his address or change of address to the Registrar who shall keep a record in his office of the addresses of all Fellows. The last address communicated to the Registrar shall

be deemed the correct address in each case.

CHAPTER II. THE VICE-CHANCELLOR.

- 1. The Vice-Chancellor shall have the power to convene meetings of the Council and the Senate and to perform all such acts as may be necessary to carry out or further the objects of the Royal Charter and the rules thereunder.
- 2. If an emergency arises which in the opinion of the Vice-Chancellor requires immediate action, the Vice-Chancellor shall take such steps as he deems necessary and report the fact to the authorised officer who, in ordinary course, would have dealt with the matter.

3. In matters which are not touched upon in the Royal Charter or the Rules and in which he considers a reference to Government necessary, the Vice-Chancellor may make such reference to Government on such matters.

CHAPTER III.

THE COUNCIL.

4 The nominated members of the Council shall hold office for a term of three years. Such memberships as fall vacant from time to time will be filled up by the Government. A member of the Council whose term has expired shall be eligible for re-nomination.

5. The Council shall submit to Government without delay

copies of the proceedings of the Senate.

6. The Council shall meet ordinarily once a month and at other times when convened by the Vice-Chancellor. The Vice-Chancellor or in his absence, the senior member present, shall preside at the meetings.

7. Half the number of members shall constitute a quorum fractions being counted as whole numbers. All questions shall

be decided by a majority of votes of the members present.

8. In accordance with the provisions of the Royal Charter and the Rules made in pursuance thereof, the Council shall, in addition to the powers vested in it, also exercise the following powers, viz:—

(a) To determine from time to time the number of professors, assistant professors, etc., and other members of the teaching staff and the office establishment of the University and its constituent colleges.

(b) In the case of appointments, within their power of visposal, to delegate, subject to the general control of the Council, the power of appointment to such authority or authorities as the Council may from time to time by general or special resolution direct.

(c) To organise and regulate the finances, accounts, investments, property, business matters, and all other administrative works of the University and for that purpose to appoint such agents as they may think fit.

- (d) To invest any money belonging to the University including any unutilized income in stocks, funds, shares and securities or in the purchase of immovable property and to alter such investments from time to time.
- (e) To transfer or accept transfer of any movable or immovable property on behalf of the University.

- (f) To provide buildings, lands, furniture and apparatus and other accessories needed for carrying on the work of the University.
- (g) To enter into, alter and cancel, contracts on behalf of the University.
- (h) To entertain, adjudicate upon and redress any grievances of the professors, the teaching staff, the graduates, the undergraduates and the University servants, who may for any reason feel aggrieved.
- (i) To maintain a register of donors to the University.
- (j) To draft rules as and when they see fit and submit the same to the Government for consideration and approval.

The following additional powers were delegated to the Council in accordance with His Exalted Highness the Nizam's Firman dated the 20th Rajab 1340 Hijri, 16th Ardibehisht 1331 F.—20th March 1922:—

- (1) To transfer any expenditure from one sub-head to another.
- (2) To sanction all kinds of leave to any officer, whose leave the Principal, the Registrar or the Curator is not authorised to sanction, and also to cancel the same.
- (3) To sanction amal-i-taynati from one office of the University to another.
- (4) To change the designation of any non-gazzetted appointment.

(5) To sanction arrears of pay or travelling allowance due to an officer of the University for any period.

(6) To depute officers of the University to places outside the Dominions to attend Scientific Conferences, to study the working of other Universities or to purchase stores or apparatus for the University or for any other purpose in the interests of the University.

(7) To sanction the payment of full salary to the officiating officer, when the permanent incumbent avails of

extraordinary leave.

(8) To commute absence without leave into leave of any kind to which an officer is entitled under the Rules provided the period of absence does not exceed six months.

(9) To sanction furlough (rukhsat-i-khangi) to officers of the University up to a limit of three years for purpose of study irrespective of the length of their services. (10) To sanction holidays and vacations for the colleges and offices of the University or to close the colleges and offices during epidemics.

(11) To sanction rates of remuneration for books translated

on piece-work.

(12) To sanction extension in the services of officers of the University up to a limit of 60 years.

(13) To start a newly appointed officer on a salary above the

minimum pay of the grade.

- (14) Notwithstanding anything to the contrary in Articles 113 and 117 of the Civil Service Regulations, the Council of the Osmania University will be competent to sanction allowances for plural appointments in the colleges or offices of the University subject to the general condition that the cost of these arrangements should on no account exceed the provision in the budget for the appointments.
- N.B.—If the Financial Member differs in any financial matter from the view taken by the majority the case shall be referred to Government.

CHAPTER IV.

1. THE SENATE.

- 9. In accordance with the provisions of Section 8 (1, 2, 3, 4. 5 and 6 of the Charter) dated 16th Zilhijja 1336 Hijri (22nd September 1918), the Chancellor, the Vice-Chancellor, the Secretary to Government, Education Department, the Director of Public Instruction, the Councillors, the Deans of the Faculties of Theology and Arts and the Fellows of the University, shall have seniority and precedence first, in the order above specified down to the Deans; and secondly, according to their official precedence in the case of ex-officio Fellows and thirdly, in the case of the remaining Fellows according to the sequence of their original appointments.
- 10. The election of members shall be subject to the approval of the Chancellor.
- 11. The Chancellor may, on the representation of two-thirds of the members of the Senate, cancel the appointment of any person as a Fellow of the University, and as soon as such cancellation is notified in the Jarida, the said person shall cease to be a Fellow. When a member is charged with gross misbehaviour unfitting his office, the Senate will hear him or any other member nominated by him on his behalf before reporting the matter to the Chancellor.

- Every Fellow elected and nominated under the Rules shall be eligible for re-election or nomination at the close of his term of office.
- 13. All casual vacancies among elected members shall be filled up by the body which elected the member who held the vacant membership.

2. POWERS OF THE SENATE

14. In accordance with the provisions of the Royal Charter and Rules made in pursuance thereof, the Senate shall among other powers also have the following powers:-

(a) To discuss and declare an opinion on any matter whatso-

ever relating to the University.

(b) To suggest to the Council the removal of any professor or teacher of the University or the appointment of

additional professors or other teachers.

(c) To formulate, modify or revise schemes for the organization of the Faculties of the University and to assign to such Faculties their respective subjects and also to report to the Council regarding the expediency of the abolition, amalgamation or sub-division of any Faculty.

(d) To institute and confer such degrees and grant such Diplomas, Licenses, Certificates, and other distinctions in respect of courses of study and examination:

as may be prescribed in the Rules.

(e) To make rules regarding the academic apparel of gradu. ates, holders of distinctions and officers of the Univer-

(f) To fix, subject to conditions made by the founder and accepted by the University rules and regulations and terms of competition for fellowships, scholarships and other prizes and to award the same.

(g) To report on any matter transferred or delegated to

them by the Council.

- (h) To promote research within the University and to call for reports on the subject from time to time.
- (i) To maintain a Register of Graduates.

3. MEETINGS OF THE SENATE.

- **15.** The Senate shall meet ordinarily once a year in the month of Amardad. If deemed necessary by the Vice-Chancellor, meetings may be convened at other times also. copy of the proceedings of such meetings must be sent to the Council.
- The Vice-Chancellor shall convene a meeting of the 16. Senate on the requisition of any six Fellows.

- 17. Twenty members shall constitute a quorum and all questions shall be decided by a majority of votes of the members present.
- 18. Any member of the Senate shall be empowered to bring forward a resolution dealing with any matter pertaining to the proceedings of the Faculties or of the Syndicate or with any question concerning the budget or otherwise connected with the affairs of the University. Such resolution, if carried, shall be forwarded to the Council and the Council shall inform the Senate in due course of the action taken. Should the Senate be not satisfied with or disapprove of the course of action adopted by the Council, it shall have power to make a representation to Government on the subject.
- 19. Such proposals and amendments only as are immediately connected with the Osmania University and are in accordance with the Royal Charter shall be entertained and debated in the Senate.

4. CONVOCATION.

- 20. A convocation for conferring degrees shall be held on the fourth Monday in Azur or if that day happens to be a holiday, on the next working day or on such other graduation day as may be appointed by the Chancellor or Vice-Chancellor.
- 21. Persons entitled to degrees and desirous of being admitted must apply in writing 10 days previously to the Registrar who will communicate their names together with the necessary certificates to the respective Deans of Faculties for submission to the Senate on the next graduation day.
- 22. The Senate will, on the motion of the Dean of each Faculty or in his absence, the senior member of the Faculty respectively pass, the necessary graces in that behalf and the persons so approved shall be presented to the Chancellor or Vice-Chancellor successively, the graduates in the Faculty of Theology taking precedence of those in Arts.
- 23. In special cases and at the discretion of the Syndicate candidates who have passed the examinations may be permitted to take their degrees in absentia on payment of an extra fee of Rs. 10.

5. NOTICE AND PROCEDURE.

24. Sixteen clear days before the day fixed for a meeting of the Senate, the Registrar shall forward to each member of the Senate a statement of all business to be brought before the meeting and containing the full text of each resolution proposed to be put before the Senate with the name of the proposer of each, a written intimation of which has previously been received by the Registrar. The inclusion of a report of any committee of the Senate in the Agenda paper shall be held to be equivalent to notice of a motion, for its adoption. Notice in writing of proposed amendments and the terms thereof and of motions for any change in the order of business as set forth in the statement must be forwarded so as to reach the Registrar five clear days before the meeting. The Registrar shall two clear days before the meeting forward to each member of the Senate a statement of all motions and amendments, and no motion or amendment of which such previous notice has not been given, shall be put to the meeting. The following motions may, however, be proposed without a previous entry in the Agenda paper:—

(a) A motion for dissolution, adjournment or suspension of the sitting to pass to the next business on the Agenda paper.

(b) A request to the Council to reconsider a question; or a direction to the Syndicate to review their decision.

(c) A motion remitting the matter under consideration to the Syndicate or to a Faculty for report, or

(d) An amendment admitted by the Chairman as purely formal.

6. ORDER OF BUSINESS.

- 25. The members shall, before they take their place, register their attendance in a book placed for the purpose at the entrance of the place of meeting.
- 26. Fifteen minutes after the time prescribed for the meeting, the Chairman shall ascertain whether there are twenty members present; if this number be not present, the meeting shall forthwith be adjourned to such a date as the Chairman may fix. Such adjournment shall be recorded by the Registrar under the signature of the Chairman. In case of a meeting adjourned for want of quorum, no quorum will be required to pass the adjournment.
- 27. At every meeting, unless the meeting, by special vote, otherwise determine, the order of business shall be as follows:—

(a) The election of the Chairman if such election forms part of the business.

(b) The signing of the minutes of the previous meeting or the meeting under adjournment.

(c) The election of any official of the University, if such election forms part of the business of the meeting.

(d) Any motion for a change in the order of business.

(e) Such business and motions of which notice has been given according to the rules in the order in which such business and motions are entered in the Agenda Paper, and also motions to be brought forward subject to the provisions of this Rule and Rule 24.

7. RULES OF DEBATE.

(1) Motions.

28. Every motion shall be affirmative in form and shall

begin with the word "that."

29. Every motion shall be moved by the member in whose name it stands on the Agenda Paper; if he is absent or declines to move, it may be moved by any other member.

30. Every motion at a meeting must be seconded otherwise it shall drop. The seconder of a motion may reserve his speech.

31. When a motion has been seconded it shall be stated

from the chair.

32. When a motion has thus been stated it may be discussed as a question to be resolved in the affirmative or as proposed to be changed by amendment.

When before or after debate no member rises to speak to the motion the chairman shall proceed to put the question to

the vote in the manner hereinafter explained.

33. A substantive proposal once brought forward shall not be proposed a second time at the same meeting or at any adjournment thereof. A proposal substantially identical in part with one already disposed of at the same meeting or adjourned meeting, may be brought forward with the omission of such part.

34. Not more than one proposal and one amendment thereto shall be placed before the meeting at the same time. Each amendment shall be disposed of before the next is moved. All amendments which are not withdrawn under Rule 43, or which do not violate Rule 36, shall be debated and voted upon. In case no notice of amendment under Rule 24 has been given, the Senate shall proceed to consider and to vote upon the bare proposal.

(2) Amendments.

35. No amendment shall be proposed which would reduce the original proposal to its negative form.

36. No amendment shall be proposed which raises a question already disposed of by the meeting or is adverse to any resolution

passed by it.

37. The order in which amendments to proposal are to be brought forward shall be determined by the chairman in view of their object and logical inter-relation.

38. An amendment, the substance of which has been disposed of in part, may be modified by its proposer so as to retain

only the parts not so disposed of.

39. When an amendment has been moved and seconded it shall be stated from the chair and then the debate may proceed on the original proposal and the amendment together; but if the questoin raised by the amendment is one on which a member has not yet spoken he may speak to that question though he had spoken to the original question or a previous amendment.

40. Every amendment shall be proposed in such form as may enable the modification of the original motion in any or all

of the following ways:-

- (1) by addition of words;
- (2) by deletion of words;(3) by substitution of words;

and the mover may state how exactly the motion or the part thereof affected would stand when so amended.

41. If any amendment is so carried it shall become part of the motion before the Senate and the motion shall be modified

accordingly.

42. When all the amendments of which due notice has been given, have been considered, the original motion or original motions as amended in the course of debate shall be placed before the Senate and put to the vote without further discussion.

(3) Withdrawal of a Question.

43. No motion shall be withdrawn from the decision of the Senate without its unanimous consent. If the mover states his wish to withdraw a proposal or amendment and if no dissent is expressed during the interval allowed by the Chairman for the purpose, the Chairman shall declare that the question is withdrawn with the consent of the Senate.

(4) Resolution of the Senate into a Committee.

44. The Senate may when it thinks fit resolve itself into a Committee to consider any item which may be on the Agenda Paper. A motion for the resolution of a meeting into a Committee may be made by any member at any time—but not so as to interrupt a speech—without the notice required under Rule 24. Such motion, however, can only be placed before the Senate for consideration if the Chairman has permitted it. No speech shall be allowed in moving such motion. No such motion shall be considered unless fifteen members rise in support thereof. The motion having thus been duly seconded shall be put to the meeting without further discussion and shall only be carried if two-thirds of the members present vote in its favour.

45. When the Senate decides in this manner to resolve itself into a committee the Chairman shall be the same as for the meeting of the Senate and the quorum shall be the same as for the meeting of the Senate.

The manner in which the discussion of the matter under consideration shall be conducted shall be left to the discretion of the Chairman.

When in the opinion of the Chairman the matter has been sufficiently discussed the committee shall embody its conclusions in a report to be signed by the Chairman. The period during which the Senate is sitting in the committee shall be considered as a suspension of the sitting of the Senate and immediately the committee terminates the Senate shall be again called to order by the Chairman and report of the Committee's deliberations presented to it by the Registrar. If a resolution passed by the Committee involves recommendations not covered by the original motion and the amendments to that motion on the Agenda of the meeting they shall not be considered by the Senate until notice of these has been given as required under Rule 24, and the meeting of the Senate shall be adjourned to allow such notice being given. A motion made as a result of the deliberations of such a Committee may be presented to the Senate without previous consideration by the Syndicate.

(5) Adjournments, etc.

- 46. A proposal "that this meeting be now dissolved" may be moved at any time as a distinct question but not as an amendment nor so as to interrupt a speech. If the motion is carried the business before the meeting shall drop.
- 47. A proposal "that the meeting be now adjourned" to some specified time, may be moved at any time as distinct question but not as an amendment nor so as to interrupt a speech The Chairman himself can however make such a proposal while a member is speaking. If such proposal be negatived the debate shall be resumed. The same rule will apply to the meeting of the Senate Committee.
- 48. No amendment shall be moved to a proposal under last preceding Rule except one for substituting a different time for that to which it is proposed to adjourn the meeting.
- 49. A meeting renewed or continued after an adjournment is to be deemed one with that preceding the adjournment provided that if the meeting be adjourned to such date as to admit of the notice required under Rule 24, any amendments otherwise in order may be moved at any adjourned meeting if the notice so required is duly given.

50. The motion "that the meeting pass to the next business on the Agenda" may be made at any time as a distinct question but not as an amendment nor so as to interrupt a speech. If such a motion be carried the proposal under consideration and the amendments thereto shall not be further dealt with at the meeting.

51. No motion for the dissolution or for the adjournment of the meeting or for the suspension of the sitting or to pass to the next business, shall be made or spoken to during the debate by any member who has spoken in the debate. Any such motion shall take the place of any question that may be before the meeting and if not withdrawn must be disposed of before

such question.

52. When a motion of the class contemplated in the last preceding Rule has been brought forward and negatived no other motion of that class shall be again brought forward until after the lapse of what the Chairman shall deem a reasonable time, nor shall a debate be allowed on such second or subsequent motion brought forward during a debate on the same proposal alone or the same proposal or amendment discussed together.

(6) Miscellaneous.

- 53. On each proposal or proposals and amendment in debate a member may speak once in accordance with the provisions of Rules 39 and 51.
- 54. The member who is first up at the conclusion of a speech has the right to be heard. In cases of competition the Chairman shall decide.
- 55. The mover of an amendment or when there is no amendment the mover of the original resolution may reply upon the debate before vote is taken; the mover of a motion for a dissolution or adjournment or for the suspension of the sitting or for the passing to the next business on the statement has, however, no right to reply.

56. No member shall speak to the question after the mover

has entered on his reply.

57. The Chairman has the same right of moving or seconding a motion or amendment and of otherwise taking part in the debate as any other member. When the Chairman thus takes part in the debate he shall vacate the chair whilst he is addressing the meeting and the chair shall during such time be taken by the senior member present, not being the Chairman.

58. Any member may call the Chairman's attention to a point of order even whilst another member is addressing the meeting, but beyond stating the precise point of order raised,

he shall not make a speech. Such a call pronounced by the Chairman to be vexatious and any interruption or obstruction to the progress of the business before the Senate pronounced by the Chairman to be unseemly or unreasonable shall be deemed a breach of order.

59. The Chairman shall be the sole judge on any point of order and may call any member to order and if the member so called to order shall in speaking disregard such call the Chairman may direct him to sit down and thereupon another member may speak. In the event of any contumacious disregard of a ruling or call to order by the Chairman he may request the member so offending to leave the meeting and on such requisition being made to a member by name, he shall be suspended from his functions as a member during the meeting and shall be bound immediately to withdraw.

(8) Voting.

- 60. On putting any question to the vote the Chairman shall call for an indication of the opinion of the Senate by a show of hands in the affirmative and negative and shall declare the result thereof according to his opinion.
- 61. Any six Fellows may demand a division except on a motion for which under Rules 24 and 44 previous notice is not required.
- 62. In every division only such members as are present at the putting of the question shall be entitled to vote. Voting papers will be supplied by the Registrar and every voting paper shall be returned with or without the vote.
- 63. When the Chairman announces the division to be closed the Fellows shall state in writing the number on each side, significant the statement and hand it to the Chairman together with the voting papers arranged in two separate bundles.

The Chairman shall then declare the result of the division to the meeting and the result shall be recorded in the minutes.

- 64. If after a division five members present demand a recount the Chairman shall appoint two or more members to act with the Fellows who shall report the fact to the Chairman, and the latter shall thereupon declare the result which shall be conclusive.
- 65. Pending the recount the Chairman may either suspend the sitting or call for such business as may in his opinion be most conveniently proceeded with. But on the disposal of the business thus entered on the regular order of subjects if it had been departed from shall be resumed.

(9) Record of Proceedings.

- 66. A journal shall be kept by the Registrar containing a brief abstract of the proceedings of the Senate. The journal shall be submitted as soon as possible after each meeting to the Chairman for his confirmation and signature.
- 67. Within three weeks after a meeting of the Senate, the Registrar shall, under the direction of the Syndicate, post a printed copy of the minutes of such meeting attested by the Chairman to the address of each member.
- 68. If no exception is taken by a member who was present at the meeting to the correctness of the minutes within ten days of posting by the Registrar they shall be deemed to be correct.
- 69. If any exception be taken within the time aforesaid the attention of the Chairman shall be called to the portion of the minutes objected to and he shall make such alterations as he may find to be necessary.

CHAPTER V.

THE SYNDICATE.

- 70. Two members of the Syndicate shall be nominated by the Council and the rest elected by the Senate.
 - 71. Three members shall form a quorum.
- 72. The President of the Syndicate shall be nominated by the Council from among the Syndics.
 - 73. It shall be the duty of the Syndicate:-
 - (a) To order examinations in conformity with the Rules and fix dates for holding them.
 - (b) To fix the fees, emoluments, travelling and other allowances of Examiners and Moderators.
 - (c) To consider and make such reports or recommend such action as it deems fit on financial and business matters brought forward by the Members of the Senate and Faculties for consideration by the Senate.
 - (d) To prepare such forms and registers as are from time to time prescribed by the Rules.
 - (c) To make all the necessary arrangements for the publication of the books, etc., brought out under the auspices of the University.

CHAPTER VI.

THE FACULTIES.

74. The Faculties shall be constituted every two years and the members will be elected by the Senate.

- 75 The Dean of a Faculty shall hold office for two years till the next re-constitution of the Faculty. He shall preside at the meetings of the Faculty.
 - 76. A Faculty shall have power:-
 - (a) To draft rules in regard to courses of study and examinations prescribed by the University and to lay such rules before the Senate in order that they may be brought before the Council for ratification.
 - (b) To remit any matter to a Board of Studies comprised within the Faculty for consideration and report.
 - (c) To consider any report or recommendation of any Board of Studies comprised within the Faculty.
 - (d) To hold meetings of the Faculty or a Committee of the Faculty along with any Faculty or a committee thereof for the discussion of any matter of common interest.
 - (e) To appoint Examiners and Moderators.
 - (f) To determine finally the results of the examinations on the recommendations reported by a meeting of all Examiners for each examination.
 - (g) To determine the award of stipends, scholarships medals, prizes and other rewards in conformity with the Rules and the conditions prescribed for their award.
 - (h) To determine courses of study and lists of text-books to be prescribed or recommended for study or translation.

CHAPTER VII.

THE BOARDS OF STUDIES.

77. The following will be the Boards of Studies:-

English Literature.
Compulsory Theology.
Arabic Literature.
Sanskrit Literature.
Persian Literature.
Latin Literature.
Urdu Literature
Marathi Literature.
Telugu Literature.
Kanarese Literature.
Tamil Literature.
French Literature.

History, including at least one member each for Indian History and Muslim History, and Political Science

Economics and Sociology.

Mathematics.

Physical Science (Physics and Chemistry). Natural Science (Geology, and Biology).

Mental and Moral Philosophy, including at least one member each for Muslim Philosophy and Hindu Philosophy.

Domestic Science.

- 78. A member of a Board of Studies shall hold office for two years and shall be eligible for reappointment.
- 79. No board shall consist of more than seven or less than three members. The head of the Department concerned will be an ex-officio member of the Board, and in addition to him, the Faculty may elect five members of the Board. The Senate may, if it thinks it necessary, elect a seventh. Three members will form a quorum.
 - 80. Each Board shall elect its own Chairman.
- 81. Any Board may co-opt specialists who are not members of the board, but such member will not be entitled to vote.
- 82. Members of the Boards of Studies shall be solely responsible for seeing that there is nothing in any book prescribed for study which is calculated to wound the religious sentiments of any section of His Exalted Highness' subjects, no exception however being taken to minor differences of opinion which are inevitable. There shall be at least one Musalman on the Boards conversant with the language and competent to express an opinion on the books from a religious and Islamic point of view Rules for the guidance of the members of the Boards of studies shall be as follows:—
- 1. All books prescribed for study should be free from passages containing improper remarks concerning founders of religions or passages likely to cause offence to followers of any religion or prejudicial attacks on any religion.
- 2. Islamic religious books included in the curriculum should be entirely free of any teaching contrary to the established beliefs of Muslims.
- 3. But the following will not be held objectionable provided there is no unseemly attack on any religion:—
 - (a) In books of Literature.—

Verses in praise of wine, etc., showing a disregard

of Shariat (مضامین رندانه) and poetic fancies (تخیلات شاعرانه)

- (b) In books of Philosophy.—
 Questions of Philosophy.
- (c) In books of History.—

The religious ideas of the followers of other religions or narratives of their achievements from a historical point of view.

CHAPTER VIII.

FINANCE.

(1) The Board of Audit.

- 83. The Board shall meet ordinarily once every month and t other times when convened by the Vice-Chancellor.
- 84. The Board shall examine and audit the University accounts, the endowments and trust funds accounts, consider vays and means and the financial effects of any important neasures in contemplation and make recommendations when accessary to the Senate on all matters relating to the finance of the University. It shall also make an annual report to the senate on noteworthy points regarding the income and expenditure during the last preceding year. Copies of all reports and ecommendations of the Board of Audit shall be sent to the Jouncil by the Senate. The Members of the Board shall have access to all the accounts and other records of the University.
- 85. Members of the Board shall hold office until the next nnual meeting of the Senate. They shall be eligible for reppointment at the expiration of their term of office. All acancies in the Board occurring in the course of the year shall e filled up by the Senate.

(2) Government Audit.

- 86. The accounts of the University shall be audited at least nce in every year and at intervals of not more than fifteen tonths by auditors appointed by Government.
- 87. The auditors shall for the purposes of their office have coess to all the accounts and other records of the University.
- 88 The accounts when audited shall be published together ith the auditors' report in such form as may be prescribed by lovernment and a copy thereof shall be submitted to Government.

CHAPTER IX.

OFFICERS AND SERVANTS OF THE UNIVERSITY.

- The Registrar will hold office during the pleasure of the Government but may be removed on the recommendation of a two-thirds majority of the members of the Council.
 - It shall be the duty of the Registrar:-
 - (a) To be the custodian of the records, library, common seal and such other property of the University as the Council shall commit to his charge.
 - (b) To attend as far as possible all meetings of the Senate and the Syndicate and any committees appointed by the Senate and to keep minutes thereof.

(e) To conduct the official correspondence of the Senate and the Syndicate.

- (d) To issue all notices concerning meetings of the Senate, Faculties, Syndicate, Boards of Studies, Boards of Examiners and any committees appointed by the Senate, the Faculties, or any of the Boards of Studies.
- (e) To conduct all the administrative duties of the Translation Bureau.
- (f) To perform such other duties as may from time to time be prescribed by the Council and generally to render such assistance as may be desired by the Council in the performance of its official duties.

The scale of establishment for the office of the University shall be fixed by the Council from time to time.

The Registrar shall have power to fine, suspend and grant leave to all non-gazetted servants of his own office and make appointments upto Rupees 125.

CHAPTER X. EXAMINATIONS.

No one shall be permitted to enter the University in order to study for the Intermediate Examination unless he has passed the Matriculation Examination of the University or the School Leaving Certificate Examination or the Matriculation Examination of any other Indian or English University.

94. No one will be admitted to join the University to study for the B. A. and other degrees unless he has passed the Intermediate Examination of the University or any other Indian or

English University.

(By order) A. HYDARI, SECRETARY TO GOVERNMENT, Judicial, Police and General Departments.

SUPPLEMENTARY RULES.

I. ELECTION OF MEMBERS OF THE SYNDICATE BY THE SENATE.*

The following procedure shall be adopted in the election of the members of the Syndicate by the Senate under Regulation 70.

- 1. The election shall take place at the annual meeting held in Amardad, or on such date as the Chancellor may appoint in this behalf.
- 2. Not less than ten days before the meeting the names of members who are proposed by any Fellow for election as members of the Syndicate shall be submitted in writing to the Registrar, who shall circulate the names to the members of the Senate at least four days before the meeting.
- 3. Each voter shall have only one vote for each vacancy and can give only one vote to any one candidate.
- 4. The election shall take place at the meeting of the Senate upon the date so fixed, and the voting shall be by ballot.
- 5. Those who obtain the highest number of votes shall be declared elected. In the event of there being any tie between two or more candidates necessitating further selection, their names shall be reported to the Chancellor with whom the final selection shall rest.
- N. B —The Chancellor or in his absence the Vice-Chancellor shall have the power to accept or reject an election, and in the latter case they shall be competent to cancel the election made and to order a fresh one

II. ELECTION OF MEMBERS OF THE FACULTIES BY THE SENATE. †

The following procedure shall be adopted in the election of the members of the Faculties by the Senate under Regulation 74.

1. The election shall take place at the annual meeting held in Amardad, or on such date as the Vice-Chancellor may appoint on this behalf.

1333 F. (26th March 1924).

^{*} Received the assent of His Exalted Highness the Nizam on the 10th Shaban 1340 II., (5th Khurdad 1331 F—9th April 1922).
† Received the assent of HEH's, Government on the 22nd Ardibehis:

- 2. The Syndicate shall, in the first instance, draw up a list of persons whom they recommend for appointment to the various Faculties This list shall be circulated among the members of the Senate by the Registrar not less than sixteen clear days before the meeting. Any member of the Senate may then propose additional names for any of the Faculties, which must be sent to the Registrar nine clear days before the meeting. These names, together with the original list shall be circulated among the members of the Senate five clear days before the meeting and no additional names shall be received.
- 3. At the meeting of the Senate, the entire list shall be voted on Faculty by Faculty, and every member shall be declared to be appointed who obtains votes from a majority of the members of the Senate voting for the Faculty under appointment. The voting shall be by ballot.

In the event of there being any tie between two or more candidates necessitating further selection, their names shall be reported to the Vice-Chancellor with whom the final selection shall rest.

III. ELECTION OF TWO FELLOWS FROM THE MEMBERS OF THE FACULTIES.*

The following procedure shall be adopted in the election of two Fellows by the Senate from the members of the Faculties who are not already members of the Senate. One of these members shall be elected from the Faculty of Arts and the other from the Faculty of Theology.

1. Once in every year in the annual meeting of the Senate held in Amardad or on such date as the Chancellor may appoint on this behalf, there shall, if necessary, be an election to fill any vacancy among the two Fellows to be elected by the Senate from the members or the Faculties of Arts and Theology who are not already members of the Senate.

2. Intimation of the date fixed for election shall be sent to the members of the Senate at least twenty-five days in advance together with a list of the members of the Faculties who are not members of the Senate and each Fellow shall, on receipt of the notice, be entitled to propose the name of one person from the list for appointment as a Fellow. Such proposal must reach the Registrar fourteen clear days before the date fixed for election. The Registrar shall cause a list of the nominees to be printed and forwarded to the members of the Senate five clear days before the date fixed for election.

^{*} Received the assent of His Exalted Highness the Nizam on the 10th Shahan 1340 H., (5th Khurdad, 1331 F.—9th April, 1921).

- 3. The election shall take place at the meeting of the Senate upon the date so fixed, and the voting shall be by ballot.
- 4. Those who obtain the highest number of votes shall be declared elected. In the event of there being any tie between two or more candidates necessitating further selection, their names shall be reported to the Chancellor with whom the final selection shall rest.
 - N. B.—The Chancellor or in his absence the Vice-Chancellor shall have the power to accept or reject an election, and in the latter case they shall be competent to cancel the election made and to order a firsh one.

IV. ELECTION OF TWO FELLOWS FROM THE LIST

OF REGISTERED GRADUATES.*

The following procedure shall be adpoted in the election of two Fellows by the Senate from the list of registered graduates under Section 8 (4) (c) of the Charter.

- 1. Once in every year in the annual meeting of the Senate held in Amardad or on such date as the Chancellor may appoint in this behalf, there shall, if necessary, be an election to fill any vacancy among the two Fellows to be elected by the Senate from the list of registered graduates.
- 2. No person unless his name has been entered in the register of graduates and unless he has paid the fee for the year in which the election takes place shall be qualified to be elected at any election to be held under these rules.
- 3. Intimation of the date fixed for election shall be sent to the members of the Senate at least twenty-five days in advance together with a list of registered graduates and each Fellow shall on receipt of the notice, be entitled to propose the name of one person from the list for appointment as a Fellow. Such proposal must be accompanied by a brief statement of the special qualifications of his nominee and must reach the Registrar fourteen clear days before the date fixed for election. The Registrar shall cause a list of the nominees and of the statements to be printed and forwarded to the members of the Senate five clear days before the date fixed for election.
- 4. Each voter shall have only one vote for each vacancy and can give only one vote to any one candidate.
- 5. The election shall take place at the meeting of the Senate upon the date so fixed and the voting shall be by ballot.

^{*} Received the assent of His Evalted Highness the Nizam on the 10th Shaban 1340 H., (5th Khurdad 1331 F —9th April 1922).

- 6. Those who obtain the highest number of votes shall be declared elected. In the event of there being any tie between two or more candidates necessitating further selection, their names shall be reported to the Chancellor with whom the final selection shall rest.
 - N. B —The Chancellor or in his absence the Vice-Chancellor shall have the power to accept or reject an election, and in the latter case they shall be competent to cancel the election made and to order a friesh one.

V. REGISTER OF GRADUATES.3

The Register of Graduates to be kept under Section 8 (4) (c) of the Royal Charter shall be in such form as the Syndicate may from time to time decide.

- 1. Any person belonging to any of the following classes who is ordinarily resident in the Dominions shall, subject to the payment of the prescribed initial fce, be entitled to have his name entered in the register on application:—
 - (a) Any Master or Doctor of the University or of an Indian, British, Colonial or American University, recognised for the purpose by the Council.
 - (b) Any Bachelor of at least six years' standing of the University, or of an Indian, British, Colonial or American University recognised for the purpose by the Council.
 - (c) Any Maulvi Fazil, Maulvi Kamil or Munshi Fazil of the Dar-ul-Ulum of at least six years' standing.
- 2. The initial fee payable by a graduate for having his name entered on the register shall be five rupees.
- 3. The fee payable by a graduate for having his name reained on the register shall be two rupees a year. Till such fee has been paid, no graduate shall be entitled to take part in any election or to enjoy any of the privileges conferred by the Regulations.
- 4. A graduate whose name has been already entered on the register may at any time compound for all subsequent payments of the annual fee by paying the sum of twenty rupees.
- 5. The name of any graduate entered on the register shall f the amount of the annual fee is not paid by the 30th of

^{*} Approved by the Council of the University on the 18th Farwardi 1330 F, 9th Feburary1921

Ardibahisht, be removed therefrom, but shall at any time be re-entered on payment of all arrears

6. Registered graduates shall have, besides the right of

electing two Fellows, the following privileges:-

(a) They shall be entitled to the use of the University Library and Membership of the University Union.

(b) They shall be admitted free to all lectures delivered by University Professors.

(c) They shall have priority of admission to the Convocation over unregistered graduates.

Messrs. Parfitt & Co., Allahabad, have been appointed Robe-makers to the University.

VII. RIGHES OF PROCEDURE TO BE FOLLOWED AT THE CONVOCATION FOR CONFERRING DEGREES.**

1. The Chancellor, the Vice-Chancellor and Fellows shall assemble in the Senate room at the appointed hour. In the absence of the Chancellor, the Vice-Chancellor shall preside.

^{*} Received the assent of His Exalted Highness the Nizam on the 29th Rabi-us-Sani 1343 Hijri, (3rd Dai 1334 F.—17th November 1924)

2. The graces of the Senate on behalf of the candidates for admission to the several degrees will be supplicated by the Deans of the various Faculties in the following order:—

Theology.
Law.
Medicine.
Engineering.
Education.
Arts.
Science.

3. The formula to be used for each grace shall be as follows:—

4. When all the graces have been passed the Chancellor, Vice-Chancellor and Fellows shall proceed in procession to the Hall in which the degrees are to be conferred.

5. The Chancellor and Vice-Chancellor shall appear in their official robes and the Fellows shall appear in the academic costume to which they are entitled in virtue of their degrees or in that prescribed for the Fellows of the University.

6. The candidates shall wear the gowns and hoods appropriate to their respective degrees and shall be arranged opposite

to the Chancellor and the Vice-Chancellor.

7. On the procession entering the Hall, the candidates shall rise and remain standing until the Chancellor and the Vice-Chancellor and the Fellows have taken their seats.

8. The Chancellor, the Vice Chancellor and the Follows having taken their seats, the Chancellor or the Vice-Chancellor shall say: "This Convocation of the Osmania University has been called to confer degress upon the candidates who have been certified to be worthy of these degrees. Let the candidates stand forward"

9. Then the candidates standing, the Chancellor or the Vice-Chancellor shall put to them the following questions to which the candidates will answer by the words "I do promise."

Question 1.—Do you promise and declare that if admitted to the degrees for which you are severally candidates, and for which you have been recommended, you will, in your daily life and conversation, conduct yourself as becomes members of the University?

Answer.-- I do promise.

Question 2.—Do you promise and declare that to the utmost of your opportunity and ability, you will use your powers for the furtherence of true learning?

Answer.— I do promise.

Question 3.—Do you promise and declare that, to the utmost of your opportunity and ability, you will use your powers in the service of your fellowmen?

Answer.— I do promise.

Question 4.—Do you promise that you will faithfully and diligently fulfil the duties of the profession to which you will eventually belong and that you will on all occasions maintain its purity and reputation?

Answer.— I do promise.

Question 5.—(for the Faculty of Theology only). Do you promise and declare that to the utmost of your opportunity and ability, you will use your power in the service of Islam and as a pure Muslim?

Answer.— I do promise.

10. The Chancellor or the Vice-Chancellor shall then say "Let the candidates be presented."

- 11. The candidates shall be presented in batches to the Chancellor or the Vice-Chancellor by the Deans of their respective Faculties, who shall say for each batch:—
 - "I present to you this (or these) candidate (or candidates)—
 read out names—and pray that he (or they) may be
 admitted to the degree of....."
- 12. When all the candidates for the same degree have been presented the Chancellor or the Vice-Chancellor, in presenting the diplomas, shall say to the candidates who shall remain standing:—
 - "By virtue of the authority vested in me as Chancellor (or Vice-Chancellor) of the Osmania University, I admit you to the degree ofin this University, and I charge you throughout your life, to prove worthy of this degree."

13. When all the candidates have been presented, the Registrar shall lay the record of the degrees that have been conferred before the Chancellor or the Vice-Chancellor, who shall affix his signature thereto.

14. The Chancellor, the Vice-Chancellor, a Fellow of the University or a distinguished guest shall then address the

candidates.

- 15. At the close of the address the Chancellor, the Vice-Chancellor and the Fellows shall rise, and the Chancellor or the Vice-Chancellor shall say: "I declare this Convocation dissolved."
- 16. Then the Chancellor, the Vice-Chancellor and the Fellows shall retire in procession to the Meeting Room, the graduates standing.

VIII.-Rules for Conferring degrees before Convocation.

The Registrar or Vice-Chancellor has been empowered by special legislation to confer the degrees on such graduates in the presence of the Principal and such members of the teaching staff as can be conveniently present after charging them to be of good behaviour, etc., who proceed to the European Universities before the Convocation, provided they have been recommended by the Faculties.

IX. Rules for conferring Honorary Degrees.*

1. When the Vice-Chancellor and not less than two-thirds of the other members of the Council recommend that an Honorary Degree be conferred on any person on the ground that he is in their opinion by reason of his eminent position and attainments, a fit and proper person to receive such a degree and when the recommendation is supported by not less than two-thirds of the Fellows present at a meeting of the Senate and is confirmed by the Chancellor and by H.E.H. the Nizam on the recommendation of the State Executive Council, the Senate may confer on such person the Honorary Degree so recommended without requiring him to undergo any Examination.

Provided that in cases of urgency the Chancellor may act on the recommendation of the University Council only.

- 2. The Honorary Degrees which the University is empowered to confer shall be as follows.—
 - 1. Ph. D.
 - 2. D. Lit.
 - 3. D. Sc.
 - 4. LL. D.
 - 5. D. Th. (Doctor of Theology).
- 3. The Honorary Degrees shall be conferred by the Chancellor in the following words:—

^{*} Received the assent of His Exalted Highness the Nizam on the 19th Shawwal 1344 Hijri (28th Khurdad 1335 F, 2nd May 1926).

- "By the authority given me as Chancellor of this University, I admit you......to the Honorary Degree of......this on account of your eminent position and attainments."
- 4. The academic dress for the degree of LL.D. shall be a gown of green silk with full sleeves with wide yellow facings. The hood shall be scarlet silk lined with black velvet. The head-dress shall be a Dastar or Shamla.

X. Powers of the Principals of the Constituent and intermediate colleges.

- 1. The Principal shall be the supreme authority in all matters relating to the internal working of the College including the boarding houses.
- 2. He shall have power to accept or refuse applications for admission to the College and to rusticate, expel or otherwise punish pupils.
- 3. He shall have authority to make all appointments of non-gazetted officers of the 2nd and 3rd grades in the College.
- 4. He shall have authority to grant short leave (casual and privilege) or leave on medical certificates upto 3 months in the aggregate to all members of the staff, but acting arrangements should be made by the Council; and all kinds of leave to nongazetted officers whom he is empowered to appoint, and to make acting arrangements therefor.
- 5. Proposals for the appointment of officers of the Education Department as part-time lecturers in the Intermediate Colleges of the University should be submitted with the formal consent of the Director, Public Instruction.
- 6. He shall have authority to make temporary acting arrangements for a gazetted officer, whose absence from duty is due to illness or such other cause over which he has no control.
- 7. He shall have authority to suspend or dismiss his non-gazetted subordinates, whom he is empowered to appoint.

8. He shall be the only official channel of communication between the University authorities and the members of the staff.

- 9. He shall appoint to all scholarships reserved for the students of the College and have authority to reduce temporarily the amount of a scholarship, to cancel any appointment to a scholarship, and if circumstances make it necessary, to redistribute the scholarship.
 - 10. He shall have authority to grant casual holidays.

^{*} Roceived the assent of His Exalted Highness the Nizam on the 12th Safar 1333 H, (1st Dai 1329 F.—5th November 1919).

- 11. He shall have control over the libraries, laboratories and such other institutions in the College and shall have power to entrust the management of the aforesaid institutions to one or more members of the staff competent to run the institutions.
- 12. He shall have authority to spend all sums granted in the budget in accordance with the budget allotment and shall send in the bills direct to the Accountant-General for payment.

CHAPTER XI--POWERS OF THE PRINCIPAL OF THE ENGINEERING COLLEGE.

- 1. He shall have power to accept or to refuse applications lor admission to the college and to rusticate, expel or otherwise punish students with the sanction of the Pro-Vice-Chancellor.
- 2. He shall have power to make all appointments of non-gazetted officers and the clerical staff of the second and their grades in the Engineering College.
- 3. He shall have power to grant all kinds of leave to non-gazetted officers whom he is empowered to appoint and to make acting arrangements therefor.
- 4. He shall have power to suspend or dismiss non-gazetted subordinates whom he is empowered to appoint.
- 5. He shall be the only official channel of communication between the University authorities and members of the staff of the Engineering College.

Note: -This will not imply denial of right to the Professors of the College of direct access to the Pro-Vice-Chancellor.

- 6. He shall be responsible for the control of expenditure by the college and for the proper maintenance of accounts. He shall have authority to spend all sums granted in the budget, and shall send the bills direct to the Accountant-General.
- 7. He shall enter into, alter and cancel contracts on behalf of the Engineering College.
- 8. He shall subject to the general control and supervision of the Pro-Vice-Chancellor be responsible for the internal organisation, control and discipline of the Engineering College.
- 9. He shall have control over the Library, Laboratories and Workshops of the Engineering College.

10. He shall draw up the time-table of the Engineering College and shall be responsible for the distribution of work

amongst the staff.

11. He shall allot all scholarships reserved for the students of the Engineering College and shall have authority to reduce temporarily the amount of a scholarship and if circumstances make it necessary to redistribute the scholarships.

12 He shall have the authority to grant casual leave to the gazetted officers of the Engineering College and to make tempo-

rary acting arrangements in their absence.

13. He shall be responsible for the control of the office of the Engineering College.

Part-time Lecturers.

Syed Alı Raza, B.A., B.Sc. (Hons.) (Manchester). (Irrigation). Mahmud Alam, B.A., B.Sc. (Manchester) (Railway Engineering). Wajahat Ali, B.Sc. (San Engineering).

K. M. Ansari, H.C.s. (Accounts & P.W.D. Procedure).

Syed Aziz Ali, A.R.I.B.S. (Architecture and Town Planning).

Rules of Admission, Etc.

Candidates seeking admission to the College for the B.E. Degree are required:—

(a) To be not under 18 or above 22 years of age.

(b) To produce a health certificate from a Gazetted Government Medical Officer of rank not below that of a Civil Surgeon, to the effect that the candidate is fit for out-door work of the Public Works Department and that he has had small-pox or has been vaccinated.

- (c) To have passed the Intermediate Examination of a recognised University taking the following subjects:—
 - (i) Mathematics.
 - (ii) Physics.
 - (iii) Chemistry.
 - (iv) English.
- (d) To produce testimonial of good character.
- (e) To sign a declaration form that he will observe the regulations of the University in the College.
- (f) To possess satisfactory knowledge of the Urdu language.

The number of students admitted yearly is limited to 20.

Preference will be given to subjects of the Hyderabad State, residents of Berar being considered subjects of His Exalted Highness the Nizam. The final selection will be made by the Principal of the College on the general capabilities of the applicants, who may, if necessary, hold a competitive examination for admission.

Applications should reach the Principal not later than 10th Amardad every year, on prescribed forms, which can be obtained from the Principal of the College.

After the commencement of the Session, students can only be admitted on special grounds, with the sanction of the Principal but no student will be admitted after the last day of Shahrewar.

Allendance and Conduct.

Students are required to attend with regularity the courses for which they have entered. In cases of absence, a written notice should be sent at once to the Principal, accompanied by a medical certificate in cases of illness likely to be prolonged.

Students arriving late for a lecture or laboratory class will not be registered as having attended.

Students who have not attended regularly or who have absented themselves without the permission of the Principal from the Terminal or Sessional Examination of any class will not be entitled to the certificate of attendence at that class. (Such certificates of attendance are required to admit a student for the Examinations of the University),

Trees.

The fee for registration for admission shall be Rs. 5 which will in no circumstances be refunded.

A registration fee of Rs. 10 shall be charged by the University for all students migrating to this University from other University.

- The tuition fee payable in advance by students while at the College shall be:--

Sessional rate Rs. 100.
Instalment rate (9) ... Rs. 12.

Students will have to provide their expenses for survey and other excursions.

A breakage deposit of Rs. 50 will have to be paid by each student at the time of joining College each Session.

The cost of any articles broken or damaged by any student and of repairing any damage to property, will be deducted from his breakage deposit, the balance of which will be returned one month after the close of the Session. Students will also be held liable for damage beyond the amount of the deposit and may also be held jointly responsible for the damage which is not traceable to any one individual.

Students who are exempted from any subject or subjects in the Part I Examination will have to pay the full examination Ice. All payments shall be made to the Registrar through the Principal, Engineering College.

A contribution of Rs. 12 per annum shall be made by each student to the College Athletic Club.

Every student must provide himself at his own cost with drawing instruments, drawing board, T. squares, etc. Surveying instruments will be supplied free of cost while at the College.

Lockers will be provided for the students in the drawing offices at a charge of Rs. 2 per Session. The locker key may be obtained on a deposit of Rs. 2 which will be refunded on return of the key.

Residence of students.

Students of the Engineering College desiring to live at any of the University Hostels should apply to the Pro-Vice-Chancellor, through the Principal, Engineering College.

Scholarships.

A limited number of scholarships will be offered every year to deserving students Particulars of scholarships may be obtained from the Principal of the College.

Exemptions.

Graduates in Physics may be exempted from attending the classes in that subject, and graduates in Mathematics may be exempted from attending the 1st year classes in Mathematics, but in all cases they will have to satisfy the examiners in their respective examinations.

Examinations.

College examinations will be held at the end of each term in the subjects taught during that term.

TRAINING COLLEGE.

Principal.

Muhammad Sajjad Mirza, M.A. (Cantab.), C.T. (London).

Readers.

- Malik Sardar Ali, B.A., B.T. (Psychology, Principles of Education and Child Education).
- Mir Ahmad Ali Khan, M.A. M.Ed. (Leeds) Bar.-at-Law, (History of Education, Comparative Education and Method of Teaching History).

Lecturer.

D. D. Shenderker, B.A., B.T., T.D., Ph.D. (London) (School Organization, Educational Tests and Teaching of Mathematics and Science.)

Part-time Lecturers.

Abdul Aziz, B.A. B.T., (Dacea), (Mathematics). Riazuddin Khan, B.A., B.T. (Alig.), (Geography). Latif Sayeed, M.B., Ch.B. (School Hygiene).

THE BUREAU OF TRANSLATION.

The Bureau of Translation which was opened in Aban 1326 Fasli with Maulvi Abdul Haq Sahib as Curator has so far taken n hand 384 books of which 226 have been published and the est are either in the Press or under revision and translation. Books on various subjects required by post-graduate students have also been translated.

The staff of the Bureau consists of one Curator (500—1,000), 12 Translators (250—400). The Department of Medical Translations consists of one Supervisor and 3 Translators (500) each. Besides the salaried staff a large number of works is being translated by outsiders on piece-work.

The following gentlemen are on the staff at present:—
Curator .. Muhammad Elias Burney, M.A., IL.B.
(Allahabad).

Supervisor of Medical II. Hyder Ali Khan, L. M. & s. (Bom.), F.R.C.S.E. (Edin.).

Translators:-

History and Political Sayyid Muhammad Ibrahim, M.A., M.O.L. Science Qazi Talammuz Husain, M.A. Philosophy .. Ehsan Ahmad, B.A. Mathematics .. Naziruddin, M.A. (Osmania). Economics .. Rashid Ahmad, B.A. Science .. Sardar Baldev Singh, B.A. Medicine .. Muhammad Osman Khan, L. M. & s. do .. Ghulam Dastagir, M.B., B.S. do .. Muhammad Husain, M.B., B.S.

THE DAIRAT-UL-MAARIF.

The Dairat-ul-Maarif was founded by the late Nawab Imadul Mulk Bahadur (Syed Husain Bilgrami, C.S.I.) and the late Mulla Abdul Qayyum Sahib in 1295 Fasli for the publication of rare books in Arabic. It commenced its work in 1299 Fasli with a grant of Rs. 500 per mensem from His Exalted Highness' Government. Subsequently in 1329 F., an endowment of one lac of rupees was made over to the Institution and in 1331 F., His Exalted Highness was graciously pleased to sanction an additional grant of Rupees four lacs and this total endowment of Rupees five lacs brings an annual income of Rs. 30,000.

The Institution was placed under the control of the University on the sad death of Nawah Imadul Mulk Bahadur on the 2nd Thir 1335 F. (24th Zikadah 1344 H.). Right Hon'ble Sir Akbar Hydari, Nawab Hydar Nawaz Jung Bahadur, P.C. Kt., LL.D., President, Executive Council, is now the Chairman of the Executive Committee with whom the management rests and Nawab Mahdi Yar Jung Bahadur Educational and Political Member is the Secretary. This Committee is helped by a literary Committee which assists it in selecting books for publication etc. The staff consists of a Superintendent and six Arabic scholars who edit the texts and correct proofs. They are helped in their work by the noted European Orientalist Mr. Krenkow, who secures for the Institution copies of rare books in the British Museum and other European libraries; besides correcting texts, reading proofs, etc. The total number of Arabic books published by this institution is 87 but some of them are in four to twelve volumes. Its publications are in great demand not only in India but in Egypt, Arabia, Aighanistan and Europe.

THE NIZAMIAH OBSERVATORY.

General.-The history of the Observatory dates from the time the late Nawab Zafar Jung Bahadur presented to the Government two fairly large telescopes, which he had originally purchased for his private use during his sojourn in Europe. When the matter of the bequest was before the Government. Right Hon'ble Sir A Hydari, Nawab Hydar Nawaz Jung Bahadur, F.C Kt., LL.D., the then Financial Secretary, now Council, in a long note on President. Executive gift and the importance the of subject, referred to opportunity that had been thus emphasised the unique Observatory establishment of an afforded for the Hyderabad, for the cultivation of the science of astronomy. This suggestion was adopted, and on H.H. the Nizam graciously sanctioning the scheme, it was decided to establish a fully equipped Observatory with the two telescopes as a nucleus. Mr. Chatwood was appointed Director in 1908 and soon after his arrival in Hyderabad, he selected a suitable site for the Observatory and promptly started the construction of the necessary additional buildings for the accommodation of the instruments and of a small workshop. The photographic equatorial was erected by the beginning of 1910 when the formal dedication of the Observatory took place. There was some delay in commencing regular work with this telescope as some of the parts had to be returned to England for necessary alterations and a suitable following telescope had to be constructed afresh. By the time Mr. Chatwood's term of office expired in March 1914, he had made a commencement with regular astronomical observations and had also given an efficient training to a small staff of assistants. Mr. Pocock succeeded to the Directorship and vigorously pushed on the astronomical work that the Observatory had undertaken, with the result that substantial progress was achieved in all branches under his direction. His death occurred in October 1918 and by that time two volumes of results were collected and published. In November 1919, the Observatory was transferred to the Osmania University and placed under the administrative control of the University Council.

Equipment.—The principal equipment of the Observatory consists of:—

- (1) An 8 inch photographic telescope with accessories.
- (2) A 15 inch visual telescope equatorially mounted (the erection of this instrument was carried on in 1922-28 under the supervision of the present Director).

- (3) A 2% inch Transit Instrument and a drum chronograph.
- (4) Three astronomical clocks and two chronometers.
- (5) A set of Electric Transmitting pendulums and dials to operate in connection with them.

To these have recently been added two Milne-Shaw Seismographs now temporarily erected in the basement room of the Astrographic Equatorial house.

Astronomical work .- At the time the Observatory was established, it was felt that whatever work is carried on at the institution should form part of a systematic plan and should possess considerable scientific value. Instead of diverting attention among a number of individual isolated researches, the policy of the Observatory had been to adopt a middle course, by carrying on, as a routine programme some outstanding piece of work, in which the co-operation of the institution would to some extent contribute to the general advancement of science at the same time without losing sight of the number of special investigations that arise having a bearing on the central subject. When the Observatory was ready to start on regular work it was recommended by the eminent astronomers, Sir David Gill, Prof. Turner and others, that this institution can advantageously cooperate in the great international undertaking entitled the "Carte du Ciel." As the Government was willing to accode to this recommendation, a section originally assigned to a South American Observatory, but neglected owing to some adverse circumstances was allotted to the Nizamiah Observatory. The region is now very nearly complete and the preliminary results of the whole section have been published.

With the Grubb Equatorial erected in 1923, a start has been made with the regular observation of a few variable stars, specially near their minima when observations with this telescope, on account of the larger light gathering power, are particularly valuable.

The Transit Instrument is employed for determining clock corrections systematically and when the necessary apparatus is acquired, it is proposed to control the time gun at Hyderabad by means of signals from the Observatory Standard Clock.

Daily records are obtained with the Seismograph since September 9, 1923. The results are forwarded to the International Seismological Association. Since 1929 September, daily observations of upper air conditions by means of pilot balloon flights have been included in the programme of work in co-operation with the India Meterological Department.

Publications.—The Hyderabad Astrographic Catalogue, Vols. I to VII forms the most important among the publications of the Observatory. Several short papers, now numbering about sixty dealing with matters of technical interest have been published in various periodicals.

Library.—A small working library is in course of formation and contains at present about 1,200 volumes. A part consists of publications of other observatories received as exchanges.

Staff.—The establishment consists of three assistants and nine computers, besides a clerk and a mechanic.

Mr. T. P. Bhaskaran, M.A., F.R.A.S., is the present Director..

17. RULES AND SUBJECTS FOR EXAMINATIONS.

FACULTY OF ARTS.

Matriculation Examination.

1. The Matriculation Examination shall be held once a year at Hyderabad, Aurangabad, Gulburga, Warangal and Bhopal at such time and on such dates as the Syndicate may prescribe.

2. The examination shall be open to:-

- (i) All those who have satisfactorily prosecuted a regular course of study for this examination at one or more High Schools recognised by the Osmania University. Such candidates shall be named pupil candidates.
- (11) All those who have studied privately either in the Dominions or outside for this examination, provided that they shall not have attended any high school recognised by the University for not less than six months prior to the date of the examination.
- (iii) All those who have passed the Maulvi or the Munshi Examination of His Exalted Highness the Nizam's Government, or of the Punjab University up to the year 1906. Such students will have to appear in English only and in the case of those who have passed in the Munshi Examination, in Islamic Theology or Morals also, on passing in which subject or subjects they will be considered to have passed in the whole of the examination.
- 3. No candidate shall be admitted to the Matriculation Examination unless he shall have completed the age of fifteen years by the first day of Shahrewar (July) of the year in which he applies for admission to the examination.
- 4. Applications for admission to the examination in the form prescribed must reach the Registrai not less than two months before the commencement of the examination, accompanied by a fee of Rs. 10 in the case of pupil candidates, Rs. 15 in the case of candidates referred to in Rule 2 (ii), and Rs. 5 in the case of candidates referred to in Rule 2 (iii).

- 5. Pupil candidates must submit the following certificates from the Head-master of the school where they last studied together with their application for admission:—
 - (1) Certificate of attendance stating that the student has attended school in the Matriculation class for not less than 75 per cent. of the working days during the school year immediately preceding the examination.
 - (2) Certificate of good character and good conduct at school.
 - (3) Certificate of age in accordance with Rule 3.
 - (4) Certificate of progress in the subjects of study.
 - When a student has studied in two or more schools during the school year immediately preceding the examination, his combined attendances in all schools attended by him during the period will be taken into account in determining his attendance.
- 6 Candidates referred to in Rule 2 (ii) must submit the following certificates from the Head-master of a Government ligh School recognised by this University:—
 - Certificate stating that the student has passed a Test Examination held in the schools to test the fitness of candidates appearing from that school for the Matriculation Examination.
 - (2) Certificate of good character.
 - (3) Certificate of age in accordance with Rule 3.
- 7. Candidates referred to in Rule 2 (iii) must, in addition to the original certificate showing the examination passed on the basis of which application is being made, submit the following certificates from the Head-master of a Government High School recognised by this University:—
 - (1) Certificate stating that the candidate has passed a Test Examination in English and Theology or Morals, held in the school to test the fitness of candidates appearing from that school for the Matriculation Examination.
 - (2) Certificate of good character.
 - (3) Certificate of age in accordance with Rule 3.
- N. B.—Teachers from the recognized schools of the University will be exempted from passing a test Examination provided they produce a certificate from the Divisional Inspector of Schools stating that the candidate is eligible for admission to the matriculation examination and that he is expected to get through.

- 8. Candidates who have once been duly permitted to appear at this examination are entitled to appear at any subsequent Matriculation Examination as private candidates under Rule 2 (ii) and (iii) on production of certificates (1) and (2) mentioned above.
- 9. On receipt of the application and the fee prescribed and the necessary certificates, the Registrar shall, at least a fortnight before the examination cause to be furnished to the candidate a receipt for the fee received, which will also serve as a ticket of admission to the examination hall to be produced by the candidate when called for.
- 10. A candidate who fails to pass or to present himself for the examination shall not be entitled to claim refund of the fee.
- 11. The Matriculation Examination shall be conducted by means of printed papers. Papers will be set and answered in Urdu with the following exceptions:—
 - 1. European Languages ... Ordinarily in English.
 - 2. Sanskrit, Prakrit or Pali.. In the language itself or in English or in Urdu.
 - 3. Modern Indian Vernacu- In the language itself or in lars.

 Urdu.

N.S.—In the case of these exceptions, the Registrar will six months before the date of the examination, notify the language in which the paper will be set, and candidates will be expected to answer in that same language unless by a previous arrangement with the Registrar, they have been permitted to answer in any of the alternative languages above specified.

12. The examination will be held in the following subjects:-

A. COMPULSORY.

- 1. English.
- 2. Urdu.
- 3. Elementary Mathematics.
- 4. Elementary Science.
- 5. Indian History and General Geography of the world.
- 6. Theology or Morals.

135

B. OPTIONAL.

One of the following subjects:-

- 1. A Classical Language.
- A Modern Language.
- 3. English History.
- 4 Algebra and Geometry.
- 5. Commerce.
- 6 Biology.
- 7. Domestic Science (for girls only).
 - N.B —Only those candidates will be admitted to the Intermediate Mathematics Classes, who have taken Algebra and Geometry as their optional subjects.

*C. SCHOOL SUBJECTS.

- 1. Drawing.
- 2. Physical Training.
- 3. Manual Training.

There will be no University examination in these subjects but the teaching will be Compulsory, and candidates will not be admitted to the Matriculation Examination unless they produce certificates of having satisfactorily completed courses of studies prescribed for these subjects.

There will be two papers in Psychology, each of three hours' duration:—

Paper I.—Problems and Methods of Psychology, Phsychological Organism and Nervous System, Sensation, Preception, Discrimination and Association, Attention, and Habit.

Paper II .- Rest of the subject.

GROUP B.

(1) Physics.

There will be two papers in Physics each of three hours' duration.

Paper I.—General Properties of Matter, Heat and Sound 75 marks.

Paper II.—Light, Electricity and Magnetism. 75 ,.

There will also be a Practical examination of three hours' duration for which 50 marks will be assigned.

(2) CHEMISTRY.

There will be two papers in Chemistry each of three hours' duration.

Paper I.—General Chemistry and Organic Chemistry 75 marks.

Paper II.—Metals and Non-Metals 75 ,,

There will aslo be a Practical examination of four hours' duration for which 50 marks will be assigned.

(3) Biology.

BOTANY.—Paper			 $2\frac{1}{2}$ hours	60
Paper	II.	Practical	 2 hours	40
Zoology.—Paper			 2½ hours	60
Paper	11.	Practical	2 hours	40

N.B.—In order to secure a pass the candidate shall have to obtain 33 per cent. of the full marks in the subject and a minimum of 20 per cent. in each of the branches, mz, Botany and Zoology.

(4) Mathematics—

There will be three papers in Mathematics each of three hours' duration and will be divided into two sections, a certain

minimum number of questions being compulsory from each section. Choice of questions to the extent of 40 percent. may be allowed.—

III. THEOLOGY OR MORALS.

There will be one paper of three hours' duration in this subject, carrying 100 marks.

- A B—Examinations in Theology or Morals shall be regarded as qualifying Examinations and the marks gained by a candidate in the subjects shall not be included in the grand total of the marks, but no student can go up for a higher examination unless he has qualified in Theology or Morals in the lower examination. Students who have once passed in Theology or Morals at an examination will not be examined in these subjects if they appear again at the Examination.
- 13. No candidate shall be declared to have passed the examination unless he obtains 33 per cent. of the full marks in each subject. Should a candidate, however, not obtain 33 per cent. of the full marks in one subject only, he shall be declared to have passed the examination, provided he secures not less than 30 per cent. in that subject and makes an aggregate of 40 per cent.
- 14. Those of the successful candidates who obtain 60 per cent. or more of the aggregate marks will be placed in the First Class, those obtaining 45 per cent. or more but less than 60 per cent. in the Second Class, and the others in the Third Class.

The names of successful candidates placed in the First Class shall be arranged in order of merit as determined by the total marks obtained by each candidate. The names of others placed in the Second and Third Classes shall be arranged in the serial order of their roll numbers.

- 15. A certificate signed by the Registrar shall be given to each successful candidate setting forth the date of the examination, the subjects in which he was examined and the class in which he was placed.
- 16. For the purposes of the Compartment System, the examination shall be divided into the following two groups:—

(1) English

(2) Optional subjects.

A candidate passing in any one of these groups shall be exempted from appearing in that group at a subsequent examination, provided that he has secured not less than 35 per cent. of the marks in the aggregate and that in the group in which he fails he makes an aggregate of not less than 25 per cent. But the candidate who so fails to pass in one group shall be allowed, if he so desires, to appear for the whole of a subsequent examination.

The results of candidates taking the option of appearing in the whole examination in a subsequent year, will be adjusted solely on the merits of the subsequent examination.

No candidate shall be classed unless he has passed in the

whole examination at one attempt.

Candidates who appear in a subsequent Examination in the group in which they failed in the previous examination, will be required to secure 33 per cent. of the marks in each subject of the group.

B. A. Examination.

- 1. The examination for the degree of Bachelor of Arts shall be held once a year in Hyderabad, at such time and on such dates as the Syndicate may prescribe.
 - 2. The examination shall be open to:-

(1) All students who have satisfactorily completed a regular course of study in a college of the University for not less than two academic years after passing the Intermediate Examination of the University or an examination or test accepted by the University as accepted by the University of the Univ

sity as equivalent thereto.

(2) Students who have satisfactorily prosecuted a regular course of study for the year immediately preceding the examination at a college of the University and who have been permitted, under Regulation 3 below, to reckon a previous year of study since passing the Intermediate Examination or its equivalent at a college of a University recognised for the purpose by the University.

- 3. - 4. Persons coming under the following descriptions. though not belonging to a college of the University, will be allowed to appear privately for this examination:—
 - (a) Inspecting Officers of the State Educational Department and whole-time teachers employed in Educational Institutions recognised by the University or by the Educational Department, provided they are certified by the Divisional Inspector of Schools to have rendered continuous and approved service for not less than three years previous to the date of their application for permission to appear at the Examination.
 - (b) Whole-time teachers employed in schools recognised by the Educational Department of Bhopal provided they are certified by the Director of Public Instruction, Bhopal to have rendered continuous and approved service for not less than three years previous to the date of their application for permission to appear at the Examination.

(c) Women candidates.

Provided also that in all the above cases, by the date of the examination, not less than two academic years shall have elapsed since the date of their passing the Intermediate Examination or its equivalent.

- 5. Candidates from a college of the University who have been allowed to appear at the examination once but have not been able to appear or have failed to pass may be admitted as private candidates to a subsequent examination, provided they do not change the subjects they had studied at college. In case they change any of their subjects they shall be required to put in fresh attendance in the college in the subject or subjects they have changed.
- 6. Private candidates shall not be allowed to take up any subject unless provision has been made for the teaching of that subject in the University College. They should therefore ascer-

tain, from the Registrar, before applying for permission, whether regular students of the University are taking up those subjects.

7. Applications of private candidates for admission to this examination, in the form prescribed must reach the Registrar not less than two months before the examination, accompanied by a fee of Rs. 30.

In the case of college candidates, applications for admission and certificates of attendance and progress in the prescribed form together with a fee of Rs. 30 for each candidate shall be forwarded by the Principal so as to reach the Registrar four weeks before the examination. In special cases the Principal may hold back the certificates of attendance. Such certificates must, however, reach the Registrar in no case later than three weeks before the examination.

No student of the University will be allowed to appear at the Examination unless he has attended at least 75 per cent. of the lectures delivered during the course of each year leading up to the examination in each of the subjects of study.

8. Upon the receipt of the application and the fees prescribed and also the attendance certificates in case of candidates from colleges, the Registrar shall at least a week before the examination, cause to be furnished to the candidate, a receipt for each fee received, which will also serve as a ticket of admission to the examination hall, to be produced by the candidate in the hall, if called for.

N.B —A candidate who fails to pass or to present himself for the examination shall not be entitled to claim refund of the admission fee

- 9. The B. A. Examinations shall be conducted by means of printed papers. Papers will be set and answered in Urdu with the following exceptions:—
 - (1) European Languages

Ordinarily in English.

(2) Sanskrit, Prakrit or Pali..

In the language itself, or in English or in Urdu.

- 1. Logic and Epistemology.
- 2. Aesthetics.
- 3. Philosophy of Religion.
- 4. Ethics and Political Philosophy.
- 5. Psychology.

FINAL EXAMINATION.:-

A Thesis of not less than 10,000 words on any subject of Philosophy previously approved of by the Board of Studies ... 200 marks.

Viva Voce:

(6) MATHEMATICS - (Nine papers).

1st Paper--Algebra, Theory of Equations Plane Trigonometry. Differential Equations.

2nd , Pure Geometry.
Analytical Geometry (Pure and Solid.)
Differential Geometry-Curves and Surfaces

3rd .. Calculus (Differential and Integral).

Theory of Functions of a real variable.

4th "Theory of Functions of a complex variable Elliptic Functions excluding. Functions
Fourier Series."

5th ,, Attractions.

Electricity and Magnetism.

6th , Analytical Statics of two and three dimensions Dynamics of a particle. Rigid Dynamics in two dimensions only.

7th ., Hydrostatics including Capilarity. Hydrostatics excluding Vortex Motion and Sound.

8th "Spherical Trigonometry.
Spherical Astronomy, Optics.

9th "... Problem and Essay paper consisting of two sections. In the first section at least two problems to be solved and in the other section not more than two essays to be written.

7. In order to pass the Examination, a candidate must obtain 40 per cent. of the marks in the aggregate. No minimum pass marks shall be required in each paper, but if in any paper a candidate obtains less than one-fifth of the marks allotted, those marks shall not be included in his aggregate. Successful candi-

dates obtaining not less than 65 per cent. of the total marks shall be placed in the First Class, those obtaining less than 65 per cent. but not less than 50 per cent. in the Second Class and the rest in the Third Class.

The results of the Previous Examinations will only be declared and will not be classified. The marks obtained by the candidates at the Previous Examination will be added to the marks gained by them at the Final Examination and the rank secured by them will be determined accordingly.

- 8. A candidate who fails to pass or to present himself for the examination for whatever reason shall not be entitled to claim a refund of the fee, but he may be admitted without further attendance at lectures to any subsequent examination on the payment of a like fee.
- 9. Each candidate successful at the Final Examination shall receive a certificate signed by the Chancellor setting forth the subject in which he was examined, and the class in which he was placed.

FACULTY OF SCIENCE.

B. Sc. Examination

- 1. The examination for the degree of Bachelor of Science shall be held once a year in Hyderabad, at such time and on such dates as the Syndicate may prescribe
 - 2. The examination shall be open to:-
- (a) All students who have satisfactorily completed a regular course of study in a College of the University for not less than two academic years after passing the Intermediate Examination of the Osmania University or an examination or test accepted by the University as equivalent thereto, with Physics and Chemistry as their optional subjects
- (b) Students who have satisfactorily prosecuted a regular course of study for the year immediately preceding the examination at a College of the Osmania University and who have been permitted under Regulation (3) below to reckon a previous year of study since passing the Intermediate Examination or its equivalent at a College of a University recognized for the purpose by the University.
- 3. Any student may be admitted to the final class of a College of the Osmania University provided he produces a certificate from the Principal of the College (affiliated to any of the Universities recognized by the University) he was last attending that the penultimate year of his degree course at College has been duly kept according to the regulations in force at the University from which he is migrating and that in the Principal's opinion he was fit for promotion to the final class of that College.
- 4. A candidate who has passed the B. Sc. Examination with a particular subject as his subsidiary shall be permitted to reappear for the B. Sc. Examination with the same subject as main provided that he has undergone the course of study prescribed for the subject (both theoretical and practical) by attending the College for a period of not less than one year. He shall be exempted from re-examination in the subsidiary subjects concerned.
- 5. Laboratory Assistants serving in a College of the University will be allowed to appear privately for this examination provided that they produce from the Principal of the College, in which they are or have been employed, the certificate of Laboratory work required under Regulation (15) and also a certificate

from the same authority of continuous and approved service for not less than three years previous to the date of their application for permission to appear at the examination. It is also necessary that by the date of the Examination not less than two academic years shall have elapsed since the date of their passing the Intermediate Examination or its equivalent.

- 6. Candidates from a college of the University who have been allowed to appear at the examination once but have not been able to appear or have failed to pass may be admitted as private candidates to a subsequent examination, provided that they do not change the subjects they had studied at College. In case they change any of their subjects they shall be required to put in fresh attendance in the College in the subject or subjects they have changed.
- 7. Applications of private candidates in the form prescribed must reach the Registrar not less than two months before the examination accompanied by a fee of Rs. 30.
- 8. In the case of College candidates application for admission and certificates of attendance and progress in the form prescribed together with a fee of Rs. 30 for each candidate shall be forwarded by the Principal so as to reach the Registrar four weeks before the examination.

In special cases the Principal may hold back the certificates of attendance. Such certificates must, however, reach the Registrar in no case later than three weeks before the examination.

- 9 No student of the University will be allowed to appear at the Examination unless he has attended at least 75 per cent. of the lectures delivered during the course of each year leading up to the Examination, in each of the subjects of his study, and that where practical work forms part of a subject of study, 75 per cent. attendance in practical classes also will be required.
- 10. Upon the receipt of the application and the fee prescribed, and also the attendance certificates in case of candidates from colleges, the Registrar shall at least a week before the examination cause to be furnished to the candidate a receipt for each fee received, which will also serve as a ticket of admission to the examination hall to be produced by the candidate in the hall if called for.

- 11. A candidate who fails to pass or to present himself for the examination shall not be entitled to claim refund of the ad mission fee
- 12. The B. St. Examination shall be conducted by means of printed papers. Papers in all the subjects except English will be set and answered in Urdu.
 - 13. The subjects for examination are as follows:--
 - I. English.
 - II. One of the following groups:
 - a. Physics as main with Mathematics and Chemistry as subsidiary.
 - b. Chemistry as main with Physics and Mathematics as subsidiary.
 - Mathematics as main with Physics and Chemistry as subsidiary.
 - d. Botany as main with Zoology and Chemistry as subsidiary.
 - Zoology as main with Botany and Chemistry as subsidiary.
 - Chemistry as main with Botany and Zoology as subsidiary.
 - III. Theology or Morals.
 - 14. The division of marks in the subjects is given below:--
 - I. English:-

Two papers as follows:--

1st Paper-

Essay ... 75 marks. Unseens ... 25 do 100

2nd Paper:-

Non-Detailed Texts ... 75 marks

Translation from Urdu into

English ... 30 do

N.R.—No condidate shall be admitted to the B. Sc. Examination unless the Head of the Department of English certifies that he has written at least 20 Essays during the two years of the B Sc. course. Failures who join the College will be required to write 10 Essays.

- N.B.—Examination in Theology of Morals shall be regarded as qualifying Examination and the marks gained by a candidate in the subjects shall not be included in the grand total of the marks, but no student can go up for a higher examination unless he has qualified in Theology or Morals in the lower examination. Students who have once passed in Theology or Morals at an examination will not be examined in these subjects if they appear again at that examination
 - (1) All the papers detailed above will be of three hours' duration
- 15. No candidate from a college of the University will be permitted to present himself at the B Sc. Examination in any Science subject for which a practical course is necessary under these rules unless he produces a certificate from the Principal of such college to the effect that he has completed the required course in the college laboratories. In the case of private candidates appearing under Regulation 4 evidence must be produced that the candidate has completed the required course in a laboratory approved of by the University.
- 16. No candidate shall be declared to have passed the examination unless he obtains 33 per cent. in each subject. In the main subjects in which a practical test is necessary the required percentage shall be 33 per cent. in the Theoretical Part of the examination as well as in the Practical test. In subsidiary subjects the pass percentage will be 33 per cent. on the whole including theoretical as well as practical test.
- 17. Those of the successful candidates who obtain 60 per cent or more of the aggregate marks will be placed in the First Class, those obtaining 45 per cent or more but less than 60 per cent. in the Second Class, and the others in the Third Class.

The names of successful candidates placed in the first class shall be arranged in order of merit as determined by the total marks obtained by each candidate. The names of others placed in the second and third classes shall be arranged in serial order of their roll numbers.

- 18. A certificate signed by the Chancellor shall be given to each successful candidate setting forth the date of the examination, the subjects in which he was examined and the class in which he was placed.
- 19. Any student who fails to pass the examination on account of his having failed to obtain 33 per cent. in English or in his selected subject, will be considered to have passed the whole examination, on his passing at a subsequent examination merely in the subject in which he has failed, provided that the marks gained by him in such subject in the previous examination do not fall short of 25 per cent. and provided in that examination he has secured an aggregate total of 40 per cent.

M. Sc. Examination.

- 1. An examination for the degree of Master of Science shall be held annually in Hyderabad at such time and on such dates as may be prescribed by the Syndicate
- 2. The M. Sc. Examination shall be conducted by means of printed papers and *viva voce* when necessary. Papers will be set and answered in Urdu unless otherwise notified.
- 3. The examination shall be open only to Bachelors of Arts and Bachelors of Science of the University or Bachelors of Arts or Bachelors of Science of a recognised University who have passed B A., or BSc Examination not less than two academic years previously and have since then prosecuted a regular course of study for not less than two academic years in a constituent college of the University.
- 4 The subject which a student studies for the examination must be one in which he has passed the B. A. or B. Sc. Examination at the University as a main subject or an Examination recognised as equivalent thereto by the Faculty of Science.
- 5. No student of the University will be allowed to appear at the Examination unless he has attended at least 75 per cent, of the lectures delivered during the course of each year leading up to the Examination, in each of the subjects of his study, and that where practical work forms part of a subject of study, 75 per cent, attendance in practical classes also will be required.
- 6. A candidate for admission to the M. Sc. Examination must forward his application to the Registrar five weeks before the examination accompanied by a fee of Rs. 60. Every candidate shall produce a certificate in the form hereinafter prescribed to the effect that he has prosecuted a regular course of study for the examination.
- 7. The examination shall be held for the present in the following subjects:—
 - 1. Chemistry.
 - 2. Physics.
 - 3. Zoology.
 - 1. Botany.

(1) Chemistry.

Previous Examination:—Lectures on advanced Inorganic, Organic, and Physical Chemistry, and advanced practical work. In lectures special attention will be paid to the applied side of the subject and its history. The practical work shall include

complex Inorganie Analysis (both qualitative and quantitative) preparation and indentification of Organic Compounds, a few exercises in Commercial Organic and Inorganic Analysis and Physico-Chemical Measurements.

An examination shall be held at the end of the 1st year which shall consist of the following papers:—

1st F	'aper	General and Inorganie Chemistry .		Marks 100
2nd	••	Organic Chemistry .		100
3rd	,,	Physical Chemistry .		200
4th	,,	Practical including mineral Analys.	'n٤	100
5th	,1	Organic Analysis and Organic Preparations	ો-	100
6th	٠,	Physico-Chemical Measurements .		100
		Total .		600

Final Examination.—In the Second or Final Year, the student shall choose either Organic Chemistry or Physical Chemistry as his special subject and attend advanced lectures on that subject. The rest of his time will be occupied in conducting some research work and reading about the subject of his research with the help of a Professor. At the end of the year, he shall be required to submit the results of his research in the form of a Thesis.

In addition to an Oral Examination in the subject of his Thesis, he shall appear in a written examination consisting of two papers only, in Organic or Inorganic Chemistry according to his choice. The marks for each will be as follows:—

Thesis, including Oral		 Marks. 200
1st Paper		 100
2nd "		 100
	Total	 400

(2) Physics.

Previous Examination.	
	Marks.
1st Paper General Physics and Sound	100
2nd ,, Optics (Geometrical and Physical)	100
3rd " Heat including Thermodynamics	100
4th " Practical Examination in properties of Matter, Heat and Sound	100
5th Practical Examination in Optics	100
	
Total	500

FINAL EXAMINATION.	
PINAL DANMINATION.	Marks.
1st Paper Classical Electricity and Magnetism	100
2nd " Modern Electricity	100
3rd " Some Special Subject—any one of the following:—	100
(a) Spectroscopy (Including Quantum Theory	r).
(b) X-Rays.	
(c) Wireless Telegraphy and Telephony.	
(d) Photo-Electricity and Television.4th Paper Practical Examination in Electricity	100
5th Paper Report on practical work intensively carried out by the candidate with a view to verify and supplement the	
available data on some special prob- lem of Physics.	100
Total	500

The Theoretical papers will be of three hours' and the Practical of four hours' duration.

(3) Zoology

PREVIOUS EXAMINATION.

The Examination shall be held at the end of the 1st year which will consist of the following papers:—

Theoretical—Non-Chordata.

There shall be three theoretical papers, each of three hours' duration and carrying 100 marks:—

Paper I—The structure, bionomics, development, and distribution of the following groups:—

Protozoa; Porifera; Mesozoa; Coelenterata; Platyhelmia; Nemertinea; Nemathelmia; Chaetognatha; Rotifera; Phoronidea; Sipunculiodea.

Paper II—The Structure, bionomics, development and distribution of the following groups:—

Polyzoa: Brachiopoda; Annelida; Echinodermata; Arthropoda; and Mollusca.

Paper III—Essays on one or more of a number of subjects pertaining to Non-Chordata.

Practical: -Non-Chordata.

There shall be two practical papers, each of four hours' duration and each carrying 100 marks. Candidates will be required to show a detailed knowledge of the microscopic technique and to examine, dissect or describe the animals and skeletons given in Appendix. In addition to these specimens mentioned above candidates are expected to study as many other types as could be available from time to time. Candidates must produce at their practical examination their bonafide preparations (at least 50 permanent slides) and sketch-books containing a complete record of the laboratory work signed and certified by the professor for which 10 marks will be reserved for each practical paper.

FINAL EXAMINATION:-

In the 2nd year or the Final Examination candidates will be allowed to take up one of the following *Group courses* subject to the approval of the Professor of Zoology:—

(A) Chordala and General Biology Group Theoretical.—

There will be three theoretical papers, each of three hours, duration and carrying 100 marks.—

Paper I—The comparative Anatomy, Embryology, and Distribution in time and space of the following.—

> Henrehordata, Cephalochordata Urochordata; Cyclostomata, Piscos; and Amphibia.

Paper II—The comparative Anatomy, Embroyology and Distribution in time and space of the following:—

Reptilia, Aves and Mammalia

Paper 111—The General Principles of Biology, including Evolution, Heredity and Sex, Variation, History of Biology, Cytology, Geographical and Geological Distribution of Animals.

Practical:—Chordata Groups.

There will be two practical papers, each of 4 hours' duration and carrying 100 marks.

- (a) Acrania.
- (b) Craniata and Microtomy.

or (B) Thesis Group :---

There will be two theoretical and one practical paper carrying 100 marks each and a thesis including *viva voce* carrying 200 marks.

- Paper I—Based on the special subject-matter of the thesis and allied topics.
- Paper II—The General Principles of Biology, including Evolution, Heredity and Sex, Variation, History of Biology, Cytology, Geographical and Geological Distribution of Animals.
- Paper III—Practical, on the subject matter of the thesis (including Practical records and Microtomy).

Thesis including Viva-Voce.

N.B.-10 per cent. of marks are reserved for the practical records.

or (C) Special Group.

An intensive study of a special group:

- (1) Pisces or
- (2) Reptilia

Theoretical-

There will be three theoretical papers, each of three hours' duration and carrying 100 marks:—

Paper I—Based on the local fauna of Hyderabad with reference to the special group selected by the candidate.

Paper II—A general paper based on the special group.

Paper III—General Principles of Biology, including Evolution, Heredity and Sex, Variation, History of Biology, Cytology, Geographical and Geological Distribution of Animals.

Practical-

There will be two papers of 4 hours' duration and each carrying 100 marks.

NB —Candidates will be expected to acquaint themselves with the current literature pertaining to the special group or the thesis selected by them

The study of one of the Special groups mentioned above should be made with special reference to the practical aspect of the local fauna of Hyderabad (Deccan), and must be dealt with, as far as possible, from the standpoint of its economic importance.

A fairly good practical knowledge of the special group selected by the candidate is to be required, including a record of all the preparations and mounts, technique and fundamentals of research methods, together with an account of the identification of entire specimens belonging to the local fauna as well as to any other special type concerning the particular study. Microtomy (simple section-cutting methods). 10 per cent. marks will be reserved for the practical records.

(4) Botany .-

PREVIOUS:-

The courses for Previous and Final may alternate from year to year.

(Cryptogams and Gymnosperms.)

There shall be three Theoretical and two Practical papers carrying 100 marks each, the Theoretical paper will be of 3 hours' and the Practical of 4 hours' duration.

Paper I .- Thallophyta:-

- (a) Flagellata, Bacteria, Diatoms.
- (b) Cyanophyceae, Chloraphyceae, Phaeophyceae, Rhodophyceae.
- (c) (i) Phycomycetes.—
 - (a) Comycetes.
 - (b) Zygomycetes.
 - (ii) Eumycetes .-
 - (a) Ascomycetes.
 - (2) Basidiomycetes.

Paper II.—Bryophyta and Picridophyta:—

- (a) Bryophyta.-
 - (i) Hepaticeae.
 - (ii) Musci.
- (h) Pteridophyta.

Paper III.—Gymnosperms and General Histology.

Paper IV.—Practical—Thallophyta and Bryophyta.

Paper V.—Practical—Pterioophyta and Gymnosperms.

N.B.—Candidates will be expected to produce at least 50 permanent preparations and a complete record of their practical work.

FINAL:-

(COURSE,—A)

There shall be three Theoretical and two Practical papers carrying 100 marks each. The Theoretical paper will be of 3 hours' and the Practical of 4 hours' duration.

Paper I.—General Biology:-

Variation, Heredity, Evolution and Mendelism.

Paper II :--Angiosperms :--

The systematic morphology, affinities and geographical distribution of the Angiosperms, with special reference to the Indian Flora.

177

Paper III.—Physiology and Scology:—

The general principles of plant Physiology and Ecology.

Paper IV.—Practical—Systematic (Angiosperms).

Paper V.-Practical-Physiology and Microtomy.

N.B.—Candidates will be required to show a good knowledge of microscopic and inicrotome technique, to examine and describe the plants and families given in Appendix, to produce at least 50 permanent preparations and a complete record of their practical work.

(COURSE.-B)

With special group and thesis.—

The special group and the problem for the thesis shall be chosen subject to the approval of the Head of the Department of Botany.

*Special Groups :--

- (i) Systematic-Angiosperms.
- (ii) Ecology.

Candidates will be expected to acquaint themselves with the current literature pertaining to the special group and the subject of the thesis selected by them.

The study of the special group should be made with reference to the local flora of Hyderabad, and must be dealt with, as far as possible, from the stand point of its economic and medicinal importance.

In the case of candidates offering thesis there will be two papers and a practical test (including viva voce) as follows:—

Paper I.—One of the Special groups—A theoretical paper based on the special group .. 100

Paper II.—General Biology—same as that prescribed for course "A" mentioned above . . 100

A thesis based on the special subject .. 200

The practical examination on the subject of the thesis will carry 100 marks only.

*To start with the above two groups are kept; addition will be made later.

Practical Examination:— A fairly good practical knowledge of the special group, that of the subject of the thesis and Microtomy (Simple section—cutting methods) is required,

8. In order to pass the Examination, a candidate must obtain 40 per cent. of the marks in the aggregate. No minimum pass marks shall be required in each paper, but that candidates should pass separately in the Theoretical and Practical portions of the Examination and if in any paper a candidate obtains less than 25 per cent, of the marks allotted, he will be deemed to have failed. Successful candidates obtaining not less than 65 per cent, of the total marks shall be placed in the First Class, those obtaining less than 65 per cent, but not less than 50 per cent, in the Second Class and the rest in the Third Class.

The results of the Previous Examinations will only be declared and will not be classified. The marks obtained by the candidates at the Previous Examinations will be added to the marks gained by them at the Final Examination and the rank secured by them will be determined accordingly.

- 9. A candidate who fails to pass or to present himself for the examination for whatever reason shall not be entitled to claim a refund of the fee.
- 10. Each successful candidate at the Final Examination shall receive a certificate signed by the Chancellor setting forth the subject in which he was examined, and the class in which he was placed.

FACTLY OF THEOLOGY.

Mulriculation Examination.

- 1. The Matriculation Examination shall be held once a year at Hyderabad, Aurangabad, Gulburga, Warangal and Bhopal, at such time and on such dates as the Syndicate may prescribe.
 - 2. The examination shall be open to:-
 - All those who have satisfactorily prosecuted a regular course of study for this examination at one or more High Schools recognised by the Osmania University. Such candidates shall be named pupil candidates.
 - (ii) All those who have studied privately either in the Dominions or outside for this examination provided that they shall not have attended and High School recognised by the University for not less than six months prior to the date of the examination.

- (iii) All those who have passed the Maulvi Examination of His Exalted Highness the Nizam's Dominions or of the Punjab University up to the year 1906. Such students will have to appear in English only on passing in which subject they will be considered to have passed in the whole of the examination.
- (iv) All those who have passed the Maulvi Examination of Madrasai Nizamiah. These will appear in English only, and shall be admitted to the First Year Class in Theology on passing in that subject.
- 3. No candidate shall be admitted to the Matriculation Examination unless he shall have completed the age of fifteen years by the first day of Shahrewar (July) of the year in which he applies for admission to the examination.
- 4. Applications for admission to the examination in the form prescribed must reach the Registrar not less than two months before the commencement of the examination, accompanied by a fee of Rs. 10 in the case of pupil candidates, Rs. 15 in the case of candidates referred to in Rule 2 (ii), and Rs. 5 in the case of candidates referred to in Rule 2 (iii) and (iv).
- 5. Pupil candidates must submit the following certificates from the Headmaster of the school where they last studied together with their application for admission:—
 - (1) Certificate of attendance stating that the student has attended school in the Matriculation class for not less than 75 per cent. of the working days during the school year immediately preceding the examination.
 - (2) Certificate of good character and good conduct at school.
 - (3) Certificate of age in accordance with Rule 3.
 - (4) Certificate of progress in the subjects of study.
 - When a student has studied in two or more schools during the school year immediately preceding the examination, his combined attendances in all schools attended by him during the period will be taken into account in determining his attendance.
- 6. Candidates referred to in Rule 2 (ii) must submit the following certificates from the Headmaster of a Government High School recognised by this University.

- (1) Certificate stating that the student has passed a Test Examination held in the School to test the fitness of candidates appearing from that school for the Matriculation Examination.
- (2) Certificate of good character.
- (3) Certificate of age in accordance with Rule 3.
- 7. Candidates referred to in Rule 2 (iii) and (iv) must, in addition to the original certificates showing the examination passed on the basis of which application is being made, submit the following certificates from the Headmaster of a Government High School recognised by this University.
 - (1) ('ertificate stating that the candidate has passed a Test Examination in English, held in the school to test the fitness of candidates appearing from that school for the Matriculation Examination.
 - (2) Certificate of good character.
 - (3) Certificate of age in accordance with Rule 3.
- 8. Teachers from recognised schools of the University will be exempted from passing a test examination provided they produce a certificate from the Divisional Inspector of Schools stating that the candidate is eligible for admission to the matriculation examination and that he is expected to get through.
- 9. Candidates who have once been duly permitted to appear at this examination are entitled to appear at any subsequent Matriculation Examination as private candidates under Rule 2 (ii), (iii) and (iv) on production only of Certificates (1) and (2) mentioned above.
- 10. On receipt of the application and the fee prescribed and of the necessary certificates, the Registrar shall at least a fortnight before the examination, cause to be furnished to the candidate a receipt for the fee received which will also save as a ticket of admission to the examination hall to be produced by the candidate when called for.
- A candidate who fails to pass or to present himself for the examination shall not be entitled to claim refund of the fee.
- 11. The Matriculation Examination shall be conducted by means of printed papers. With the exception of English the papers in all other subjects will be set and answered in Urdu.
- 12. The subjects for the examination and the arrangement of the papers to be set in the different subjects shall be as fol-

lows:-

(1) English.

There shall be two papers in English each of 2½ hours' duration. The first paper (100 marks) will be on the Detailed Texts, Grammar and Idiom. The second paper (100 marks) will be on Composition and Translation from Urdu into English (70 marks) and Non-Detailed Texts (30 marks).

(2) HISTORY AND GEOGRAPHY.

There shall be two papers of two hours' duration each in this subject:—

1st Paper—History of India (50 marks).

2nd Paper—General Geography of the world with special reference to India (50 marks).

(3) MATHEMATICS—(Elementary).

There will be two papers of 2 hours' duration each.

I Paper—Arithmetic	 30	Marks
Λ lgebra	 20	12
II Paper—Practical Geometry	30	••
Mensuration	20	

"(4) ELEMENTARY SCIENCE:-

There will be one paper of 3 hours' duration carrying 100 marks. The paper shall be divided into sections A (Physics) and B (Chemistry): 50 marks will be assigned to each section.

'Candidates are expected to perform at least 10 experiments in a year and have a record of their practical work regularly initialled by the teacher in charge No candidate shall be allowed to appear for the Examination unless he has produced a full record of his practical work. But there shall be no examination in practical science.

(5) ARABIC.

There will be two papers in this subject (of two hours each); the first paper (60 marks) will be on the prescribed text-books and the second paper (40 marks) will be on Grammar and Translation.

(6) AQAID.

There shall be one paper (100 marks) of three hours' duration in this subject.

(7) Figan.

There will be one paper (100 marks) of three hours' duration in this subject.

- 13. Successful candidates who obtain 60 per cent. of the aggregate marks shall be placed in the First Class
- 14. For a pass in the Second Class candidates should secure 35 per cent. in English, Arabic, Fiqah and Aqaid and 30 per cent. in the remaining subjects. Those candidates will be declared to have passed in Third Class, who secure 30 per cent. in English, Arabic, Fiqah and Aqaid, 25 per cent. in the remaining subjects and 30 per cent in the aggregate.

Successful candidates of First Class shall be arranged in order of proficiency as determined by the total number of marks obtained. The Second and Third Classes shall be arranged in the serial order of their roll numbers.

- 15. Candidates passing the examination in 3rd class and wishing to secure a higher class will be allowed to appear at the Examination; and if they tail to pass the Examination their failure will not affect their previous success
- 16. If a candidate fails to pass in the examination, he may reappear at any subsequent examination or examinations in those subjects only in which he has failed to secure 30 per cent. marks. He will be declared to have passed the examination under the compartment system if he secures 30 per cent. marks in each subject, but such a candidate will not be eligible for admission to the University and will be exempted from appearing at the test examination.

Lady candidates under this system will however be admitted to the University up till 1347 F.

- 17. Failed candidates taking the option of joining the school to complete the examination will have to satisfy the Rules of School such as attendance and passing the test Examination etc.
- 18. A certificate signed by the Registrar shall be given to each successful candidate setting forth the date of the examination, the subjects in which he was examined and the division in which he was placed.
- 19. The Registrar shall maintain and publish for general information, a list of High Schools recognised by the University,

Intermediate Examination.

1. The Intermediate examination shall be deld once a year in Hyderabad, at such time and on such dates as the Syndicate may prescribe.

2. The examination shall be open to—

- (i) All Matriculated students of the Osmania University (Faculty of Theology) who have since Matriculation prosecuted for not less than two academic years a prescribed course of study at a college of the Osmania University.
- (ii) All those students who have matriculated at the Osmania University (Faculty of Arts) or at any of the recognised Indian Universities or obtained the High School Leaving Certificate of His Exalted Highness' Government or passed any other such examination as the University may from time to time consider equivalent, and who have been admitted as under-graduates of the University (Faculty of Theology) and have since Matriculation prosecuted for not less than two academic years a prescribed course of study at a College of the Osmania University. Provided that all such students shall have passed in Arabic in the Matriculation Examination or in its equivalent exa-

mination.

Students who have obtained a High School Leaving Certificate of His Exalted Highness' Government can be admitted to a college of the Osmania University only at the discretion of the Principal.

3. Persons coming under the following descriptions, though not belonging to a college of the University, will be allowed to

appear privately for this examination :-

- (a) Inspecting Officers of the State Educational Department, and whole-time teachers employed in educational institutions recognised by the University or by the Educational Department provided they are certified by the Divisional Inspectors of Schools to have rendered continuous and approved service for not less than three years previous to the date of their application for permission to appear at the examination.
- (b) Teachers of schools recognised by the Educational Department of Bhopal provided they are certified by the Director of Public Instruction Bhopal of having rendered three years continued and approved service.
- (c) Women candidates.

Provided also that in all the above cases, by the date of the examination, not less than two academic years shall have elapsed since the date of their passing the Matriculation Examination or its equivalent.

- NB—Students who have passed the Intermediate Examination (Faculty of Arts) of the Osmania University or that of a recognised University shall be allowed appear privately at the Intermediate Examination of the Faculty of Theology only in the subjects in which they have not already passed, for the purpose of their joining the BA Class of the Faculty of Theology of the Osmania University. But such students, shall not be entitled to any certificate of having passed the examination.
- 4. Candidates from a college of the University, who have been allowed to appear at the examination once but have not been able to appear or have failed to pass, may be admitted as private candidates to a subsequent examination.
- 5. Applications of private candidates for admission to this examination, in the form prescribed must reach the Registrar not less than two months before the examination, accompanied by a fee of Rs. 20.
- 6. Private candidates shall not be allowed to take up any subject unless provision has been made for the teaching of the subject in the University College. They should ,therefore, ascertain from the Registrar before applying for permision whether regular students of the University are taking up these subjects.
- 7. In the case of college candidates, applications for admission and certificates of attendance in the prescribed form together with a fee of Rs. 20 for each candidate shall be forwarded by the Principal so as to reach the Registrar four weeks before the examination. In special cases the Principal may hold back the certificates of attendance. Such certificates must, however, reach the Registrar in no case later than three weeks before the examination
- 8. No student of the University will be allowed to appear at the examination unless he has attended at least 75 per cent. of the course of lectures delivered during the course of each year leading up to the Examination in each of the subject of his study.
- 9. Upon the reciept of the application and the fee prescribed and also the attendance and progress certificates in case of candidates from colleges, the Registrar shall at least a week before the examination, cause to be furnished to the candidate a receipt for each fee received, which will also serve as a ticket of admission to the examination hall, to be produced by the candidate in the hall, if called for.

- 10. A candidate who fails to pass or to present himself for the examination shall not be entitled to claim a refund of the admission fee.
- 11. The Intermediate Examination shall be conducted by means of printed papers. With the exception of the English language, papers in all subjects will be set and answered in Upda
- 12. The subjects for examination and the arrangement of the papers to be set in the different subjects shall be as follows:—-
 - (1) English.

In English there will be three papers, each of three hours' duration, one on Detailed Prose texts (100 marks), one on Poetry (65 marks) and Non-detailed Prose texts (35 marks) and a third paper (100 marks) on Composition, Unseens and Translation.

(2) ARABIC.

There shall be two papers each of 3 hours' duration in this subject. The first paper (100 marks) shall be on the prescribed text-books. The division of marks in Arabic second paper will be as follows and questions on non-detailed texts will be in this paper:—

Grammar ... 40 Marks.

Translation from Arabic into Urdu 30 ,, Translation from Urdu into Arabic 30 ...

(3) Figah and Usul-I-Figah.

There shall be two papers each of three hours' duration in this subject:—

Paper I.—Usul-i-Fiqah including Elements of Logic 100 marks

Paper II.—Fiqah. 100 ,

(4) TAFSIR, AND HADIS.

There shall be two papers each of three hours' duration in this subject:—

Paper I.—Tafsir. 100 marks. Paper II.—Hadis and Usul-i-Hadis 100 ,,

- (5) AQAID, INCLUDING MABADI-I-HIKMAT.

 There shall be one paper (100 marks) of three hours' duration in this subject.
- 13. No candidate shall be declared to have passed the examination unless he obtains 33 per cent. of the full marks in each subject. Should a candidate however, not obtain 33 per cent. of the full marks in one subject only, he shall be declared to have passed the examination provided he secures not less than 30 per cent, in that subject and makes an aggregate of 40 per cent.

14. Those of the successful candidates who obtain 60 per cent. or more of the aggregate marks will be placed in the First Class, those obtaining 45 per cent. or more but less than 60 per cent. in the Second Class, and the others in the Third Class.

The names of successful candidates placed in the First Class shall be arranged in order of merit as determined by the total marks obtained by each candidate. The names of others placed in the Second class and Third classes shall be arranged in the serial order of their roll numbers.

- 15. A certificate signed by the Registrar shall be given to each successful candidate setting forth the date of the examination, the subjects in which he was examined and the class in which he was placed.
- 16. For the purposes of the Compartment System, the examination is divided into the following three groups:—
 - (1) English.
 - (2) Arabie.
 - (3) Theology subjects (Figha, Tassir, and Aqaid).

A candidate passing in any one of these groups shall be exempted from appearing in that group at a subsequent examination provided that he has secured not less than 35 per cent of the marks in the aggregate and that in the group in which he fails he makes an aggregate of not less than 25 per cent. Such candidates shall however, if they so desire, be allowed to appear for the whole of a subsequent examination, but if they fail in that examination they will not be deprived of the concession gained at the first examination.

No candidate shall be classed unless he has passed in the whole examination at one attempt.

B. A. Examination.

- 1. The examination for the degree of Bachelor of Arts shall be held once a year in Hyderabad at such time and on such dates as the Syndicate may perscribe.
 - 2. The examination shall be open to:-
 - (1) All those students who have passed the Intermediate Examination of the Osmania University in the Faculty of Theology.
 - (2) All those students who besides passing the Intermediate Examination of a recognised University have also passed the *Alim* Examination or its equivalent of a recognised University.

(3) All those students who after passing the Intermediate Examination of a recognised University with Arabic as one of the optional subjects have passed the Intermediate Examination (Faculty of Theology) of the University in the Theology subjects. They will be required to appear in Arabic also in case they did not take that subject in their previous examination.

Provided that all these students have satisfactorily completed a regular course of study in a college of the University for not less than two academic years after passing the aforesaid examinations.

- 3. Persons coming under the following descriptions, though not belonging to a college of the University, will be allowed to appear privately for this examination:—
 - (a) Inspecting Officers of the State Educational Department, and whole-time teachers employed in educational institutions recognised by the University or by the Educational Department, provided they are certified by the Divisional Inspector of Schools to have rendered continuous and approved service for not less than three years previous to the date of their application for permission to appear at the examination.
 - (b) Whole-time teachers employed in schools recognised by the Educational Department of Bhopal, provided they are certified by the Director of Public Instruction Bhopal to have rendered continuous and approved service for not less than three years previous to the date of their application for permission to appear at the examination.
 - (c) Women candidates.

Provided also that in all the above cases, by the date of the examination, not less than two academic years shall have elapsed since the date of their passing the Intermediate Examination.

Students who have passed the Intermediate Examination (Faculty of Arts) of the Osmania University or that of a recognised University shall be allowed to appear privately at the Intermediate Examination of the Faculty of Theology only in the subjects in which they have not already passed, for the purpose of their joining the B. A. Class of the Faculty of Theology of the Osmania University. But such students shall not be entitled to any certificate of having passed the Examination,

- 4. Candidates from a college of the University who have been allowed to appear at the examination once but have not been able to appear or have failed to pass may be admitted as private candidates to a subsequent examination, provided they do not change the subjects they had studied at college. In the case of any change they shall be required to put in fresh attendance in the college in the subject they have changed.
- 5. Private candidates shall not be allowed to take up any subject unless provision has been made for the teaching of the subject in the University college. They should, therefore, ascertain from the Registrar before applying for permission whether regular students of the University are taking up these subjects.
- 6 Applications of private candidates for admission to this examination in the form prescribed must reach the Registrar not less than two months before the examination, accompanied by a fee of Rs. 30.
- 7. In the case of college candidates, applications for admission and certificates of attendance and progress in the prescribed form together with a tee of Rs. 30 for each candidate shall be forwarded by the Principal so as to reach the Registrar four weeks before the examination. In special cases the Principal may hold back the certificates of attendance. Such certificates must, however, reach the Registrar in no case later than three weeks before the examination.
- 8. No student of the University will be allowed to appear at the Examination unles he has attended at least 75 per cent. of the lectures delivered, during the course of each year leading up to the examination in each of the subjects of his study.
- 9. Upon the receipt of the applications and the fee prescribed, and also the attendance certificates in case of candidates from colleges, the Registrar shall at least a week before the examination, cause to be furnished to the candidate a receipt for each fee received, which will also serve as a ticket of admission to the examination hall, to be produced by the candidate in the hall, if called for.
- 10. A candidate who fails to pass or to present himself for the examination shall not be entitled to claim a refund of the admission fee.
- 11. The B. A. Examination shall be conducted by means of printed papers. With the exception of English, papers in all subjects will be set and answered in Urdu.

- 12. The subjects for examination are as follows:--
- (1) ENGLISH:--

Four papers as follows:-

1st Paper.		Mark	az
Detailed Prose History of Literature	. 80 . 20))	100
2nd Paper.			
Detailed Poetry	. 80)	100
	20)]	100
3rd Paper.			
Essay	. 75	<u> </u>	100
	25	5 J	100
4th Paper.		_	
Non-Detailed Texts Translation from Urdu into Englis	. 70)]	400
Translation from Urdu into Englis	sh 30))	100

N.B.—Questions on the History of Literature will be compulsory. No candidate shall be admitted to the B. A. examination unless the Head of the Department of English certifies that he has written at least 20 essays during the two years' B. A. course. This certificate will not be required in the case of private candidates. Failures who join the College will be required to write 10 essays.

(2) ARABIU---

There will be three papers in this subject:—
The first paper will be on Prose (75 marks) and History of Literature (25 marks); the second paper will be on Poctry (75 marks) and Rhetoric and Prosody (25 marks) and the third paper will be as follows:—
Translation from Arabic into Urdu ... 40 marks
Translation from Urdu into Arabic ... 40 ,,
Grammar ... 20 ...

(3) FIGAH AND USUL-I-FIGAH.

There shall be two papers of three hours' duration each in this subject:—

1st Paper—Fiqah (including Fatwa Navisi) 100 marks.

2nd Paper Usul-i-Fiqah.

- (4) Any one of the following subjects:-
 - (a) Taisir.—two papers (100 marks each.)
 - (b) Hadis.—two papers (100 marks each).
 - (c) Kalam.—two papers (100 marks each).

- 13. No candidate shall be declared to have passed the examination unless he obtains 33 per cent. in each subject.
- 14. Those of the successful candidates who obtain 60 per cent. or more of the aggregate marks will be placed in the First Class, those obtaining 45 per cent. or more but less than 60 per cent. in the Second Class, and the others in the Third Class.

The names of successful candidates placed in the First Class shall be arranged in order of merit as determined by the total marks obtained by each candidate. The names of others placed in the Second and Third Classes shall be arranged in serial order of their roll numbers.

- 15. A certificate signed by the Chancellor shall be given to each successful candidate setting forth the date of the examination, the subjects in which he was examined and the class in which he was placed.
- 16. Any student who fails to pass the examination on account of his having failed to obtain 33 per cent in—
 - (1) English(2) Arabic
 - (3) Figah and the optional subject

will be considered to have passed the whole examination on his passing at a subsequent examination merely in the subject in which he has failed, provided that the marks obtained by him in such subject in the previous examination do not fall short of 25 per cent, and provided in that examination he has secured an aggregate total of 40 per cent.

M. A. Examination.

- 1. An examination for the degree of Master of Arts shall be held annually in Hyderabad at such time and on such dates as may be prescribed by the Syndicate.
- 2. The M. A. Examination shall be conducted by means of printed papers and viva voce when necessary. Papers will be set and answered in Urdu.
- 3 The Examination shall be open only to Bachelor of Arts (Faculty of Theology) of the Osmania University, who have passed the B. A. Examination not less than two academic years previously and have since then prosecuted a regular course of study for not less than two academic years in a constituent college of the Osmania University.

- 14. The fourth or final professional examination shall be held in the following subjects after a course of study extending over 1½ academic year after passing the third professional examination:—
 - Group (1) Medicine and Clinical Medicine.

Midwifery, Gynacology, and Diseases of Infancy.

Group (2) Surgery and Clinical Surgery

Opthalmology and diseases of Ear, Nose and Throat.

- 15. Candidates shall be required to produce the following certificates along with their application for permission to appear at the examination:
 - (a) Certificate of having passed the third professional examination.
 - (b) Certificate in the prescribed form of having attended during the academic year: —
 - (i) two courses in Medicine of not less than 100 lectures each.
 - (ii) two courses in Clinical Medicine of not less than 50 lectures each.
 - (iii) one course in Midwifery of not less than 30 lectures.
 - (iv) one course in Gynecology and diseases of Infancy of not less than 40 lectures.
 - (v) two courses in Surgery of not less than 100 lectures each.
 - (vi) two courses in (linical Surgery of not less than 50 lectures each.
 - (vii) one course in Operative Surgery of not less than 15 meetings of two hours each.
 - (viii) a course in Applied Anatomy (Medical & Surgical) of not less than 30 lectures.
 - (ix) an infectious diseases Hospital for three months.
 - (x) not less than twenty Midwifery cases and conducted not less than twenty.
 - (xi) in Medical Wards as a Clinical Clerk for 9 months.
 - (xii) in Surgical Wards as a Clinical Clerk for 9 months. (xiii) in the Out-Patients Department for 6 months
 - (xiv) a course of not less than 30 lectures (with Clinical Instruction) in Opthalmology, and a similar course and clinical instruction in the diseases of Ear, Nose and Throat.
 - (c) Certificate of having land instruction in administering ansesthetics.

FACULTY OF ENGINEERING.

B. E. Examination

- 1. The examination for the degree of Bachelor of Engineering shall be held once a year in Hyderabad at such time and on such date as the Syndicate may prescribe
- 2. The examination shall be open to students who have passed the Intermediate Examination of this University or of a recognized University with Mathematics, Physics and Chemistry as their optional subjects.
- 3. The course of instruction shall extend over four years, of which 3 years shall be spent in the College and the fourth year chiefly on works. University Examinations will be held at the end of the 2nd and the 3rd years and will be known as Part I and Part II examinations. Part II examination will be the final test for the Degree.
- 4. Applications for admission and certificates of attendance and progress in the prescribed form together with a fee of Rs. 20 for the Part I examination and of Rs. 30 for the Part II examination shall be forwarded by the Principal so as to reach the Registrar four weeks before the examination.

No student will be allowed to appear at the examination unless he has attended at least 75 per cent. of the lectures delivered during the course of each year leading up to the examination in each of the subjects of his study; and that where practical work form part of a subject of study, 75 per cent. attendance in practical classes also will be required.

- 5. Upon the receipt of the applications, the attendance certificates and the fee prescribed the Registrar shall, at least a week before the examination, cause to be furnished to the candidate a receipt for each fee received which will also serve as a ticket of admission to the examination hall to be produced by the candidate in the hall, if called for.
- V.B.—A candidate who fails to pass or to present himself for the examination shall not be entitled to claim refund of the admission fee.
- 6. The B. E. examinations shall be conducted by means of printed papers and papers will be set and answered in Urdu.
 - 7. The subjects for the examination shall be as follows:-

Part I—Examination.

	1. Pure Mathematics:—			
	 (a) Analytical Geometry, (b) Calculus Integral C Differentia Differentia 	lalculus	Solid.	One paper
2.	Applied Mathematics:-			
((a) Statics (b) Dynamics (c) Hydrostatics		}	One paper
3. 4.	Surveying Elasticity and Strength Theory of Structures	of Materia	ls and	do do
5. 6.	Heat Engines and Theory			do
	Part II—Exa	mination.		
	Civil.	•		
1.	Higher Theory of Elastic	ity and The	ory }	One paper
2.	Higher Geodesy			do
3.	Hydraulics	• •	• •	do
4.	Irrigation			do
5.	Civil Engineering and Ro Design.	einforcea Ce	oncrete	do
	Mochani	ical.		
1.	Higher Theory of Elastici of Machines.	ty and Theo	ry	do
2.	Hydraulies			do
3.	Thermodynamics.			do
4.	Metallurgy and Fuel		• •	do
5.	Machine and Machine-Too	ol Design	•	do
Q	No would late wholl be don	•		

8. No candidate shall be declared to have passed the examination unless he obtains 33½ per cent. of the marks in each paper. Those who obtain 70 per cent. or more of the marks in the aggregate shall be placed in the First Class, and those obtaining 50 per cent. in the Second Class.

Candidates failing at the B. E. Part I examination only in one subject shall be promoted to the higher class, and shall be allowed to appear at the next Part I examination only in the subject in which they had failed.

Such candidates will not be entitled to any class, prize, medal or scholarship.

- 9. A certificate setting forth the date of the examination, the subjects in which he was examined and the class in which he was placed shall be given to each successful candidate. The certificate of the Part I examination shall be signed by the Registrar and that of the Part II by the Chancellor.
- 10. Civil Engineering students who are successful at the final examination shall be attached for one year to a Public Works Division where large works are in progress and shall be regularly instructed in the preparation of materials, the practical details of construction, the management of labour and in the system of accounts. Mechanical Engineering students shall spend the final year in a recognised Engineering work shop. The Degree of Bachelor of Engineering (B. E.) will be awarded to those students who have, after successfully passing their Degree Examination, undergone one year's approved practical training.

FACULTY OF EDUCATION

- 1. Candidates for the Diploma in Education must be graduates in Arts or Science of the Osmania University or of any other University recognised by it.
- 2. The course of study and training for the Diploma in Education shall extend over one academic year of three terms with the necessary attendence of 75 per cent at the Osmania Training College of the University at Hyderabad-Deccan.
- 3. The examination shall be a written examination conducted by means of printed papers. Besides the written examination there will be a practical examination in the teaching of onc of the two subjects selected under section IV to test the candidates' skull in teaching. In determining the standard due regard will be paid to the college-record in practical lessons.

Every candidate shall be required to give at least one lesson in the presence of a Board of two Examiners—one internal and one external.

4. The course will consist of lectures, select readings and discussions in conference, besides practice in the handling of classes and the giving of instruction followed by discussions.

Every candidate will be required to give not less than 20 lessons under supervision during the year.

- 5. Candidates shall be required to undergo a course of instruction and be examined in:—
 - (i) Principles of Education and Psychology.

(a) Principles of Education

(b) Elementary Educational Psychology.

(ii) School Management and Hygiene.

- (iii) History of Educational Ideas and select classics in Education.
- (iv) Methods of Teaching any two of the following subjects:—

Physical or Biological Sciences, History, Geography, Mathematics, English, Urdu, Marathi, Kanarese, Telugu and Indian Classical Languages.

- (v) Special Subjects-one of the following:-
 - (a) Modern Educational Systems and Problems.
 - (b) Advanced Educational Psychology.
 - (c) Child Education.

Instruction will also be imparted in the following additional subjects, but no examination will be held therein:-

(a) Blackboard Illustration.

- (b) Manual Training and Handwork or Nature Study and Gardening.
- (c) Physical Training.

The allotment of marks shall be as follows —

(1) Principles of Education and Psychology—100 marks of which 50 marks shall be assigned to Principles and 50 to Elementary Educational Psychology

(ii) School Management and Hygiene—100 marks of which 30 marks shall be assigned to school Hygiene.

- (iii) History of Educational Ideas and select classics in Education—100 marks of which 30 marks shall be assigned to classics.
- (iv) Methods of Teaching—100 marks of which 50 marks shall be assigned to each of the two subjects.
- (v) Special subjects—100 marks of which 25 marks shall be assigned to the College record.

All papers shall be of three hours' duration each.

(vi) Practical Examinations—200 marks of which 100 marks shall be assigned to the College record.

Candidates who obtain not less than 30 per cent, of the marks in papers 1 to 5, and 33 per cent. in the aggregate of the written examination, and 35 per cent, in the practical examination shall be declared to be eligible to receive the Diploma in Education. All other candidates shall be deemed to have failed. Of the successful candidates those who obtain not less than 60 per cent, of the total marks shall be placed in the First Division. and those who obtain not less than 45 per cent of the total marks shall be placed in the Second Division. The remaining successful candidates shall be considered to have passed in the Third Division. Successful candidates who obtain not less than 65 per cent. of the marks in the paper relating to the Methods of Teaching (iv) shall be declared to have obtained distinction in that subject. In practical examination candidates who obtain 50 per cent. of the marks shall be placed in the Second Division and those who secure 65 per cent. shall be placed in the First Division.

TEXT BOOKS.

FACULTY OF ARTS

(5) HISTORY.

1345-1348 F. (1936-1939).

Previous Examination .-

1st Paper-Political Theories. (1500 to present day.)

1. History of Political Theories by Dunning. (Vol. I, Ch. XI, Vols. II and III).

- 2. History of Political Thought by Gettell, (Portions relating to the period).
- 3. Studies in the History of Political Philosophy (2 Vols.) by Vaughan.
- Political Thought from Spencer to the present day by Barker.

2nd Paper-Political Institutions (1,500 to present day).

The books given below only set the standard of the examination; only relevant portions dealing with constitutional aspects should be studied.

General :--

- 1. Sidgwick: Development of European Policy, (Osmania University Series).
 - 2. Ogg: Governments of Europe (Osmania University Series).

England:-

Ogg: Governments of Europe (Osmania University Series). Holy Roman Empire:—

Jonson: Europe in the XVI Century (Osmania University Series).

Clermany :- -

Ogg. Governments of Europe (Osmania University Series).

Italy:

Sidgwick--Development (Osmania University Series). The Fascist State.

France . --

Pre-Revolutionary, Jonson: -Europe in the XVI Century (Osmania University Series). Revolutionary and Napoleonic Europe. Morse Stephens: Revolutionary Europe (Osmania University Series).

Modern: Ogg

Spain:-

The four chambered Legislative—Cambridge Modern History.

Constitution of 1812: Morse Stephens:

Republican Constitution of 1931--Annual Register 1931.

Turkey:---

Cambridge Modern History, Vol. I.

Lane Poole: Turkey (Latest edition 1922).

Mears: Modern Turkey.

Japan :--

Kitazawa: The Government of Japan.

Russia :---

The Constitution of the Soviet State.

U. S. America and Switzerland :-

Woodow Wilson: The State.

India:-

Mughal Constitution.

Constitutional History of Modern India.

For the latest developments, refer to such publications as the Annual Register, from 1923, etc.

Papers 3rd & 4th:---

- (1) (a) Indian History (Medieval period 1658-1707) The following books are recommended:—
 - . History of Aurangzib . . . J. Sarkar.
 - 2. India of Aurangzib ... J. Sarkar. 3. Nobility and Mughal Kingship ... Khosia.
 - 4. Mughal Armies in India.. .. W. Irvine.

4. •

(4) English Constitutional History:—(1832-1901).

Students are expected to have a thorough knowledge of the working of the constitution, to be able to trace the growth of the movement of reform of Parliament, Municipalities, country Councils etc., and of socialistic legislation during the period. Such authors as Raven Grant and Robertson, Todd, Marriot, May etc., are re commended for their studies

Final Examination : --

1st Paper-General Historical Essay.

2nd ,, Special Topics.

(a) of comparative politics.
 (Government of the British Dominions and India)
 Keith: Responsible Govt. in the Dominions.
 Report of the Imperial Conference, 1926.

- (b) of Political Theories.

 The Political Theories of Imam Ghazzali.
- (6) ECONOMICS—Books to be prescribed later.
- (7) Philosophy:--

Books recommended :---

(a) Philosophy of Religion:-

Halfding: Philosophy of Religion.

Caird. Introduction to the Philosophy of Religion

W. James: The Will to Believe.

W. James: Varieties of Religious Experience.

Webb: God and Personality.

Schleirmacher: Reden.

Jalaluddin Rumi: Masnavi.

(b) Aesthetics:-

Essays in Encyclopaedia on Aesthetics.

Kant: Critique of Judgment.

Hegel: Aesthetics: Croce: Aesthetics.

Carret: Theory of Beauty.

(6) MATHEMATICS:-

The following books are recommended.

Algebra: -

Hall and Knight: Higher Algebra.

Milne: Higher Algebra.

Chrystal: Treatise on Algebra.

Trigonometry.

Loney: Plane Trigonometry, Part II Hobson. Treatise on Plane Trigonometry

Pure Geometry:

Askwith: Course of Pure Geometry

Durrel. Course of Plane Geometry for advanced

students. Part I and 11.

Analytical Geometry of two dimensions.

Askwith: Analytical Geometry of the Come Sections, Smith: Elementry Treatise on the Come Sections by the methods of Co-ordinate Geometry.

Analytical Geometry of three dimensions and Differential Geometry:

Smith: Elementary Treatise on Solid Geometry.

Bell: Blementary treatise on coordinate Geometry of three dimensions.

Differential Equations:

Piaggio: Elementary Treatise on Differential Equations.

Farsyth: Treatise on Differential Equations.

Differential and Integral Calculus:

Gibson: Elementary Treatise on the Calculus.

Lamb: Infinitesimal Calculus.

Williamson: Elementary Treatise on the Differential Calculus.

Williamson: Elementary Treatise on the Integral Calculus.

Goursat: Mathematical Analysis Vol. 1

Theory of Functions of real and Complex variable:-

Hardy. Pure Mathematics.

Goursat: Mathematical Analysis Vol. I and Vol. III
Part f.

Wittakar and Watson · Modern Analysis.

Elliptie Functions:-

Dixon: Elementary Properties of the Elliptic Functions. Wittaker and Watson: Modern Analysis.

Fourier Series :---

Carslaw: Theory of Fourier Series and Integrals. Whittaker and Watson: Modern Analysis.

Attractions :-

Minchin · Treatise on Statics, Vol. II. Routh · Treatise on Analytical Statics, Vol. II.

Electricity and Magnetism :--

Jeans: Mathematical Theory of Electricity and Magnism.

Pidduck Treatise on Electricity.
Livens: Theory of Electricity.

Statics :--

Loney: Treatise on Statics.

Lamb: Statics.

Minchin: Treatise on Statics Vols. I and 11.

Dynamics of a Farticle:-

Loney: Treatise on the Dynamics of a Particle and of Rigid Bodies.

Love: Theoretical Mechanics.

Beasant and Ramsey: Treatise on Dynamics.

Rigid Dynamics:-

Loney: Treatise on the Dynamics of a Particle and of Rigid Bodies.

Beasant and Ramsey: Treatise on Dynamics.

Routh: Rigid Dynamics, Part I.

Hydrostatics:-

Beasant and Ramsey: Treatise on Hydromechanics Part I Hydrostatics.

Hydrodynamics:--

Lamb: Hydrodynamies.

Beasant and Ramsey: Treatise on Hydromechanics

Part II Hydrodynamics.

Spherical Trigonometry:-

Todhunter and Leathem: Spherical Trigonometry.

Spherical Astronomy:--

Godfray: Treatise on Spherical Astronomy

Ball: Treatise on Spherical Astronomy.

Opties:---

Health: Treatise on Geometrical Optics.

Herman: Opties. Ramsay: Opties.

FACULTY OF SCIENCE.

B. Sc. Examination.

ENGLISH.

1345 -1346 F. (1936--1937).

Non-Detailed Texts:

I Boswell and Johnson (The King's Treasures of Literature Series. Dent and Sons).

2. The Living Past by F. S. Marvin (Oxford University

Press).

3. Sheridan's The School for Scandal, edited by G. B. Bose (Edward Arnold or Macmillan's Classics).

Non-Detailed Texts: --

 Boswell and Johnson (The King's Treasures of Literature Series Dent & Sons).

2 Hoyland's History of Civilization. (Latest Special Edition for Muslim University) Oxford University Press.

3. Sheriden's The School for Scandal, Edited by G. B. Boas (Edward Arnold or Macmillan's Classics).

PHYSICS.

1345-1346 F. (1936-1937)

No text-books are prescribed. The following books are re-

1. Watson's text-book of Physics.

2. Duncan and Starling's Text-book of Physics (Osmania (iniversity Series).

3. Allan and Moore's Practical Physics (Osmania Univer-

sity Series).

4. A course in Mathematics for Physics students, compiled by Professor Abdur Rahman Klian.

PHYSICS (MATN)

1347-1348 F. (1988-1939)

1. Richardson's Sound.

2. Saha & Srivastava's Junior Heat.

3. Hutchinson's Electricity and Magnetism in 2 volumes. 4. Houston's Treatise on Light. Portion dealing wi Geometrical Optics only. 5. Worsnop and Flints Practical Physics. 6. The book on "Physical Optics" compiled by Mr. M. Rahman Khau. 7. Properties of Matter compiled by Messrs. Syed ? Khan and Syed Abdur Rahman. Physics (subsidiary) 1. Duncan and Starling's Text-book of Physics (C)sman University Series). 2. Allen and Moore's Practical Physics (Osmania Unive sity Press). CHEMISTRY (MAIN). 1345--1348 F. (1936--1939). 1. Inorganic Chemistry by Partington. (Osmania 2. Systematic Inorganie Chemistry by Caven University Series) and Lander. 3 Introduction to Physical Chemistry by Walker. 4. Outline of Chemistry by Fenton. 11 5. Organic Chemistry by Perkin and Kipping •• 6. Practical Organic Chemistry by Cohen. ,, 7. Systematic Qualitative Analysis by Caven. ,, 8. Quantitative Analysis and Inorganic preparation by Caven. CHEMISTRY (SUBSIDIARY) 1345—1348 F. (1936—1939) 1. Inorganic Chemistry by Alexander Smith, ., Paris I and II. 2. Theoretical Organic Chemistry by Cohen. >1 3. Text-book of Physical Chemistry by Firth. 11 4. Practical Chemistry by Bruce and Harper 11 MATHEMATICS. 1345—1348 F. (1936—1939) The following books are recommended: --

Higher Algebra by Hall and Knight.
 Plane Trigonometry by Loney, Part II.

53

- 3. Co-ordinate Geometry by Grace and Rosen-15 An Elementary Treatise on the Calculus by
- Gibson
- 5 Chapters on Differential Equations from Edward's Integral Calculus.

Applied Mathematics: --

- 1. Elements of Status by Loney.
- 2 Elements of Dynamics by Loney.
- 3. Elements of Hydrostatics by Loney.
- 4. Elements of Astronomy by Parker.

BOTANY (MAIN)

1345- 1348 F. (1936- 1939)

.. Structural Botany Vols. 1 & 2. Scott. Coutler Barnes and Cowles. Text-book of Botany Vols. 1.

2 and 3.

.. Text book of Botany. Stragsburger Strasburger and Hillhouse. Practical Botany. .. Vegetable Physiology. Green

Caver .. Practical Botany.

Dendy .. Outline of Evolutionary Biology.

.. Variation, Herodity and Evo-Locke lution.

.. Mendelism. Punnett

.. Manual of Botany Vols. 1 & 2. J. R. Green .. Botany of the Living Plant. Bower Habarlandt .. Physiological Plant Anotomy.

BOTANY (SUBSIDIARY)

Books recommended: .

- 1. Confer Barnes and Cow- Text-book of Botany, Vols. 1. 2 and 3. len.
- .. Text-book of Botany. 2. Lowson and Sahani .. Text-book of Botany. 3. Strasburger . Structural Botany. 4. Scott.
- 5. Dendy .. Outlines of Evolutionary Biology.

(MIAM) YERLIOON

1346 F. (1936-- 1937) 1345

.. Zoology. Shipley and MacBride

.. Text-book of Zoology Vols. I Parker and Haswell and II.

.. Comparative Analomy of Ani-Bourne mals, Vols. I and II. Text-book of Zoology for In Parker and Bhatia dun students. .. The Animal and its environ Borradaile ments. .. Comparative Anatomy Kingsley or Wiederheim Vertebrates. Elements of Evolutionary Bio-Dendy logy. Marshall The Frog.

.. Practical Zoology. Marshall and Hurst.

The Indian Zoological Memoirs

ZOULOGY (SUBSIDIARY)

Books recommended:-

.. Text-book of Zoology, Vols. 1 Parker and Haswell and II. .. Manual of Zoology. Borradaile .. The Frog. .. Text-book of Zoology for In Marshall Parker and Bhatia dian students. .. Outlines of Zoology. Thomson .. Practical Zoology. Marshall and Hurst The Indian Zoological Memoirs.

MUSIJM THEOLOGY OR MORALS.

(A) Theology (for Hanafi students):-The following syllabus is prescribed:--

مذهب

اسكى عام حقيقة، غرض وغايت ـ مذهب كا علوم عقليه يعني حکت (سائینس) اور فلسفه سرتعلق فلسفه کے مسلك ماد بات كا اثر مذهب مر . مسلك ما ديات كے سمجھنے كے لئر خود مادہ ر محت . دین فطرت یعنی اسلام . یورپ کے اثرات سے مذهب كيون كيك رهے هس . وجو د باری اور اس کے یقن کے اسیاب ۔ خلق عالم ـ خالق و مخلوق کا باهمی تعلق ـ ربو بیت و قیو ه یت کے مظاہر ـ تو حید ـ صفات ـ

روح ودلائكه۔

روح کی حقیقت ۔ اس کے احوال و آثار۔ اسکی بقا ۔ • لائکہ کی حقیقت پر محث ۔ جن وشیاطین کی حقیقت ۔

رسالت ـ

نبوت کی حقیقت ـ اسکی ضرورت و غایت ـ رسول کی بهجان ـ اس کی تعلیم و کتاب ـ معجزات اوران کے لواحق، امکان ـ و جود، شها دت، ان کا دلیل نبوت هونا ـ وحی ـ الهام عموم نبوت محمد یه ـ ختم نبوت ـ نسخ ادیان ـ خلافت الهیه ـ

معاد ـ

سز ا وجر ا ـ عذاب قبر ـ قيامت ـ جنت و دوز خ ـ تقد بر ـ حبر و اختيار ـ خير وشر ـ

شريعت و طريقت ـ

کلام مجید واحا دیث پران کی بناء۔ ان کے اختلافا تکی نوعیت ۔

- () سور ہ بقر (جو عنو انات مباحث کلا میہ کے لئے ، تعلق ہیں ان کی حسب مو قع تفصیل کی جائے)
 - (۲) برائے مطالعہ سرسری۔

دین و دانش (۰ ولوی محمو د علی صاحب) حکمت اسلا، یه (۰ ولوی عبد القدیر صاحب)

(B) Morals (For Non-Hanafis and Non-Muslims)
Mackenzie's Ethics (Osmania University Series).

M. Sc. EXAUINATION.

1. CHEMISTRY:--

- 1. Theoretical Chemistry by Nerrest.
- 2. Inorganic Chemistry by Hoffmann.
- 3. Organic Chemistry by Bernthsen.
- 4. Advanced Organic Chemistry by Cohen.
- 5 History of Chemistry by Thorpe, 2 Vols.
- 6. Electro-Chemistry by Le-Blanc.
- 7. Radio-Activity by Hevesy and Paneth.
- 8. An Experimental course of Physical Chemistry by Spenser, 2 Vols., pages 516.
- 9. Practical Organic Chemistry by Sudborough & James.
- 10. Quantitative Analysis by Clowes and Colerman.
- 11. Qualitative and Quantitative Analysis by Treadwill and Hall, 2 Vols
- 12. Outlines of Industrial Chemistry by Throp.

In addition to the text-books already mentioned, the following books are recommended for the final year:—

- 1. Inorganic and Theoretical Chemistry by Mellor.
- 2 A Text-book of Inorganic Chemistry edited by Newton
- 3. Organic Chemistry by Richter.
- 4. Physical Chemistry by Taylor, 2 Vols.
- 5. A Text Book of Physical Chemistry edited by Mr. William Ramsay.
- 6. New Ideas on Inorganic Chemistry by Werner.
- 7. Inorganic Chemistry by S. Ephraim translated by Thorn.
- 8. Electro-Chemistry by Creighton and Fink 2 Vols.
- 9. Chemistry of Nitrogen by Sidgwick.
- 10. Systematic Organic-Chemistry by Chunning, Hopper and Wheeler.
- 11. Practical Methods of Organic Chemistry by Gutterman.
- 12. Radiotactive substances and their radiations by E. Rutherford
- 13. Radiotactivity by Hevesy and Pavelts.
- 14. Bragg's X-rays and Crystal Structure.
- 15. Morinari's Chemistry.

(2) Physics ...

No Text books are prescribed; but the following books are suggested as indicative of the scope of the subjects required for study. Candidates are required to study the original papers and to remain in touch with modern developments of Physics:—General Physics:—

Haas: Theoretical Physics.

Poynting and Thomson: Properties of Matter.

Jeans: Dynamical Theory of Gases Barton: Analytical Mechanics

Newman and Scarle: Properties of Matter.

Sound:-

Barton: Sound.

Wood: Text-book of Sound.

Rayleigh: Sound. Richardson: Sound.

Heat :--

Preston: Theory of Heat. Saha: Text-book of Heat.

Roberts: Heat and Thermodynamics.

Shilling and Partington: Specific Heat of Gases.

Planck: Thermodynamics.

Opties: -

Preston: Theory of Light.

Drude: Optics.

Wood: Physical Optics. Baly: Spectroscopy.

Magnetism and Electricity:-

Pohl: Electricity and Magnetism. Pidduck: Treatise on Electricity.

Jeans: Mathematical theory of Electricity and Magnetism.

Starling: Electricity and Magnetism. Stoner: Magnetism and Atomic Struture.

Abraham: Classical Theory of Electricity and Megnetism, translated by J. Dongall.

Modern Electricity:-

Wilson: Modern Physics.

Andrade: Structure of the Atom.

Growther: lons, Electrons and lonising Radiations. J. J. Thomson: Conduction of Electricity through Gases. Rutherford: Radiations from Radicoactive substances.

Aston: Isotopes.

Sommerfield: Atomic Structure and Spectral lines.

Richardson: Electronic theory of Matter.

Bragg: X-Ray and Crystal Structure.

Compton: X-Ray. De Broglie. X-Ray.

Practical Physics:-

Watson: Text-book of Practical Physics.

Worsnop and Flint; Advanced Practical Physics for students.

(3) ZOOLOGY:- -

Books', journals' and periodicals' recommended for reading or reference in connection with the M. Sc. Examination in Zoology:—

(A) Comparative Anatomy of Vertebrata and Invertebrata. Parker and Haswell: Text Book of Zoology. Vols. 1 & 2. Kingsley, or Wiedersheim and Parker: Comparative Anatomy of Vertebrates.

Lankester: Treatise on Zoology. (Series)
Cambridge: Natural History Series.

Sedgwick: Students' Text-Book of Zoology, 3 Vols. Goodrich: Structure and Development of Vertebrates.

De Beer: Vertebrate Zoology.

The Indian Zoological Memoirs and the L. M. B. C: Memoirs

(B) General Biology and Evolution .--

Darwin: The Origin of Species. Wiesmann: The Evolution Theory.

Lock: Variation, Heredity and Evolution.

Smith, J.: The Primitive Animals. Locy · Biology and its Makers · Poulton · Essays on Evolution.

Kecble: Plant Animals.

Willey: Convergence in Evolution.

Borradaile: The Animal and its Environment.

Watson: Evolution.

Osborn: From Greeks to Darwin.

Osborn · Origin and Evolution of Life.

Jordan and Kellog: Evolution and Animal Life.

Driesch: History and Theory of Vitalism.

Kellog: Darwinism to-day. Lull: Organic Evolution. Russell: Form and Function.

Lloyed Morgan: Instinct and Experience, Gaskell: On the Origin of Vertebrates,

Darwin: Descent of Man.

Dendy: The Biological Foundations of Society. Goodrich: The Evolution of Living Organisms.

Cunningham: Hormones and Heredity.

Pearson: The Chances of Death and Other Studies in Evolution. Vols. 1 and 2.

Chambers: Vestiges of Creation.

Herbert: The First Principles of Evolution.

Wallace: Darwinism.

(C) Heredity, Genetics, Mendelism, Sex, etc .--

Thomson: Heredity.

MacBride: Introduction to the Study of Heredity.

Doncaster: Heredity in the Light of Recent Research.

Doncaster: The Determination of Sex.

Kerr and Agar: Lectures on Sex and Heredity.

Loch: Artificial Parthenogenesis.

Morgan: Heredity and Sex. Thomson and Geddes: Sex.

Punnett: Mendelism.

Darbishire: Breeding and Mendelian Discovery.

Castle, Coulter and Davenport: Heredity and Eugenics.

Lillie: Problems of Fertilization. Newman: The Biology of Twins.

(D) Cytology and Embryology. -

Agar: Cytology.

Wilson: The Cell in Development and Inheritance.

Doneaster: Cytology.

Kellicott: Outlines of Chordata Development.

MacBride: Embryology—Vol. 1. Graham Kerr: Embryology—Vol. 2.

Asseton, Hill and Wilson: Embryology-Vol. 3.

Jenkinson: Vertebrate Embryology. Lillie: Development of Chick.

Morgan: Regeneration.

Marshall: Vertebrate Embryology.

(E) Distribution .--

Heilprin: The Distribution of Animals.

Beddard: Zoogeography. Lankester: Extinct Animals.

Wallace: The Geographical Distribution of Animals. Vols.

1 and 2.

Wallace: Island Life. Gadow: The Wanderings of Animals.

(F) Microtechnique:-

Gatenby and Cowdry—Bolles Lee's Microtomist's Vade— Meeum.

*Candidates are expected to be familiar with the current journals and periodicals which will be suggested by the Professor from time to time; he will also advise them as to which books, journals, or portions thereof are to be read.

(4) Botany:—

Books, Journals and Periodicals recommended for reading or reference.

Systematic:-

Engler: Das Pflanzenreich.

Engler and Prantl: Die Naturlichen Pflanzen familien.

Cooke: Flora of the Bombay Presidency.

Hooker: Flora of British India.

Roxburgh: Flora Indica.

Duthie: Flora of the Upper Gangetic Plam Partridge: Forest Flora of Hyderabad. Kirtikar: Indian Medicinal Plants.

Brandis' Indian Trees.

Watt: The Commercial Products of India.

Rendle · Classification of Flowering Plants, Vols. 1 & II.

General:-

Strasburger: Text-Book of Botany.

Campbell: University Text-Book of Botany.

Bower: Origin of a Land Flora. Scott: Studies in Fossil Botany.

Seward: Fossil Plants Darwin: Forms of Flowers.

Coulter and Chamberlain: Morphology of Gymnosperms and Angiosperms.

Coulter Barnes and Cowles: Text-Book of Botany, Vols. I, II and tII.

Willis: Flowering Plants and Ferns.

Haberlandt: Physiological Plant Anatomy. Seward A. C.: Plant Life through the ages (Camb: Univ: Press, 1934).

Algae:-

West-Algae. Vol. 1.

West and Fritish: British Fresh water Algae.

lungi :---

Gaumann and Dodge: Comparative morphology of Fungi.

Gwynne: Vaughan H; Fungi, Ascomycetes, etc.

Stevens. Fungi and Plant Disease. Butler: Fungi and Disease in Plants.

De Bary. Comparative Morphology of the Fungi, etc.

Gwynne: Vaughan and Barnes. Fungi.

3ryophyta:-

Campbell: Mosses and Ferns.

Cavers: Inter-relationships of the Bryophyta.

Kashyap: Liverworts of the Western Himalayas and the Punjab Plain, Parts I and II.

'teridophyta:---

Christ: Die Farkrauter der Erde Die geographic der Farne

Bower: The Ferns.

Blatter and Almeida: The Ferns of Bombay.

lynnosperms:---

Pearson: Gnetals (Camb: Univ: Press).

Coulter and Chamberlain: Morphology of Gynmosperms.

Chamberlain: The Living Cycads.

Plant Physiology and Ecology:-

Stiles: Photosynthesis.

Bose: Physiology of Photosynthesis. Bose: Physiology of Ascent of Sap. Bose: Nervous Mechanism of Plants.

Dixon: 'Transpiration and the Ascent of Sap.

Kostychev: Plant Respiration.

Barton Wright: Recent Advances in Plant Physiology.

Miller: Plant Physiology.
Palladin: Plant Physiology.
Schimper: Plant Geography.
Warming: Ecology of Plants.

General Biology and Cytology:-

Dendy: Outlines of Evolutionary Biology. Bateson: Mendel's Principles of Heredity.

Thomson: Heredity. Punnet: Mendelism.

Darwin: Origin of Species.

Wallace: Darwinism.

Weismann: The Evolution Theory. Coulter & Coulter: Plant Genetics.

Sharp, Cytology.

For Practical:-

Chamberlain: Methods in Plant Histology.

Strasbuger: Practical Botany. Bower: Practical Botany.

Darwin & Action: Practical Physiology of Plants.

Detmer & Moore: Plant Physiology.

Journals and Periodicals:

Important Journals and periodicals may be recommended from time to time by the Professor.

FACULTY OF LAW

LL.B. EXAMINATIONS.

1345-1348 F. (1936-1939).

Previous Examination :-

1st Paper	Leage's Roman Law.
2nd *,	Dicey's Constitutional Law.
3rd ''	Anson's Law of Contract.
	The Contract Act. (Hyderabad).
4th ''	Salmond on Torts.
	Indian Easements Act.
5th	The Evidence Act. (Hyderabad).
	Best on Evidence; Mukerji on Evidence.
6th ''	The Penal Code. (Hyderabad).
	The Criminal Procedure Code. (Hyderabad).

Final Examination :---

1st Paper	Muhammadan Law by (a) Mulla and (b)
	Ghayatul-Autor—Kitabul Fariaz.
	Ghayatul-Autor—Kitabul Faraiz.
2nd "	Usuli-Dharam Shastar by Baijanth.
	Main's Hindu Law.
3rd ''	The Indian Trust Act.
	Specific Relief Act Hyderabad.
4th ''	Quanun Malguzari Arazi, Act No. 9 of 1317 F.
	Law of transer of property.
	Civil Procedure Code. (Hyderabad).
5th ''	Law relating to Civil Courts in H.E.H. the
	Law of transfer of property.
	Indian Limitation Act.
6th ''	Salmond's Jurisprudence.
	Lawrance's Principles of International Law.

In the first paper for the Previous Examination and in every paper for the Final Examination, 40 marks shall be allotted to questions framed with a view to test the ability of candidates to apply more important legal principles to concrete cases. Full credit shall be given for well-reasoned answers to such questions even if the conclusion happens to differ from the views taken in decided cases. No credit shall be given for bare answers not supported by arguments.

FACTUATY OF MEDICINE

M. B. B. S. EXAMINATIONS:-

The following books are recommended:-

- 1. Gray's Anatomy.
- 2. Cunningham's Practical Anatomy.
- 3. Halliburton's Text-book of Physiology.
- 4. Schafer's Histology.
- 5. Sharpy-Schafer's Experimental Physiology.
- 6. Halliburton's Chemical Physiology.
- 7. H. Hyder Alı Khan-Elements of Embroyology.
- 8. Ghosh-Hygiene and Public Health.
- 9. Dixon-Mann-Forensic Medicine and Toxicology.
- 10. Lyon's Medical Jurisprudence for India.
- 11. Cushny-Pharmacology and Therapeutics.
- 12. Clark-Applied Pharmacology.
- 13. Ghosh-Materia Medica.
- 14 Taylor-Medicine.
- 15. Rose and Carless-Surgery.
- 16. Muir-Text-book of Pathology.
- 17. Shennan-Post-Mortem and Morbid Anatomy.
- 18. Muir and Ritchie-Bacteriology.
- 19. Mauson-Tropical Diseases.
- 20. Huschinson and Hunter-Clinical Methods.
- 21. Waring—Manual of Operative Surgery.
- 22. Boyd's Surgical Pathology.
- 23. Massie-Surgical Anatomy.
- 24 May & Worth—Diseases of the Eye.
- 25. Turner-Ear, Nose & Throat.
- 26 Ten Teachers-Midwifery.
- 27. Ten Teachers-Diseases of women.
- 28. Eden & Lockyer-Gynaecology.

FACULTY OF ENGINEERING.

R. E. Examinations.

No Text-hooks are prescribed.

Detailed Syllabuses in different subjects are given in Appendices.

FACULTY OF EDUCATION.

The following books are recommended:-

PRINCIPLES OF EDUCATION AND ELEMENTARY

EDUCATIONAL PSYCHOLOGY.

Betts .. Mind and its Education. (Appleton).
Gates .. Psychology for Students of Education.
(Macmillan).

Klapper ... Contemporary Education. (Appleton).
Reudiger ... The Principles of Education. (Harrap).
T. P. Nunn ... Education—Its data and First Principles.
(Arnold).

Dewey .. How we think.

Dewey .. School and Society. (Chicago N. P.)

SCHOOL MANAGEMENT AND HYGIENE.

SCHOOL MANAGEMENT.

Bray ... School Organisation. (Tutorial Press).
Wren ... Indian School Organisation. ((Longman)
West ... Indian School Management and Inspection
(K. & J. Cooper).

HYGIENE.

Kerr .. School Hygiene. (Allen & Co.)
Ross .. Hygiene for Indian Schools.

Drummond .. School Hygiene. (E. Arnold & Co.)
Lyster .. Hygiene of the School (Tutorial Press).

Shaw .. School Hygiene (Macmillan).

HISTORY OF EDUCATIONAL IDEAS AND SELECT

CLASSICS IN EDUCATION.

Monroe .. A Text Book in the History of Education. (Macmillan).

Boyd .. History of Western Education. (Black).

Adamson .. A Short History of Education. (C. U. Press). .. Great Educators of Three Centuries. (Mac-Graves millan). .. A Student's History of Education. (Mac-Graves millan). (Longmans). Educational Reformers. Quick EDUCATIONAL CLASSICS. Rousseau Emile. (Dutton & Co.). Plato Republic. ٠. Locke On Education. (Macmillan). Education. (Watts & Co.). Spencer . . Democracy and Education. (Macmillan). Dewey ٠. METHODS OF TEACHING. PHYSICAL SCIENCE. Brown Teaching Science. (London University). Westaway Science Teaching. Teaching of Chemistry and Physics. (Lon-Smith and Hall ... mans). BIOLOGICAL SCIENCE. To be prescribed later. HISTORY. Teaching of History. Appleton. Klapper Teaching of History: Macmillan. Teaching of History. C. U. Press. Johnson Jarvis Keatings Studies in the Teaching of History (Black woods). Findlay .. History and its Place in Education (University of London Press). Allan Place of History in Education. (Blackwoods). GEOGRAPHY. F. L. Holtz The Principles and Methods of Teaching Geography. (F. L. Holtz, A.M.) B. C. Wallis .. The Teaching of Geography. (Cambridge University Press). Geography in School. (London University J. Fairgreive

Press).

The Principles and Methods of Teaching Geography. (Jubbulpore Press).

Tamaskar

W. P. Welpton .. The Teaching of Geography. (University Tutorial Press).

J. Fairgreive Class-book of Practical Geography.

Steers .. Mans and Map-making.

B. C. Wallis .. Essentials of Practical Geography. (Macmillan & Co.).

MATHEMATICS.

Monteith .. Arithmetic Teaching in the Infant and Ju-

nior Schools. Harrap. Teaching of Mathematics Young (Longman's

Green & Co.).

Schultze .. The Teaching of Mathematics in the Secon-

dary Schools (Macmillan Company).

English.

Mackenzie Instruction in Indian Secondary Schools. (Oxford Press).

Jesperson How to teach a Foreign Language. (Allen.) Findlay .. Modern Language Learning. (Gregg.) Batchelder .. Notes on the Teaching of English. (Mac-

millan).

Roberts & Barter. The Teaching of English. (Blackie.) .. The Teaching of English. (Longman's)
.. The Phonetics of English. (Heffer.) Carpenter

Ida Ward

Kitson .. Theory and Practice of Modern Language.

(O.U.P.)

VERNACULARS AND CLASSICAL LANGUAGES.

Urdu, Marathi, Telugu, Kanarese, and Indian Classical Languages.

The books on the teaching of English indicate the ground to be covered.

MODERN EDUCATIONAL SYSTEMS AND PROBLEMS.

P. Sandiford .. Comparative Education. (Dent).

.. Articles in the Cyclopedia of Education. P. Monroe (Macmillan).

Systems of Education. (Longmans). Dr. Ziauddin F. C. J. Hearn-Educational Advancement Abroad.

sha.w (Harrap).

A. P. Newton Universities of the Empire. (Collins and Sons).

F. W. Roman ... The New Education in Europe (Routledge) (Macmillan).

C. F. Thwing .. Universities of the World. (Macmillan).

Meyhew .. Education of India. (Macmillan).

ADVANCED EDUCATIONAL PSYCHOLOGY.

Ellis .. Psychology of Individual Differences (Appleton) pp. 74 to 128.

Spearman .. Abilities of Man. (Macmillan).

Terman .. Measurement of Intelligence.

Psychological Tests of Educable Capacity.

Report Consultative Committee.

Sandiford .. Educational Psychology. (Longmans).

Fox .. Educational Psychology. (Kegan Paul).

Starch .. Educational Psychology. (Macmillan).

Rugg .. Statistical Methods in Education. (Houghten Mifflin).

Holzinger .. Statistical Methods in Education. (Ginn).

Freeman .. Experimental Education. (Harrap).

Valentine .. Experimental Psychology and Education. (Tutorial Press).

Fox .. Practical Psychology.

Child Education.

Kirkpatrick .. Fundamentals of Child Study. (Macmillan).

Plaisted .. The Early Education of Children. (Oxford University Press).

Picket & Baren .. Early childhood Education. (Harrap).

Waddle .. Introduction to Child Psychology. (Harrap).

L. M. Terman .. The Intelligence of School Children. (Harrap).

Drummond .. The Child. His Nature and Nature. (Bedford Lond.)

APPENDICES.

Detailed Syllabuses.

MATRICULATION EXAMINATION.

COMPULSORY

1. ELEMENTARY MATHEMATICS.

Class VIII, Class IX, and Class X.

- (a) Arithmetic. The four rules applied to integers, vulgar fractions, the decimal fractions in particular. Indian and English money, weights, measures of length, area volume, capacity and time; the metric system. Approximations. Contracted methods of multiplication of decimals. Simple forms of recurring decimlas. Ratio and proportion and exchange. Percentage and its applications. Profit and loss. Simple Interest, and Compound Interest (direct problems only, number of periods for calculation not to exceed 2). Averages, Square root.
- (b) Mensuration. Elementary Mensuration of plane rectilinear figures (a knowledge of the use of field book not required); circles, surfaces and volumes of rectangular solids, right circular cylinder and cone (Frustum excluded); sphere.
- (c) Algebra. Algebraic quantities and extension of four fundamental rules to them—formal proofs not required. Symbolic expression of the general results of Arithemetic Calculation of the numerical values of expressions and formulæ by substitution. Simple factors and formulæ.

$$(a+b)^2 = a^2 + 2ab + b^2$$

$$a^2 - b^2 = (a+b) (a-b)$$

$$(a+b)^3 - a^3 + 3a^2b + 3ab^2 + b^3$$

$$a^3 - b^2 = (a-b); (a^2 + ab + b^2)$$

Simple fractions with linear denominators. Linear equations involving one or two variables and problems relating thereto. Plotting statistics; linear graphs.

(d) Practical Geometry:—Bisection of straight lines and angles, drawing perpendicular and parallels to a given straight line; construction of an angle equal to a given angle. Experimental deduction of the elementary properties of triangles and parallelograms. Simple cases of construction of triangles and quadrilaterals from given data. Elementary properties of the circle-areas, chords, sectors and tangents, construction for finding the centre of a circle or an arc of a given circle. Construction of tangents to a circle and common tangents to two circles. Very simple cases of construction of circles from given data. Contruction of a circle in or about a triangle Division of a straight line into any number of equal parts or into parts in a given proportion.

N. R.—The treatment of the subject matter should be elementary and popular Only Laboratory methods of preparation are expected. All quantitative relations and mathematical calculations are to be avoided

2. Elementary Science.

(i) Physics.

- (a) Preliminary:--Units, British and Metric, for measurements of length, area and volume. Measurement of time, unit of time. Rectilinear translation of a rigid body: defination of velocity and acceleration. Laws of motion. Definition of momentum and force. Gravitation. Weight. Distinction between mass and weight. British and C. G. S. units of mass and force. The balance. General properties of matter. Density and specific gravity. Simple machines in equilibrium; levers, the single pulley. Properties of fluids. Liquid pressure. Principle of Archimedes. Pressure of the atmosphere. Bolve's Law. Barometer (Cistern) and pumps (simple forms of air pump and water pump). The siphon.
- (b) Heat:— Effects of heat: expansion of solids, liquids and gases. Temperature. Thermometers. The expansion of water. Distinction between quantity of heat and temperature. Calorimetry. Melting point. Cold produced by evaporation. Vapour pressure. Influence of pressure on boiling point of liquids. Transmission of heat: conduction, convection and radiation.

(c) Light:—Rectilinear propagation of light, Reflection and refraction of light; refractive index. The formation of images by reflection. Graphic methods of determining the position and size of an image formed by reflection or refraction (applicable to plane and spherical surfaces). Deviation and dispersion produced by a prism (omit minimum deviation). Simple optical instruments: astronomical telescope, microscope, photographic camera and magic lantern.

(d) Magnetism:—Magnets and magnetic substances. Induction, methods of magnetization, Terrestrial mag-

netism. Declination and its determination.

(c) Electricity — (1) Static electricity:—Electrification by friction. Pith-ball electroscope, Conductors and Non-Conductors. (2) Voltaic Electricity:—Production of electric current. Voltaic cell. Local action and polarization. Daniell, Leclanche and Bichromate cells. Galvanoscope, Electrolysis (omit Faraday's Laws), Voltameter (water). Electromagnets. Electric bell. Heating effects of the current (omit Joule's law)

(ii) Chemistry.

Elements, compounds and mixtures. Solution (m water only); decantation, filtration, evaporation and distillation; saturated solution, crystallization and water of crystallization; The use of these processes in sublimation and precipitation. the preparation of pure substances. Examples of physical and chemical changes. Combination and decomposition. The study of air-its composition, burning and rusting. Acids, bases, and salts: neutralization. Types of chemical changes. and non-metals. The law of constant proportion. Preparation and properties of oxygen. Preparation and properties of hydrogen; oxidation and reduction. Study of water: natural waters, hard and soft waters, purification of drinking water, electrolysis of water. Preparation and properties of nitrogen, nitric acid and ammonia. Carbon. Preparation and properties of carbon di-Combustion: structure of a candle flame. Sulphur and oxide. its properties. Preparations and properties of hydrogen sulphide. sulphur di-oxide and sulphur tri-oxide. Preparation and properties of sulphuric acid. Phosphorus and its properties. Matches. Natural forms of silica; glass. Preparation and properties of Chlorine and of hydrochloric acid. Sodium, its occurrence and Properties of sodium hydroxide, sodium chloride, properties. sodium nitrate, sodium sulphate, sodium bicarbonate.

Potassium, its occurrence and properties. Properties of potassium hydroxide, potassium chloride, potassium chlorate and potassium nitrate. Preparation of soap.

Calcium carbonate; preparation and properties of calcium oxide and calcium hydroxide. Elementary ideas about lime, mortar, cement and bleaching powder.

Properties of Magnesium, magnesium sulpicate and magnesium oxdie. Copper, its occurrence and properties; preparation of copper sulphate.

Aluminium, its occurrence and properties, preparation and properties of aluminium sulphate and alum.

Mercury, its occurrence and properties. Properties of mercuric oxide, mercurous chloride and mercuric chloride. Lead its occurrence, and properties. Properties of lithurge, red lead, lead carbonate and white lead.

Silver, its occurrence and properties, preparation and properties of silver chloride and silver nitrate. It sets of silver salts in electroplating and photography.

Iron, its occurrence, properties and uses. Properties and uses of east iron and steel. Preparation and Properties of ferrous oxide, ferro oxide, magnetic oxide of iron and ferrous sulphate.

3. Geography.

General Geography of the World in outline, with special reference to the British Empire, together with India in fuller detail and the essentials of Physical Geography; Surface of the Earth; Volcanoes and Earthquakes, the Zones, Latitude and Longitude, Day and Night; the seasons; the Solne System; Phases of the Moon; waves, Tides and Currents.

OPTIONAL

4. Algebra and Geometry.

(a) Algebra: -- Generalised Arithmetic. Algebraeal laws and principles and their applications. Identities. Functional notation. Formula. mainder Theorem and its amblications. Lanear equations in one, two, and three variables. Solution of Quadratic Equation in one variable. Solution of problems by means of such equations. H.U.F. L.C.M., fractions. Square root of simple rational integral functions. Theory of indices. Graphs of linear and quadratic fractions, in one variable and their applications to the solution of equations and problems.

(b) Geometry:—The course in Geometry will be both practical and theoretical. Practical geometry will include constructions given in Schedule 'A' together with easy extensions of them. Proofs of constructions will also be required. Theoretical Geometry will include theorems together with easy deductions from them. Any proof of proposition which appears to form part of a systematic treatment of the subject will be accepted. In the proof of theorems hypothetical constructions will be allowed. Symbols and Algebraic notation may be freely used.

SCHEDULE "A"

Bisection of straight lines and angles.

Construction of (1) perpendiculars, (2) parallels to straight lines—Construction of an angle equal to a given angle.

Simple cases of the construction of triangles and quadrilaterals from given data.

Division of straight lines into a given number of equal parts, or in any given ratio.

Construction of a rectangle equal in area to a given traingle. Construction of a triangle equal in area to a given rectilinear figure.

Simple cases of the construction of circles from given data.

Construction of tangents to a circle and common tangents to two circles.

Construction of a square equal in area to a rectangle and geometrical extraction of square roots of rational numbers

Construction of regualr figures of 3, 4, 6, or 8 sides, (1) in or about a given circle and (2) on a given straight line.

Construction of (1) a fourth proportional to three given straight lines, (2) a mean proportional to two given straight lines.

SCHEDILE "B"

Angles at a point.—If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right angles; and the converse.

If two straight lines intersect, the vertically opposite angles are equal.

Parallel Straight Lines.—When a straight line cuts two other straight lines, if (1) a pair of alternate angles are equal, or (2) a pair of corresponding angles are equal, or (3) a pair of the interior angles on the same side of the cutting line are together equal to two right angles, then the two straight lines are parallel and the converse.

Triangles and Rectilinear Figures.

The sum of the angles of a traingle is equal to two right angles.

If the sides of a convex polygon are produced in order, the sum of the exterior angles so formed is equal to four right angles.

Two traingles are congruent.

- (1) If two sides of the one are equal to two sides of the other, each to each, and also the angles contained by those sides equal.
- (2) If two angles of the one are equal to two angles of the other, each to each, and also one side of the one equal to the corresponding side of the other.

If two sides of a triangle are equal, the angles opposite to these sides are equal; and the converse.

Two triangles are congruent if the three sides of the one are equal to the three sides of the other, each to each.

Two right-angled traingles are congruent, if their hypotenuses are equal and one side of the one is equal to one of the other.

If two sides of a triangle are unequal, the greater side has the greater angle opposite to it; and the converse.

The opposite sides and angles of a parallelogram are equal, each diagonal bisects the parallelogram and the diagonals bisect each other.

If the intercepts made by three or more parallel straight lines on any strainght line that cuts them are equal then the corresponding intercept upon any other straight line that cuts them are also equal.

Area

Parallelograms on the same base or on equal bases and of the same altitude are equal in area, Triangles on the same base or an equal bases and of the same altitude are equal in area.

Equal triangles on the same base or on equal bases are of the same altitude.

The square on a side of a triangle is greater than, equal to or less than the sum of the squares on the other two sides according as the angle contained by these sides is obtuse, right or acute. The difference in the cases of inequality is twice the rectangle contained by one of the two sides and the projection on it of the other.

The Circle.

A straight line drawn from the centre of a circle to bisect a chord which is not a diameter is at right angles to the chord; and the converse.

In equal circles (or in the same circle):-

- (1) If two arcs subtend equal angles at the centre they are equal and the converse.
- (2) If two chords are equal, they cut off equal ares; and the converse.

Equal chords of a circle are equidistant from the centre; and the converse.

The tangent at any point of a circle and the radius through that point are perpendicular to one another.

If two circles touch each other, the point of Contact lies on the straight line through their centres.

The angle which an are of a circle subtends at the centre is double that which is subtends at any point on the remaining part of the circum/erence.

Angles in the same segment of a circle are equal, and if the line joining two points subtends equal angles at two other points on the same side of it, the four points lie on the circumference of a circle

The angle in a segment is greater than, equal to or less than a right angle according as the segment is less than, equal to or greater han a semicircle.

The opposite angles of any quadrilateral inscribed in a circle are supplementary; and the converse.

If a straight line touches a circle and from the point of contact a chord is drawn, the angles which this choard makes with the tangent are equal to the angles in the alternate regments.

If two chords of a circle intersect each other either inside or outside the circle, the rectangle contained by the segments of the one is equal to the rectangle contained by the segments of the other.

Loci.—The locus of a point which is equidistant from two fixed points is the perpendicular bisector of the straight line joining the two fixed points

The locus of a point which is equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angles between the two given lines.

The locus of the vertices of all triangles which have the same base and their vertical angles equal to a given angle is the are of a segment of a circle.

Proportion:—Similar Triangles: - (Proofs applied to only to commensurable quantities will be accepted).

If a straight line is drawn paralled to one side of a triangle, the other two sides are divided proportionally; and the converse.

If two triangles are equiangular their corresponding sides are proportional and the converse.

If two triangles have one angle of the one equal to one angle of the other, and the sides about these angles proportional, the triangles are similar.

The internal bisector of an angle of triangle divides the opposite sides internally in the ratio of the sides containing the angle, and likewise the external bisector externally.

5. COMMERCIE.

Elementary Book-keeping.

Double Entry-

Its meaning, principles and advantages. Waste book, Journal and Ledger. Journalising transactions of the following descriptions.

Cash and Credit sales and purchases, Cash receipts and payments, Petty Cash disbursements, Bank Account, Cheques received and drawn, endorsed, honoured and dishonoured, rent, salaries, trade expenses, interest, discount, commission, repairs.

lepreciation, bad debts, Bills of exchange, drawn, accepted, enlorsed, honoured, dishonoured, noted, renewed, and retired unler discount, Government and other securities, house property, plant and machinery, furniture, drawings.

Provision for bad debts and discount Suspense Ajc Outstanding and Pre-payments.

Posting the journal entries into Ledger drawing a Trial value, Profit and Loss Alc and Balance sheet.

English System-

Subsidiary books and their use. Three columns cash book, Purchase and sales of books, Purchase Returns and Sales Returns books, Bill receivable and bills payable, Books Journal. Posting the subsidiary books into Ledger and drawing the balance sheet.

Inland and Foreign invoice and account sales Consignment A|c, Trading and Profit and Loss A|c Contract A|c, Partnership A|c of a simple nature such as admission of a partner and division of profits. Goodwill and its treatment on the admission of a partner.

Reserve and Reserve Fund.

Single entry system, its disadvantages. Method of finding profit under single entry, Statement of affairs.

Commercial Pruclices...

The essentials of successful business management:-

Executive ability, system of administration and office facilities.

Office Organisation—

Incoming correspondence, out-going correspondence, reference number, copying of correspondence for office reference, carbon copy, Press copy machine; folding letters and addressing envelopes. Enclosures. Late fee letters, Postage Box. Filling of correspondence:—Vertical filing, Alphabetical system and Numerical system Pigeonhole filing.—Flat file system. Clip, Box needle or spike, and arch file.

Indexing-

Alphabotical index. Vowel index, cross reference index. Card index Drawers. Telephone and Telephone Register,

Duplicating Process-

Stencil copying, Rotary Duplicator.

Machines:—Calculating machine, Adding machine, Dietating machine.

Business Callers, Appointments.

Petty Cash Book

Purchases and Sales-

Difference between an agreement and a contract. Essential points in a contract of sale.

Documents used in Commercial Sales.

Price list, Price current, Tenders, Orders, Indents, Contract notes, Delivery orders, Invoices, Account sales Debit and Credit notes, statements and Receipts.

Correspondence-

Private, business and official, Accuracy, Precision and politeness. Setting out a letter, address, form of salutation, body of the letter and complimentary close, signing the letter. Writing business letters of a simple nature such as enquiries, orders, despatch of goods, remittances complaints, etc.

TELEGRAMS.

Drafting telegrams—Economy and clearness.

Code words-cipher code.

Money-

Paper and metallic, Legal Tenders, Standard of Value Methods of remitting money.

Banks and Banking—

Private Banks, Joint stock banks, Co-operative Banks, Exchange Banks, Imperial Bank of India, and Post Office Savings Banks, Business transacted by Banks.

Fixed deposit and current account. Advantage of a Banking account. How to open account with a Bank, Paying slips, Pass Book.

Cheques-

Order and Bearer, Crossed cheques and Not Negotiable cheques. Endorsement. General and special Presentment for payment; honour and dishonour; stopping payment.

INLAND AND FOREIGN.

Bills of Exchange-

Drawing, accepting, honouring, dishonouring, noting, protesting and renewing. Advice slip. Currency of bill. Days of grace. Endorsement, Usance, Sola, Case of need. Promissory Note. Difference between Bill of Exchange and Promissory Note Alonge. I.O.U. Letter of Credit and Circular letter of Credit, Negotiable Instruments, Hundi. How money is transferred through a bill of Exchange.

Mercantile Houses.

Sole Traders, Firms and Companies. Partnership, limited and unlimited, Partnership Deed. Active and dormant partners. Rights, duties and liabilities of a partner. Dissolution of partnership.

Terms and abbreviations used in commerce.

Meaning of Home trade, Foreign trade, Balance of trade, Balance of account, volume of trade, Import and Export trade, Carrying trade and Retail trade. Bill of Landing.

Insurance-

Elementary principles of Life, Fire and Marine Insurance, with terms used in Insurance.

Foreign Exchange—

Par of Exchange, Course of Exchange. Monitary Standards of principal countries of the World.

6. Biology.

Elementary Biology including Human Physiology and Hygiene. Paper.I—Biology.

Life of unimal based purely on the observation made on Frog: External parts and their work; internal parts and their work; digestive system; food and digestion. Circulatory system and blood, work of blood and need for circulation. Lungs and breathing. Kidneys and excretion. Nervous system; sensation and special senses. Bones and supports. Reproductive system and reproduction. (All these are to be treated in a very elementary manner).

Elementary Knowledge of the classifaction of animals.

Illustrated mainly by the common local unimals.

Life of plants band mainly on the bean plant to be dealt with in a very elementary way-Various forms of plants; herbs, shrubs and trees, climbing plants, parasites. Parts of the plant and their work. Leaves. Manutacture of food; laws of water to air. Stem; carrying water and food; supporting of leaves. Root; collecting water and salts from the soil; holding the plant in position. Flowers: pollination; fertilization; fruits and seeds and their dispersal. The new plant in the seed: ger mination. (All these to be treated in a very elementary manner).

The value of plants and animals to man—Food, tuel, clothes power, building material, medicine, pleasure, scavenging of waste materials (dogs, jackals, crows, vultures, bacteria, fungi).

Animal and plants that are harmful to man.

(Treated in a very elementary manner).

- (1). That feed on man and animals: ticks, lice, fleas, bed bugs, mosquitoes, intestinal works- (External features only).
- (2). That feed on plants distruction of plants by insets (Common example). Elementary description only.
- (3) That cause diseases in man and animals—animals parasites (Malarial parasite, hookworm) and bacteria (cholera, plague, tuberclosis. (All these to be treated in a elementary manner). Life-histories are not required but only a very simple idea of the diseases is to be given).
- (4) That cause diseases in plants: parasitic fungi(mill-dews, smuts, rusts). Life-histories not required but an idea of the damage done by these fungi to their hosts.
- (5). That earry diseases: Insects (flies, fleas, mosquitoes); rats, (simple names of such diseases and not the life-histories of the animals).
- (6). That destroy property: rats, whiteants; beetles; bacteria and moulds in food; wood-rooting fungi. (Very elementary knowledge of their habits only).

Biology Demonstration.

The teaching of theory should be illustrated by experiments as far as possible, and demonstrations (both microscopic and

microbic are to be considered an essential part of the teachers work. The ourse in Biology will not require any extensive expenditure on equipment and materials. Practically all materials can be easily collected from the local fanua and flora. No microscopic work is to be done individually by the pupils.

Demonstration of common representatives of the animal kingdom as obtained locally, and their sketching. Students should be encouraged to develop the taste of observation and to collect materials. They should also develop habits of making anisetim collections, their labelling, preservation, etc.

Collection and sketching of the common local plant forms. Study and sketching parts of a plant.

Observation of insects that feed on cultivated plants.

Collecting of tungus, diseases of plants, especially of crop plants.

Examination of the breeding places of mosquitoes, flies and rats.

Books recommended for the guidance of the leachers.

- (1). Parsons -Everyday science.
- (2). Green and Potter-Biology by discovery.
- (3). T. J. Moin Biology for beginners.
- N.B. Great stress should be laid on pure observations, field-work and biological excursions, museum and herbarium studies.

A note on the leaching of Elementary Biology for the Guidance of leachers- The course in Elementary Biology, including Human Physiology and Hygiene is intended to awaken the general interest of young students and to give them an intelligent appreciation of everyday life around them. With this main object in view, the synabus is mainly based on observations of a few animals and plants and is of a very elementary character. The teacher should keep this basic principle in mind as laid down in the syllabus while presenting the different sections of the subjects, and emphasize the part these sciences play in modern life. In Biology the teacher should emphasize the life-functions of frog and man rather than details of structure. In plants, it is not the shapes and kind of structure that should be emphasized, but the fact that the plant is a living organism. animals and plants obtain their food, breathe, react to their surroundings and reproduce their kind rather than elaborate details of their structure is the most important thing.

Practically every item of the syllabus can be illustrated by a simple demonstration, and students should always be encouraged to learn the subject more from direct observation and experience of nature viz. by making excursions and going about on the field rather than by cramming notes and reading books, alone. The teachers is recommended to prepare his material for demonstration carefully before he goes into the class.

Part II .- Elementary Human Physiology and Hygiene.

As a basis for the teaching of Hygiene there should be a preliminary simple treatment of the following topics in Elementary Human Physiology.

The human skelton; the organs of digestion; the circulation of the blood; the nervous system; respiration; exerction; reproduction.

Hygiene.

Air: Composition of air, importance of pure air. Impurities of air, ventilation.

Water: Composition of water; quantity of water required; sources of water-supply; springs, deep wells, surface wells, rivers tanks. How water is polluted. How to prevent pollution of water. How to purify water, boiling and filtering.

Food: Composition of food. Composition of good diet and its importance. Preservation of food. Cooking of food. Drinks and condiments.

Personal Hygiene: Cleanliness of body (hair, nails, teeth, etc.) clothing, exercise, importance of temperance, spitting.

Precaution against diseases... Infectious diseases (small-pox and measles). Colds and influenza. Tuberculosis. Enteric fever; dysentery; diarrhoea; cholera; plague; malaria; itch; leprosy; ophthalmia (sore-eyes).

7. Domestic Science.

Class VIII-

THEORETICAL.

I. The Human Body.
The human Skeleton.
The uses of the skeleton.

The structure and character of the bones.

The joints-immovable, elastic, gliding.

The muscles-voluntary and involuntary muscles.

Muscular action

The nervous system

The sense organs.

The nervous centre—the brain

Spinal cord.

The nerves.

Personal cleanliness—warm, cold and shower baths, the daily bath.

The effect of muscular and mental work upon the body.

The need of Rest.

II. Clothing .--

Uses and care of clothing.

Principles governing the use of healthy clothing.

Characters of leather, fur, feathers, camel hair, Cashmere, alpaca—their use.

Properties of clothing--Principles of dress construction.

The evils of unhealthy clothing.—

- (1) Heavy caps and woollen bonnets.
- (2) Tight Kammar bands.
- (3) Tight garters.
- (4) Ill-fitting shoes.

The need of a warp against exposure.

III. Home Management.—

(a) The choice of a house:

Situation, aspect, value of sunlight, elevation, ventilation, heating, sub-soil and drainage, construction, condition of roof, arrangement of rooms, need of deep verandahs, water supply.

- (b) The Manegement of the income.-
 - (1) Paper Money,

Banking notes and cheques—their convenience in transaction.

Sending money by post-methods.

Advantages of such payments.

Evils of the instalment plan.

(2) Objects to be attained by saving.

The provident fund.

IV. The Sick Room, --

Conditions of germ life.

Precautions against infection.

Diseases caused by germs; Plague, Measles, Small-pox, Chicken-pox, ague and malaria, influenza, typhoid, fever, dysentry and cholera: their cause, prevention and treatment.

PRACTICAL.

Cookery .-

Ordinary: How to make vegitable dishes of sorts.

- (1) How to make Ilulwa.
- (2) A sponge cake and seed cake.
- (3) Fruit salads, stewed fruit and mange food.
- (4) Jams, preserves and syrups.

A lunch to be prepared and served.

Invalid: How to make.

- (1) Rice water.
- (2) Lemon whey.
- (3) Egg flip.

First Aid

How to deal with.

- (1) Chocking.
- (2) Hicrough.
- (3) Bleeding from wounds.
- (4) Treatment of wounds with glass in them.
- (5) Foreign bodies in the eve and ear.

Cure of clothing.—

How to remove grease spots from clothing.

Methods of washing, starching, damping, folding and ironing clothes.

Washing and ironing of white and coloured cotton articles. Practical Child Welfare.—

Ways in which young children can be profitably occupied and amused.

How to bathe an Infant.

How to dress an infant—practical illustrations with dummy. Clothing of infants and children.

Class IX.

THEORETICAL.

The Human body as a living machine.

The various systems of body.

- (1) The digestive.(3) The circulatory.
- (3) The respiratory.
- (4) The waste removing system.

The digestive system—its various parts:

- (a) The mouth.
- (b) The tongue.
- (c) The teeth.
- (d) The salivary glands.

The digestion of food.

The digestive juices and their action of food.

The circulation of blood: the heat, arteries and veins.

Personal Cleanliness. -

Sea-bathing.

Precautions to be observed in public baths and bathing places.

The relation between physical exercise and the cleanliness of the body.

Home Management .--

The Home.

- (1) Whitewash.
- (2) Floor coverings.
- (3) The bedroom—size, floor, windows, furniture, clean-liness.
- (4) Care of servants.

Management of Income .--

1. Preparation of the daily menu.

Regulation of expenditure in porportion to meome.

Budgeting for running houses on different levels of income.

The Sick Room .---

Diseases caused by germs.

Precaution against infection from:

Diptheria, whooping cough, Erysipilas, blood poisoning, antherax, tetanus, consumption, typhus, hydrophobia.

Child Welfare .--

The air pasages.

The value of fresh air.

Enlarged tonsils and adenoids.

The care of the voice.

Proper mode of taking breath.

The necessary constituents of a diet for the child.

Care of the voice at puberty.

339

PRACTICAL.

Cookery .--

(1) Ordinary.—How to make fish dishes.

Cooking of a complete dinner in family system.

Invalid Cookery .--

How to make:

- (1) Baked flour.
- (2) Chicken broth.
- (3) Beef juice.

First Aid .-

How to deal with foreign bodies in the nose and throat.

How to deal with:

- (1) An apoplectic fit.
- (2) A snake bite.
- (3) A dog bite.

Home Management .-

Dyeing and restoration of coloured materials.

Washing and ironing of flannels and silks.

Removal of ink, fruit and rust from clothing.

CLASS X.

The Human body.

The respiratory organs.

Changes between the blood and air.

Inspiration and expiration.

Human waste matters-their source and removal.

The structure of the skin and its work.

The Structure of the Kidneys and their work. .

Care of the person-daily washing.

Turkish bath.

Vapour bath.

Medicated bath.

The need of recreation and sleep.

Home Management .--

- (1) The need of regular cleaning of the rooms, cloors, windows, paint, furniture, etc.
- (2) Care of silver, brass, enamel, wave and books.
- (3) Proper location of kitchen and bath-rooms. The need for regular inspection.
- (4) The choice, care and mending of household linea.
- (5) The choice of furnishing.

Simple upholstery and drapery (Illustrate where possible by practical work).

General Etiquette. -

- (1) Rules for visiting.
- (2) Behaviour at theatres and concerts, noisemns, etc.
- (3) Rules for employment of leisure time

Management of Income .--

Where to invest.

The post Office, Saving Bank, Government Stock.

Annuities.

Life Insurance.

Co-operative Stores.

Co-operative Societies.

Necessity of careful selection of safe investments.

Dealing with Banks.

First Aid .--

Poisons—their symptoms and treatment.

Carbolic, Opium, Prussic Acid, Arsenic, Copper, Lend, Alcohol.

The Sick Room .-

Bed sores—their prevention and treatment.

The Management of the sick

Rules for visiting the sick.

Child Welfare .---

The nervous system—its extreme liability to damage by the over strain of growth.

School headaches.

Epileusy.

Insomnia

Sonambulism.

The correct posture in standing, walking and sitting.

Elements of Child Psychology .--

The girls should specially be encouraged to observe for themselves how small children react to certain stimuli and learn how to direct aright the children's natural instincts. This subject should be taught mainly by discussion and the pupils should visit the Kindergarten Classes for observation.

PRACTICAL.

Home Management.—

General revision of Laundry work.

Making of simple upholstery and drapery.

Destruction of larvae in breeding places of mosquitoes.

Preparation for a railway journey.

Looking up time-tables.

COOKERY.

A. Ordinary.-

(a) How to make sandwiches.

(b) How to make lime juice which will keep indefinitely.

(e) How to make a large iced cake.

B. Invalid .-

(1) How to make one Peptonised gruel.

(2) Scraped Beef.

Preparations for Picnics, At Home.

SCHOOL SUBJECTS.

1. Drawing.

Class VIII

1st Term.

- 1. Drawing from flat (Free Hand)
- 2. Geometrical Drawing.
- 3. Memory Drawing.

2nd Term.

Model Drawing.

Books recommended :---

- 1. The teaching of Drawing by I. H. Morris
- 2. Geometry by I. H. Morris Problems 1 to 100.

Class IX.

1st Term.

- 1. Free-hand and Model Drawing, (Alternate lessons) in more developed forms than the Class VIII Standard.
- 2. Geometrical Drawing.

2nd Term.

Follage from nature flat Tinting.

Books recommended.

- 1. Same as for Class VIII.
- 2. Same as for Class VIII Problems 100 to 200.

Class X.

1st Term.

- Free-hand Drawing in more developed forms than the Standard of Class IX.
- 2. Geometrical Drawing and Mechanical Measurement.

2nd Term.

Summing up and revision of subjects taught in the last term and in terms of Class VIII and IX.

Books recommended.

- 1. The teaching of Drawing by I. H. Morris.
- 2. I. H. Morris Book of Geometry 200-223 problems.

MANUAL TRAINING WOOD-WORK.

Class VIII.

- (a) Scientific Principles. (Educational advantages of Manual Training. Principles of Projection.)
- (b) Practical Principle. By demonstration (Saws and Sawing planes and planning etc.
- (c) Practical Work. (Λ round ruler. A penholder. A hat rack. Key-board. Λ toilet box. A picture frame etc.)

Class IX.

(a) Scientific Principles.

Growth and parts of growing tree. Germination, roots and eaves, their development and food supply. Seasoning timber. Shrinkage of timber. Chemical structure of wood and products formed by chemical changes, etc.

(h) Practical Principles.

(Miscellaneous Tools, Grind stone and grinding. Notes on various tools).

(c) Practical work.

Levelling Rule. A simple Ink Stand. A letter rack. A owen roller A Book-shelf (Key joint). A tea tray etc.

Class X.

(a) Scientific Principles.

- Science in Manual Training. Matter measurement. Metric system. Density. Specific gravity. Force and Work. Mechanical devices, levers etc.
- Geography in Manual Training, trees, characteristics of various parts, Forestry and the Manual Training Lesson. Climate, rainfall, rivers, coast line of Europe, forest area of Asia. Europe and America, particularly forests of India and Burma. Lessons on principle trees and important timbers.

Practical Work

A Stool, Teapoy A Drawing Board (Tongue and groove joint). A tea square A book rest. A Common box with lid. A box for sporks, spoons and knives (Drawer dove-tail join a photo stand A stationery cabinet etc.)

Free-hand sketches of the new tools introduced at each stage and models attempted, with dimentioned scale, drawings showing orthographic projections. Latterly occasional oblique drawings should also be attempted.

Nors: This syllabus is for educational wood-work as an optional course. If this be compulsory for all sections, (a) scientific principles in the third year may be dropped.

- The Glass to educational wood-work should meet three times a week for one and a half how each day. The Class for Drawing should meet as usual at least twice a week for an how each time in addition.
- 3 It is advisable to have a practical examination at the end or each year besides an examination in Drawing, a satisfactory dated additional the theorem being a necessary condition to the Matrie Centificate.
- 4 The active co-operation of Science and Geography teachers should be enlisted so far as Science and Geography portions of the third year's course are concerned.

BOOKS FOR REFERENCE

- 1. The Principles of Educational wood-work by Bennes & Musdon
- 2. The Principles of Educational wood-work by W A Milton (Blackie).
- 3. Manual Instruction wood work by Pearson.
- Sloyd—Three Upper Grammar grades by G. Laresson (Boston Menual Training School)

2. Physical Training.

1. Exercises of the Body :-

Marching and running exercises, short distance and long distance running practice. Relay races and Cross Country races. Racing and running exercises with increased standards.

Posture Exercises:

Body exercises with thorough working out of the whole body. Corrective exercises. Light body bending. Body turning. Leaning rest exercises. In step exercises. Balancing and breathing exercises.

2. Performance activities:-

Jumps of all kinds. Shot Pulling. Pole vault. Hurdle races etc.

- 3 Exercises for strength, courage and skill on apparatus. Horizontal bar. Rotation and knee grind from swinging to hanging position. Sitting rotation. Putting knees up to bar and turning around, Vaults. Struddling from stand and hanging position.
 - Parallel Dar:—Vaults Rolling from straddle to straddle, shoulder stand from sitting position. Lying position, arm bending and stretching Hand-stand.
- 4. Floor Exercises: -- Tumbling and wrestling Boxing.
 - (5) Games:—Team games such as Hand-football, Freedodge ball and indigenous games such as "Bul-chie" and "Loanpat". "Gill Danda". Track ball, Hand ball, Foot-ball and Hockey.

Intermediate Examination.

ECONOMICS.

(1) Principles of Economics.

Introductory : -

The nature and significance of Economics. The relation of Economics to other Sciences. The meaning of Wealth and Utility. The conditions of Exchangeability. The main sub-divisions of the Science.

Consumption :- -

Human wants and their characteristics. Necessities. Comforts and Luxuries. The Law of Diminishing Utility. Elasticity of Demand. The Distribution of Income between different Wants. The conception of Consumers' Surplus.

Production :--

The Meaning of Production. The Factors of Production.
The Meaning and Characteristics of the different Factors.
Land and its Fertility. Intensive and Extensive cultivation. The Law of Diminishing Returns. Factors affecting the Value of Land.

- Labour and its Efficiency; Conditions affecting the Efficiency of Labour. The various kinds of Labour. Skilled and unskilled, Productive and unproductive, Physical and Mental. Mobility of Labour; Factors affecting Mobility. The Theory of Population.
- The Importance of Capital. Fixed and Circulating Capital. Conditions affecting the accumulation of Capital. Method of the Investment of Capital.
- Organisation of Production: Division of Labour, its advantages and disadvantages. Large Scale Production; its advantages and limitations. The use of Machinery and its consequences for the Labourers.
- The Localisation of Industry; its causes and advantages.

 The Law of Substitution. The Law of Increasing Returns

Exchange:-

The Necessity of Exchange. The Meaning of Market. The difference between Value and Price. How is price determined. Demand price and Supply price. Market price and normal price. The Equilibrium of Demand and Supply and the Equilibrium price. Prime and Supplementary costs. Joint and Composite supply. Competition Monopoly. Kinds of Monopoly. Monopoly price.

Distribution :-

The Importance of Distribution. Rent, Wages, Interest and Profits. The Nature of Rent and how it is determined. Wages and how they are fixed. Real and Nominal Wages. Causes of variations in Wages. Net Advantages. The Nature of Interest. The Rate of Interest. Gross Interest and Net Interest. Risk bearing and Management. Lending and Borrowing as affifected by fluctuation of prices. The charges for Depreciation. The Nature of profits. Gross and Net Profits.

(2) Indian Economics.

Introducing:-

What is meant by Indian Economics. The Relation between Indian Economics and Economic Principles. Importance of the study of Indian Economics. The Natural Resources of the Country. Main Geographical Features and their Economic Importance. Important Social Institutions and their bearing on the economic life of the people.

Agriculture :-

The importance of Agriculture in India The present position of agriculture. Various problems connected with agriculture; Rural indebtedness: its causes and extent, and the remedial measures adopted and proposed. The co-operative movement, its development and present position in India. Agriculture and Co-operation in Hyderabad.

Industries :--

Indian Industries in the past and their present condition. Causes of the downfall of Indian Industries. The recent signs of industrial revival. The problems of fiscal policy. Free Trade, Protection and Imperial Preference. The Labour Problems. Factory Legislation and Trade Unionism. The cottage Industries. Industries in Hyderabad.

Transport :--

Roads, Railways Shipping. A short history of Railways development and the present organisation of Railways. The condition of the Roads and measure towards their improvement. Condition of water transport in India. The development and present organisation of Railways in Hyderabad.

Trade:-

Expansion of Trade in India: domestic and foreign. The present trade situation. Chief imports and exports.

Banking and Currency:-

The meaning and functions of Money. The characteristics of good money. The use of precious metals for monetary purposes. Coinage. Standard and Token money. Legal Tender and Limited Legal Tender. Paper Money: convertible and inconvertible. Meaning of credit. Bills of Exchange. Cheques. The meaning and functions of a bank.

The Indian currency system. The meaning of a gold exchange standard and a gold bullion standard. The Government of India as the Currency authority of the Country. The relation between the Rupee and the Pound. The mechanism by which the value of the Rupee is maintained.

The meaning and functions of a Bank. The Indian Banking System: The Imperial Bank; the exchange Banks; the Indian Joint Stock Banks; the Indigenous Bankers The Reserve Bank of India

Currency and Banking in Hyderabad.

Public Finance:-

State Revenue and expenditure Principles of taxation. Direct and indirect taxes. Proportional and Progressive taxes. Public debt: how it is incurred and repaid. The sources of Revenue of the Government of India. Separation between Central and Provincial Finance. The Central Budget (general). The Railway Budget. The expenditure of the Government of India and of the Provincial Governments. The financial system of the Hyderabad State.

SOCIOLOGY.

Introductory:

Subject matter of the Science, its definition and interdependent relations with the Social Sciences. The meaning of Sociology. Its sub-divisions. The method of Sociology. The advantages of studying Sociology.

History:

A brief survey of the development of Sociology. Social Philosophy.

The Structure of the Society:

Various conceptions of, and different kinds of Society. The meaning of Society.

The Busis of Society:

Family. Groups, Nationalities, Social Populations. Theory of Population Over-population and under population.

The Nature of the Society:

Human Nature. The Individual and the Group Mind. Social Processes:

Individual social processes (Influenced by factors like Climate, Resources, Environment, Occupation, etc.).

Socialization:

Imitation. Compulsion. Sympathy. Interest and Antagonism. Adaptation.

Individualization:

Differentiation. Opposition. Class struggle. Commercialization. Professionalization.

Social Conflict:

Conflict of interest. Exploitation.

Social Reconstruction:

Social Interactions. Crossfertilization of Culture.

APPLIED SOCIOLOGY.

Introductory:

Secretal Sociology and Applied Sociology. The meaning and Scope of Applied Sociology. Its relations to State, Economics, and Ethics. Justification of Applied Sociology.

Wealth and Welfure:

The Monning of Wealth and Wolfare. Criterion of Welfare. Theories of Welfare (Bentham, Mill, Pigon).

Poverty and Pauperrism:

Causes of Poverty. Its immediate remedies. Extent of Poverty. The Poverty Problem.

Vice and Crime:

Remedies of Vice and Crime. Remedies of Vice and Crime.

Social Pathology:

Social decadence. Degeneration. Intemperance. The Abnormal.

Social Reforms:

Principles of Social Reform.

GEOGRAPHY.

1st Paper:-

- 1. The Physical Basis of Geography:-
 - (a) The Earth as a planet, shape, size, and motions; the inter-relations of the Sun, the Moon, and the Earth; rotation and revolution and the results thereof; Latitude and longitude and measurement of time, the general structure of the Earth.
 - (b) Atmosphere; its composition; the local and world distribution of pressure, temprature and humidity, the circulation of the atmosphere—permanent, seasonal and local winds. The collection of meteorological data and preparation of weather charts and climate maps. Types of climate.
 - (c) The Hydrosphere; the form, extent and distribution of the oceans, depth, composition of sea-water, distribution of salinity and temperature; movement of seawater, waves, tides, currents; coral reefs and islands.
 - (d) The Lithosphere; land forms; material of the earth's crust; of the forces that shape it; soils, changes in the earth's crusts; elevation and subsidence; the agencies and process of denudation; rivers and the development of river systems; sub-soil water; snow and ice; lakes. Wind as an agent of transport and deposition; volcanoes and earthquakes; shorelines; rising and sinking coasts; deltas and estuaries.

2. Regional Geography:-

- (a) Division of the World into major natural regions; coastal outline, relief, river systems, climate, vegetation.
- (b) Political regions of the world; comparison with the major natural regions; population and communications.
- (c) The Indian Empire; coast line, relief, climate, vegetation; population and communications.
- 3. Economic Geography with special reference to India;
 The World distribution of important commodities such as rice, wheat, cotton, wool coal, iron, tea, coffee, tobacco, rubber, petrolem, Conditions of their growth, growth of industries; trade centres and trade route; course of power. Factors affecting transport, ex-

change of commodities and the localization of major industries. The World position of India; its natural resources; its economic development.

2nd Paper :--

1. Cartography; The map-work should be carried on in connection with the general and regional geography and should include.—The study of topographical maps, including section drawing as exemplified use and study of Atlas maps, including the advantages and disadvantages of the principal projections employed, climate and weather maps, cartographical and diagrammatic representation of geographical data.

2. Bio-geography:-

- (a) Natural vegetation regions; woodland, grassland, deserts and mountain vegetation.
- (b) Geography of animal life:—distribution of animals in World with special reference to habitate and ecology of typical animals.
- (c) Anthropo-geography:—Distribution of the chief races of mankind, racial characteristics; influence of geographical environment on the life, occupation and character of peoples with special reference to England and India.
- 3. Elementary History of Geographical discovery and exploration with special reference to the British Possessions.

Logio.

Deductive Logic.

1. Problem of Logic.

Defination and Scope.

Relation of Logic to other sciences.

Logic as material and formal.

2. Thought.

Essential nature and its forms.

Laws of thought as psychological and logical.

Judgment and prosposition.

3. Concept.

Its relation to Judgment.
Concept and name.
Name of term.
Kind of terms.
Nomenclature of Predicables.

4. Propositions.

Its Classification.

Distribution of terms in a proposition.

Opposition of Propositions.

Immediate Inference.

5. Mediate Inferences and their Varieties.

Syllogism, its nature and its constituent parts.
Rules of syllogism.
Figure and mood.
Determination of valid moods and their different methods.

6. Fallacies.

Their calssifications.
The nature of each fallacy.

INDUCTIVE LOGIC.

1. The Problem of Induction.

Inductive process and its different forms.

Assumptions of Induction.

Laws of Causality and Uniformity of Nature.

2. Preliminaries of Induction.

Observation and Experiment.

Methods of Induction.

3. Scientific and Imperfect Induction.

Induction by Analogy, its nature and value.

4. Hypothesis.

Its formation and use.

Conditions of Legitimate Hypothesis.

Explanation of Deduction and Induction and their connection.

5. Hallacies.

111

Varieties of Inductive fallacies. The nature of each Variety.

353

BOOKS TO BE CONSULTED.

Stout.-Groundwork of Logic.

Jevons.--Elementary lessons in Logic.

Minto.-Logic.

Carreth Read.—Logic-Deductive and Inductive.

Fowler .-- Inductive Logic.

Jevons .- Studies in Deductive Logic.

Psychology.

- 1. The Problems and methods of Psychology.
- II. The Psychophysical organism and the Nervous System.
- III. Mind, Nerval action and habit.
 - IV. Attention, Discrimination and Association.
 - V. Sensation :-
 - 1. Visual.
 - 2. Auditory.
 - 3. Cutaneous.
 - 4. Taste.
 - 5. Smell.
- VI. Perception.
- VII. Preception of Space and Time.
- VIII. Imagination.
 - IX. Memory.
 - X. Conception and Reasoning.
 - XI. Feelings.
- XII. Reflex Action and Instinct.
- MIII. The Naure of Emotions.
- XIV. Elementary Features of Volition.
- XV. Character and Will.
- XVI. The self.

Privsics.

Dynamics.—The units of length and time. Displacements, speed, velocity, and uniform acceleration of particle moving in a straight line. Momentum. Newton's Laws of motion; the units of mass and force. Hick's ballistic balance. Motion of a particle in a straight line under the action of a force in that line

and in a vertical plane under the action of gravity. Energy, work, power, and their units; simple illustrations of the conservations of energy from Dynamics.

Conditions of equilibrium of a body under three con-current forces (the parallelogram and triangle of force) and under parallel forces. Centre of gravity. Simple machines. The balance and its sensibility.

The motion of a simple pendulum (studied experimentally), deductions from the formula for the time of oscillation of a simple pendulum.

General properties of matter.—Extension, intertia, gravitation, divisibility, porosity, elasticity, cohesion, ductility, malleability, brittleness; plasticity, viscosity. The three states of matter. Changes of state produced by heating and cooling.

Elasticity.—Its definition. Distinction between solids and fluids owing to difference in elasticity.

Hydrostatics.—Pressure at point in a fluid; definition and illustration, transmissibility of pressure. Evaluation of pressure at a point in a heavy fluid at rest; its uniformity in all directions. Resultant thrust in simple cases. The principle of Archimedes, floating bodies, hydrometers. Applications to practical determination of density and specific gravity. The pressure of a gas and its determination; the barometer and its use in the measurement of atmospheric pressure. Boyle's Law, air pumps and water pumps.

Heat:—Temperature and its measurements; the construction and graduation of thermometers. The thermal expansion of soilds, liquids and gases and their accurate determination; the air thermometer. Heat as quantity; the unit of heat; specific heat and the more direct methods of calorimetry. Laws of fusion, evaporation and ebullition; latent heat. Vapour pressure and how it is measured. Saturated and unsaturated vapours. Conduction and convection of heat; definition of thermal conductivity. Radiation; absorption and reflection; Law of cooling. The dynamical equivalent of heat; the conservation of energy.

Light:—The rectilinear propagation of light, formation of shadows, images in pin-hole camera. The experimental facts and laws of reflection and refraction of light; simple geometrical deduction from these, applicable to small direct pencils incident on plane and spherical surfaces. The eye and ordinary defects of vision. Magnifying power. Applications to thin lenses. The telescope and microscope. The dispersion of light; the

spectroscope. Radiation and absorption of spectra. Critical angle and total internal reflection. Determination of refractive indices.

Magnetism:—Properties of magnets; poles, law of magnetic-force, unit poles, lines of force; uniform magnetic fields and experimental methods of comparing them. The magnetic moment of a magnet. Comparison of magnetic moments! The earth's magnetic field; the compass. Magnetic induction The magnetic properties of iron and steel.

Electricity:—Electrified bodies; electric quantity. Conductors and insulators. Distribution of electricity on conductors. Induction Laws of force between two small charged spherical conductors. Line of electrostatic force, the electric field. Electric force and electric potential. Difference of potential. Electric condensers and capacity. Dielectric constant.

The more common forms of voltaic cells and the actions of go on in the cells while producing a current. Polarization of cells and methods of preventing it. The action of currents on magnets; galvanometers depending on such action, including suspended coil type. Metallic (Linear) conductors and electrolytes; laws of electrolysis. Electromotive force, Ohm's Law; resistance and the simpler methods of determining it. Measurement of current and comparison of Electro Motive Forces. Distribution of energy in cicuit by current and heating effects. Eeletro-magnets.

Sound:—Simple vibratory motion. The production and propagation of sound; the velocity of sound in air, and its determination of sound; the velocity of air and its determination. Nature of wave motion and sound waves. Frequency of vibration, pitch. Amplitude of vibration; loudness. Laws of vibration of strings and air columns, Interference of sound waves and heats

PRACTICAL PHYSICS.

Length measurements by millimetre scale, vernier micrometer, guage and spherometer.

Determination of areas and volumes by measurement of linear dimensions

Verification of conditions of equilibrium of a body under coplaner forces.

Determination of the centre of gravity of a plate.

Verification of the law of a simple pendulum; determination of g.

The inclined plane; system of pulleys.

Use of balance, sensitive to .01 gram.

Determination of volumes by weighing water; determination of capacities of vessels.

Specific gravities of solids and liquids; use of hydrometer.

Determination of atmospheric pressure by taking reading of Fortin's Barometer and correcting for temperature.

Verfication of Boyle's Law.

Determination of fixed points of thermometer.

Determination of co-efficient of expansion of a rod.

Determination of co-efficient of apparent expansion of a liquid.

Expansion of air at constant pressure.

Co-efficient of increase of pressure of air with temparature at constant volume.

Curves of cooling; melting points.

Determination of specific heats of solids and liquids.

Latent heat of water and steam.

Determination of vapour pressure; boiling points.

Determination of the dew point by Regnault's and wet and dry bulb-hygrometers.

Comparison of thermal conductivities.

Radiation of heat from different surfaces.

Verification of the Laws of reflection of light.

Tracing the path of a ray of light through a block of glass and deduction of refractive index.

Focal length of concave and convex mirror.

Focal lengths of convex and concave lenses.

Measurement of the refractive index of liquid by measuring its apparent depth.

Measurement by spectrometer of the angle of a prism and the refractive index for sodium light.

Comparison of illuminating powers of different sources of light by the shadow and the grease spot photo-meters.

Tracing the lines of force in a magnetic field by the iron filings and also by means of a small compass.

Comparison of magnetic moments.

Comparison of strength of magnetic field by the method of vibration.

Study of the simple cell, the Daniel and Leclanche cells;

Absolute measurement of current (i) by tangent galvanometer (ii) by electrolysis.

Measurement of heat developed by current.

Measurement of resistance of wires.

Comparison of electromotive forces; the potentiometer.

Comparison of frequencies of turning forks.

Verification of laws of transverse vibration of strings.

Determination of velocity of sound by resonance of air columns.

CHEMISTRY.

Theoretical.

Inorganic.—

Elementary and compound substances, mixtures, solution, chemical action, the laws of multiple and definite proportions, determination of equivalent weights. Dalton's Atomic Theory, atomic weights. Combination of gases by volume. Avogardro's Hypothesis. Vapour density, determination of molecular weights.

Valency, relation between equivalent and atomic weights.

Boyle's Law, Charles' Law, Vapour Pressure, Diffusion.

Chemical symbols, formulæ and equations, calculations of an easy nature.

Combustion and the structure of flame.

Oxidation and Reduction.

Catalysis.

Elementary ideas as to the nature of dissociation in gases and liquids, lonic Theory treated in an elementary way.

Outlines of the Periodic Law.

The chief physical and chemical characters, preparation and properties of the following elements and compounds with as far as possible proofs of the composition of the compounds:—

Hydrogen, water, hydrogen peroxide, oxygen, ozone.

Nitrogen, the atmosphere, animonia, nitric acid and intrates, nitrous acid and nitrites, the oxides of nitrogen, earbon, marsh gas, ethylene, acetylene, carbon dioxide, carbon monoxide, coal gas; chlorine, hydrochloric acid, chlorides, oxides and oxyacids of chlorine, bleaching powder, bromine, nodine, and their hydracids.

Sulphur, sulphuretted hydrogen, and sulphide, oxides of sulphur, sulphuric acid and the sulphates, sulphurous acid and the sulphites, thiosulphates.

Phosphorus, phoshuretted hydrogen, oxides of phosphorus, acids phosphoric.

Boric acids, silicon, silica, silicates, glass, arsenic, hydride and oxides of arsenic.

A brief description of the following metals, important technical methods of their preparation, their applications, rhief compounds, uses and tests:—

Sodium, Potassium, Ammonium radical, Calcium Magnesium Zine, Copper, Lead, Mercury, Aluminium, Silver, Tin and Iron.

Organic.

Systematic study of the modes of occurrence, preparation, general properties and constitutional formula of the following:

Methane, Ethane and their derivatives, viz. haloid compounds, alcohols, ethers, aldehydes, ketones, monobasic neids, oxalic, succinic, tartavic, and citric neids. Ethylene acetylene, amines, glycin, cane sugar, dextrose, levulose, starch, glycerol. Fats and vegetable oils, sonps, urea and uric acid, henzene, its chief derivatives. viz. nitro and amino compounds. Phenol, benzaldehyde, henzoic acid, salicylic acid.

Practical,

Students are expected to do the following experimental work. An account of each experiment must be written by the student in a special note-book and regularly initialled by the Locturer or the Professor-in-charge. These note-books shall have to be submitted to the Examiner at the time of the University Examination.

(1) Fitting up of simple apparatus.

(2) Simple chemical manipulations, such as filtration, distillation, decantation, crystallization, etc.

- (3) Use of the chemical balance.
- (4) Investigation of common materials, such as salt, lime-stone, allm, blue vitriol, etc.
- (5) Preparation and properties of the following:—
 Ilydrogen, Oxygen, Nitrogen, Chlorine, Hydrogen
 Chloride, Carbon Dioxide, Carbon Monoxide, Nitrous
 Oxide, Ammonia.
- (6) Determination of the water of crystallization.
- (7) Determination of equivalent weights of simple elements.
- (8) Preparation of simple salts.
- (9) Effect of heat on single substances and mixtures.
- (10) Qualitative analysis of single salts.
- (11) Simple exercises in Volumetric analysis, comprising.
 - (a) Alkalimetry and acidimetry (b) Estimation of ferrous iron and oxalic acid by means of permanganate (c) Estimation of chlorine ions by means of silver nitrate solution.

BIOLOGY.

Zoology :---

Living and non-living matter. The distinctive properties of protopalasm and its chemical composition. A general conception of the structure and phenomena of the animal cell; direct and indirect cell division. The union of cells to form tissues and the combination of tissues to form organs.

An elementary idea of the doctrine of Evolution with an explanation of the following terms: Variation, Heredity, natural Selection and Recapitulation theory.

A general classification of the animal kingdom with the characteristics of the principal phyla. The general characters of the Chordata.

Sexual and asexual methods of reproduction. The elementary facts of fertilization and segmentation of the ovum in frog. The formation of three primary germinal layers and their subsequent fate.

The trog as a type of higher animals. The elements of vertebrate histology, illustrated from the frog. Elementary facts of Physiology. The outlines of the metamorphosis of frog.

Anacha and Malaria parasite as types of Protozoa. Hydra as an Example of the Metazoa. The principles of the Physiological division of labour and the correlated differentiation of structure.

Pheretima as an example of segmented animals. The significance of the three primary germ-layers and of the coelom.

The Cockroach as a type of Arthropoda. Metamorphosis amongst insects as illustrated by the life histories of the house-fly (Musca) and the common mosquito, and their economic importance.

General characters of Aves. An elementary konwledge of the anatomy of the Rabbit as a type of Mammallia.

Difference between the poisonous and the non-poisonous snakes.

Practical.

Candidates will be required to dissect describe or examine miscroscopically the following types; Ameba, Parameeium, Hydra, Pheretima, Cockroach, Frog (and its skeleton) and Rabbit (and its skeleton).

A microscopical study of the chief animal tissues from prepared slides of epithelium, muscle, nerve, cartilage, bone, blood and other councetive tissues, and also that of the kidney, liver, spinal cord, stomach, intestine, overy and testis of frog.

They will be also required to submit the original sketchbooks, initialled and dated by their teachers, determining the result of the examination.

Botuny :---

The distinguishing features of living and non-living bodies.

The description and the minute structure of a vegetable cell.

Chemical and physical properties of protoplasm, direct and indirect division of a cell.

Description of the maseroscopic and microscopic appearance of root, stem and leaf.

General description of flower, inflorescence and branching, fruit, seed and dispersal of seeds of the types studied.

Transpiration, respiration and absorption in plants.

Reproduction in plants.

Elements of classification.

Description and practical knowledge of the structure, function and life-history of Yeast, Mucor, Spirogyra Fern, Cycas, Maize and Sunflower.

N.B. Students are expected to keep a record of all practical work in a special Laboratory Note-book which will be liable to Examination by the University Examiners. The laboratory Instructors should sign the result of such day's practical work.

MATTERNATURE.

Algebra. -

Ratio, proportion and variation.

Progressions, including the summation of squares and cubes of natural numbers.

Surds and elementary properties of imagniary quantities including the cube roots of unity.

Solution and theory of quadratic Equations. Quadratic Expressions. Easy Equations solvable as quadratics, including easy simultaneous quadratic equations.

Permutations and Combinations (easy treatments.)

Binomial Theorems for positive integral index. Statement and application of the Binomial Theorem for negative and fractional indicies, with elementary notions of convergence. Logarithms of numbers.

Trigonometry.

Sexagesimal and circular units of angular measurement.

Trigonometrical ratios of any angle and simple relations connecting them.

Periods and graphs of trigonometrical functions. Graphical solution of simple trigonometrical equations.

Addition and subtraction formulæ. Logarithms of trigonometrical ratios and the use of trigonometrical tables. Properties and solution of triangles with the use of tables. Simple cases of heights and distances in two and three dimensions.

Radii of circumscribed, inscribed and escribed circles of a triangle.

Inverse circular functions (principal value).

Geometry.-Plane .-

The feet of the perpendiculars on the sides of a triangle from any point on the circumcircle are collinear.

The existence and simpler properties of the nine points circle.

If ABC be a triangle and AD a median.

$$AB^2+AC^2-2(BD_2-AD^2)$$

If ABC be a triangle and AD the bisector of angle A.

If ABC be a triangle and AD the perpendicular from Λ on base and AE the diameter of the circumstructe, then

If ABC be a quadrilateral inscribed in a circle, AC. BD. AB. CD+BC. AD.

If two rectilinear figures are similar, they can be so placed that the lines joining their corresponding vertices are concurrent.

If two rectilinear figures are similar their corresponding sides and diagonals are proportional and their areas are proportional to the squares of corresponding sides.

Every straight line which passes through the extremities of two parrallel radii of two fixed circles passes through one or other of two fixed points.

If A, B, C, D be four points taken in order on a straight line.

AB.CD+BC.AD+CA.BD =0

Simple properties of cross ratios and harmonic section.

If a straight line be drawn from a given point to cut a given circle, the intersection of the tangents at the two points of section always lies on a fixed straight line.

If the polar of A passes through B, then the polar of B passes through A.

Determination of the locus of points from which the tangents drawn to two given circles are equal.

The radial axis of three circles taken in pairs are concurrent. Construction of the radical axis of two given circles.

To draw a circle to touch a given circle (0), and also to touch a given straight line PQ at a given point A.

To draw a circle to pass through two given points A&B and to touch two given straight lines AB, AC.

Ceva and Menelans' theorems about concurrency and collinearity ,with simple applications.

Elementary maxima and minima (geometrical treatment). Geometry.--Solid.

Elementary properties of lines and planes.

Solid figures. Regular polyhedra.

Surfaces and volumes of parallelepipeds, prisms, pyramids, elyinders, cones and spheres.

Geometrical Conics .-

Tracing of Parabola, Ellipse and Hyperbola from the definition.

Simple common properties of the conic sections:-

If a straight line cut a conic, whose focus is S, in points P and P1 and the directrix in D, then SD will be equally inclined to SP 1 and SP 1

The portion of a tangent to a conic intercepted between its point of contact and a directrix, subtends a right angle at the corresponding focus.

Tangents at the extremities of a focal chord of a conic intersect on the corresponding directrix.

If from any point T on the tangent at a point P of a conic TH be drawn perpendicular to the directrix and TK perpendicular to the focal distance SP, then the ratio SK: TH will be equal to the eccentricity.

To draw tangents to a conic from an external point.

The normal at P to a conic meets the transverse axis in G, then SC · e. SP.

Parabola.---

Latus rectum is four times the focal distance.— PN: 4 AS. AN. The tangent bisects the angle between the focal distance and the perpendicular on the directrix.

The tangents at the extremities of a focal chord intersect at right angles on the directrix.

The substangent is bisected at the vertex.

The subnormal is equal to half the latus rectum.

The locus of the foot of the perpendicular from the focus on any tangent is the tangent at the vertex.

The locus of the middle points of parallel chords is a straight line, parallel to the axis, passing through the point of contact of the tangent parallel to the chords.

Ellipse.--

$$\begin{array}{ccc}
CS.CX^2 & = & CA^2 \\
PN^2 & & CB^2
\end{array}$$

$$\begin{array}{ccc}
AN.^2 A'N. & CB^2 \\
CB^2 & = & SA.SA.^1
\end{array}$$

$$\begin{array}{ccc}
SP + S'P & = & AA^1.
\end{array}$$

The curve is symmetrical with regard to the minor axis and has a second focus and corresponding directrix.

The locus of middle points of parallel chords is a straight line passing through the centre and the points of contact of tangents parallel to these chord.

The tangent at any point makes equal angles with the focal distance of the point.

The locus of the feet of the perpendiculars from the foci on any tangent is the auxiliary circle.

Note.—Proofs with the help of projection will be accepted.

Hyperbola.—

The difference of the focal distances of any point on a hyperbola is constant.

The tangent at any point makes equal angles with the focal distance of the point.

The locus of the feet of the perpendiculars from the foci on the tangents is the auxiliary circle.

Co-ordinate Geometry .-

Rectangular axes only.

Meaning of a graph.

The equation of a straight line. Two straight lines, given by the general equation and the angle between them.

Circle.—General equation.

Circle through three points, chord, tangent, intersection of a straight line and a circle chord of contact, pole and polar and condition of tangency.

Equation of parabola, ellipse and hyperbola referred to principal axes.

Intersection of a straight line with a conic and condition of tangency. Tangent and normal. Very simple treatment required.

Calculus .--

Idea of limit and continuity.

Differentiation of elementary algebraic, trigonometric, exponential and logarithmtic functions and their simple combinations. Successive differentiation excluding Leibnitz theorem.

Geometrical application to the tangent and normal properties of conics and other simple curves.

Integration as the inverse of differentiation, Integration of simple standard functions by simple substitution. Evaluation of definite integrals by substitution of limits.

B. A. EXAMINATION.

I. MATHEMATICS.

Algebra.—Interest and annuities, inequalities, simple tests of convergence of series, partial fractions, summation of series; continual fraction; indeterminate equation of the first degree.

Theory of Equations and Determinants.—Relations between the roots and coefficients of an equation; easy transformations, (lardon's solution of the cubic equation, solution of the biquadratic equation; solution of numerical equation by Horner's method. Development and elementary properties of determinants, and their applications to the solution of linear simultaneous equations and in elimination.

Trigonometry.—De Moivre's Theorem; expansions of trigonometric functions; hyperbolic and inverse functions; summation of series; expression of trigonometric and hyperbolic functions as infinite products.

Pure Geometry.—Concurrency and collinearity, harmonic ranges and pencils; properties of a complete quadrilateral and complete quadrangle; properties of a circle; pole and polar; coaxial circles; inversion; orthogonal projection applied to derive the properties of ellipse from those of the circle.

Analytical Geometry of two dimensions.—Cartesians and polar co-ordinates; transformation of axes; straight line; circle; parabola, ellipse, hyperbola; the general equation of second degree; tangents; normals; focii; directrices; conjugate diameters; parametric representation; tracing of curves given by general second degree; polar equations of conics.

Analytical Geometry of three dimensions.—Equations of the plane and the straight line; standard forms of the equations of sphere and ellipsoid.

Differential and integral calculus.—Limits and continuity of functions; differentiation (standard forms); successive differentiation; mean value theorem; Taylor's and Maclauron's theorem (with remainder) for a single variable; expansion of functions in power series; indeterminate forms; partial differentiation; maxima and minima of a function of a single variable; curvature; asymphotes; envelopes; curve tracing.

General methods of integration; standard forms; reduction formulæ; rectification of curves quadrature; surfaces and volumes of solids of revolution; approximate evaluation of definite integrals (Simpson's rule); elementary notions of double and triple integrals and their use; centre of gravity and moment of inertia.

Differential Equations.—Formation of a differential equation, ordinary and partial; equation of the first order (standard forms); linear equations of any order with constant coefficients; homogeneous linear equations; simple trajectories.

Statics.—Composition and resolution of forces; parallel forces, general conditions of equilibrium of a body under coplanur forces, centre of gravity and stability; work; virtual work; friction; simple machines.

Graphical Statics.—Funicular polygon; link and force polygon; shearing force and bending moment; stresses in a framework.

Dynamics.—Uniform and accelerated motion, laws of motion; impulse and impulsive forces; kinetic energy and potential energy; conservation of energy and momentum; projectiles; collision of elastic bodies; hydograph; tangential and normal acceleration; radial and transversal acceleration; elementary treatment of central orbits; simple harmonic motion; motion on a smooth curve; simple pendulum; units and dimensions.

Hydrostatics.—Fluid pressure at a point; centre of pressure; resultant pressure in a given direction; equilibrium of floating bodies, stability and metacentre; specific gravity; Boyle's and Charles' laws about gases; mixture of gases; barometer, homogeneous atmosphere; simple application of hydrostatics to machines such as diving bell, water pump, air pump, syphon and hydraulic press.

Astronomy.—Apparent motion of the heavens, principal constellations and the most conspicuous stars; celestial sphere; horizon, zenith; poles, meridian equinoxial points, solstices; astronomical lock, transit theodolite, sextant, chronometer; altazimuth; magnitude of the earth; apparent annual motion of the sun; constellations of the zodiac; the ecliptic and its obliquity; seasons; sideral time; solar time; equation of time, conversion of time.

Refraction; twilight; parallax; aberration, precession; and nutation (simple explanation); determination of clock error and rate by observation; determination of right ascension and declination of a heavenly body; latitude and longitude of a station; solar system and the motion of the planets; Kepler's laws; comets and meteors; motion of the moon and her phases; nodes; moon's sideral and synodic period; eclipses of the sun and the moon; calendar; the use of the nautical almanac.

Astrophysis.—Laws of reflection and refraction of light; lenses; astronomical telescope; dispersion; achromatism; axial rotation of the sun and planets; study of the surface of the sun; sunspots; spectroscope; Doppler's principles; chemical elements in the sun; spectrum of sunspots; chromosphere, prominences: corona; sun's light and heat.

Star magnitudes, photometry; variable stars; novac; stellar spectra; star clusters; nebulæ milky way, theories of solar and stellar evolution.

II. HISTORY.

Paper III.—(B) Elements of the Cultural History of India.

(i) Ancient up to 1206.

Kantilya and his Socio-Political Philosophy.

Asoka: Orginator of a new ideal for the Government.

Preacher of new ethical values for the society and popular educator.

Earliest Budhist Art: Marya and Sunga.

Gupta Period: Drama and Art.

Harsha—India's Social, Intellectual and religious life in the 7th Century..

(ii) Medieval Perrod 1206-1764.

Rise of Islam: Islamic Social and Political Philosophy and Ideals.

Early Contact: Intellectual and Religious, between India and the Islamic Countries.

Peaceful penetration of Islam in India and Muslim Colonies.

The rise of the Muslim power in India and its nature and significance.

Social movements and salient features of the fusion of cultures: Hindus and Islamic.

History of the Muslim Art-Architecture and Painting.

(iii) Modern Period 1765 to the present day.

Rise of British Power in India and its effect on India.

Attempts at the Westernisation of India: The spread of Political Ideas and the introduction of Western education.

Social movements and their significance.

The Growth and Development of Indian Nationalism.

Paper IV.—History of Indian Culture.

Brief Outline of Pre-Aryan Civilisation.

Aryan Civilisation: Its Social, Political, Religious and Economical Aspects.

Age of Religious Struggle and its significance.

Mauryan: Political and Social Ideas and Ideals.

Origin of Indian Drama and the value of Gupta Art.

Brief Survey of the religious and social conditions in India in the 7th Century.

Intellectual and Religious Contacts between India and the Islamic Countries.

Peaceful Penetration of Islam in India.

The rise of the Muslim Political Power in India and its nature and significance.

Social Movements and salient features of the fusion of cultures: Hindu and Islamic.

Short History of the Muslim Ast—Architecture and Painting.

Contact of the Eastern and Western Civilisations.

Result of such a Cultural contact Political, Social and Educational Problems.

The growth and development of Indian Nationalism.

Paper VI.

GENERAL ECONOMICS.

Introductory.—Subject-matter of the Science and its definition. The divisions of the Science and their interdependence. Definition of wealth, capital, land, labour, utility, value and price.

Land.—Qualities and characteristics. Its difference from capital. The Law of diminishing returns. Land improvements. Land values and Economic progress.

Labour.—Distinctive qualities. Skilled and unskilled labour. Conditions of efficiency. Mobility of labour. The Law of population.

Capital.—Qualities, conditions of accumulation.

Production.—The three agents and the extent to which they are needed. Production on a large and small scale. The Employer. Machinery. Principle of substitution: Localisation of industry. Law of increasing returns. Law of constant returns.

Consumption.—Wants. Interdependence with activities. Necessaries and Luxuries. Diminishing utility. Consumer's surplus. Elasticity of demand. Fashion and custom.

Exchange.—Difinition and criteria of a market. Demand and supply. Marginal supply and demand. Prices. Equilibrium of demand and supply. Influence of time. Wholesale and retail prices. Dealers and Speculators.

Distribution.—Analysis of interest, profits, rent, and wages. Gross, and net interest. Normal rate of interest and the changes

in it. Interest paid by agriculturists. The Classical Theory of rent. Its application to Indian conditions. Relation of rents to prices. Limitation of rents by Legislation. Real and nominal wage. Net advantages. Normal rate of wages. Changes in nominal wages. Effect of a rise in wages. Earnings of specialised occupations. Earnings of Management. The National dividend.

INDIAN ECONOMICS.

Introductory.—Natural environments and how they moulded reconomic life in India. Special features of Indian Sociology and its condition with Indian Economics.

Production.—Special features of the factors of production in India. The condition of agriculture and means of its improvement. Forest, Mines, Indian animals; their economic importance. Manufactures in India, causes of their decay, suggestions for improvement. The place of foreign capital in the development of Indian Industries. Large scale verses small scale production. The Industrial Revolution. Factory labour. The beginning of the Labour problem.

Distribution.—Theory of distribution and its applicability to Indian conditions. Rent, Agricultural rents and Mining rents. Wages, connection between prices and wages. Interest, bank rates. The money-lender. Need of credit. Co-operative credit.

Exchange.—Currency, history of rupee, paper currency system, gold exchange standard, gold standard reserved. Home charges, council bills and reserved council. Advantages and weaknesses of the Indian Monetary system. Rate of Exchange. The nature and causes of the difficulties experienced during and after the War. Banking. Short history of the growth of Banking in India. Various classes of banks and their business. The Imperial Bank of India.

Consumption.—The standard of life. Effects of consumption on production. The necessary reforms.

Taxation.—Principles of taxation. Direct and indirect taxation. The Indian Financial system. The Budget and the annual financial statement. Public loans.

The State and Economics.—The Land revenue system, zamindari and raiyatwari tenures. Tenancy legislation. Famines—causes and effects, measures for prevention. The Co-operative movement in India; its benefits; its progress. Railways; history of their development; their present position and future prospects; the problem of State versus private railways; the bearing

of railway policy on the indigenous industries of the country. Irrigation; present condition: major and minor works; productive and protective works; prospects of future development. The State in relation to industry. Freetrade and Protection. India and Imperial preference. The effects of war on the various phases of economical life in India.

SOCIOLOGY.

Introductory.—Subject-matter of the science, its definition and interdependent relations with the social sciences. The meaning of sociology. Its subdivisions. The method of sociology. The advantages of studying sociology.

History.—A brief survey of the development of sociology, social philosophy.

The Stucture of Society.—Various conceptions of, and different kinds of society. The meaning of society.

The Basis of Society.—Family. Groups. Nationalties. Social population. Theory of population. Overpopulation and underpopulation.

The Nautre of Society.—Human nature. The Individual and the Group Mind.

Social Processes.—Individual social processes (Influenced by factors like climate, resources, environment, occupation, etc.).

Socialization.—Imitation, Compulsion. Sympathy. Interest and antogonism. Adaptation.

Individualization.—Differentiation. Opposition. Class struggle. Commercialization. Professionalization.

Social Conflicts.—Conflict of interests. Exploitation.

Social Reconstruction,—Social interactions. Cross-fertilization of culture.

APPLIED SOCIOLOGY.

Introductory.—General sociology and applied sociology. The meaning and scope of applied sociology. Its relations to State economics, and ethics. Justification of applied sociology.

Wealth and Welfare.—The meaning of wealth and welfare, criterion of welfare. Theories of welfare. (Bentham, Mill Pigou).

Poverty and Pauperism.—Causes of poverty. Its immediate remedies. Remedies of vice and crime,

Social Pathology.—Social decadence. Degeneration, Intemperance. The abnormals.

Social Reform .- Principles of social reform

III. ECONOMICS

Paper 1-Principles of Economics.

Introduction:—The Nature of Economic Phenomena. The significance of Economic Science. General conditions of Economic activity. Methods of Economic analysis.

Wants and their satisfaction:—A general view of consumption. Law of diminishing utility. Variation in the intensity of demand. Influences affecting demand: Distribution of means between gratification of different wants. The concept of consumer's surplus.

Productions Fundamental conditions of the wealth of society. Agents of production and their classification. Land and natural resources. The number and quality of the people. Theory of population. Supply of labour and the Iron Law of Wages. The Nature of capital. Direct and indirect production. Business organisation. Specialization of labour and land, Large scale production. External and Internal Economics. The Laws of increasing and decreasing returns.

Exchange:—Relation of production and exchange. The more important theories of value. Laws of supply and demand. Marginal utility and marginal cost. Value during long and short period: the concept of normal value. Joint and composite demand: Joint and composite supply. Value under Monopoly.

Distribution:—General theory of distribution. Theories of Wages, Interest, Profit and Rent.

History of Economic Thought: A brief view of the more important schools of Economists.

Paper II.-Money, Banking and International Trade.

The nature and functions of money. The value of money. The quantity theory of money. Currency System. The question of the Standard. Banks and their functions. Brief history and present position of Indian Currency and Banking. Theory of International values. Foreign Exchanges and equation of international indebtedness. India's Foreign Trade. Balance of trade and balance of account. Credit and Debit items in India's balance sheet. Examination of the 'Drain' theory,

Currency and Banking in Hyderabad.

Paper III.—Economic History.

- (a) Economic History of India since the break-down of the Moghal Empire.
- (b) Economic History of England, since the Industrial
 Revolution

The course will proceed on the following lines:--

- (a) (v) Economic Conditions in India in the early 18th Century.
 - (2) Economic History of India.
 - (i) Under the East Company and
 - (ii) Since 1857.
- (b) (1) England on the eve of, and during, the Industrial Revolution.
 - (2) The Problems to which the Revolution gave rise and their treatment, e.g., trade. unionism, factory legislation, poor relief, free trade, colonial policy, etc.

Faper IV.—Agricultural Economics and Co-operation.

(1) Economic problems of Agriculture in India. (Throughout this Course reference will also be to the conditions in Hyderabad). Definition of Agriculture. Importance of Agriculture in Man's Economic Life. Special significance of Agriculture in India on Economy. Present stage of Agriculture in India. Factors affecting Crop-production. Preservation of soil; the problem of soil erosion and of water-logging. Improvement of soil; the problem of manuring. Causes of the absence of the use of manures. Irrigation and their extent; the future of irrigation. The sub-division and fragmentation of agricultural land: the extent and causes of this evil and remedies for the future. Improvement of the quality of crops and the popularisation of improved varieties. The problem of Seed distribution. Protection of crops; internal and external. Motive power for agriculture. Importance of cattle in the agricultural economy of India and their present deplorable condition, its cause and remedies. Better feeding and the breeding of better species. Diseases of cattle and veterinary arrangements. Breeding of cattle forDiary purposes, present condition of Diary industry, use of improved implements and machinery. The marketing of agricultural produce. The present defective method of marketing and their injuries effect on the cultivator. Establishment of Regulated Markets. The Finance of Agriculture: Problem of Rural indebtedness; its causes and cures. Legislation as a means of removing rural indebtedness. Land-tenures and their influence on agricultural prosperity. Land Revenue Policy of Government, its bearing on the financial condition of the cultivators: The movement of Rural Reconstruction: Its aims and methods. Improving the social and intellectual as well as the economic environment of the Villager.

(2) Co-operation in India:—What is Co-operation? Co-operation and its alternatives. The objects of a Co-operative Society. Some outstanding achievements of the movements outside India; origin and development of Co-operation in India. Land marks in the history of Co-operation in India. Analysis of the present situation; the financial and administrative structure of the movement. Primary societies and their Classification. The Central Banks, the Provincial Banks and the Unions. The The All India Co-operative Institutes Association. Land Mortgago Banks, their present condition and future prospects; the law and practice of Co-operation. Co-operative book-keeping; The origin, development and present position of the movement in Hyderabad.

Paper V.—(a) Indian Industries and Trade.

(b) Public Finance.

(a) Industries and Trade: Present position of Industries in India. Cause of the Industrial downfalls, Scope for the development of new Industries. India's Industrial resources. Means of of bringing about industrial revival. Fiscal policy of The problem of Free-trade versus Protection. Discri-India. minate protection and its guiding principles. Imperial Preference; its objects and limitations. Technical and vocational Stores purchases policy. Activities of the Provineducation. cial Department of Industries. Appearance of Labour Problems in India. Factory Legislation: its history and present position. Workmen's compensation. Trade Unionism: the condition of Transport: Railways, their recent history and present policy. Roads versus Railways. The condition of water transport. Problems of Indian shipping. Cottage Industries: their present condition and future prospects,

Trade of India: external and internal. The character and direction of India's sea-borne trade. Coastal and Inland trade. Principal trade centres of India. Commercial intelligence and trade organisation.

(b) Public Finance, Economic functions of States. Public expenditure. Source of public revenue. General principles of Taxation, kinds of taxes. General structure of Indian Public Finance. Financial relations between the Central and Provincial Governments. Central Finance. Heads of Revenue and expenditure. Central (general) Budget. Railway Budget. Financial arrangements under the Federation. Provincial Finance: Heads of Revenue and Expenditure. Local Finance: inadequate resources of local bodies: its causes and means of improvement. Public expenditure in general and its criticism. The question of the burden of taxation.

The Revenue and Expenditure of Hyderabad State,

Sociology.

Paper VI.—(a) Theoretical Sociology.

(b) Applied Sociology and Indian Social institutions.

(a) Theoretical Sociology-

Introduction:—Subject matter of Sociology, its defination and interdependent relations with other Social Sciences. The scope of Sociology. Its subdivisions. The method of Sociology. Advantages of studying Sociology.

Structure and Basis of Sociology:—Various conceptions of, and different kinds of society. The meaning of Society. Individual and the family. Groups (the clan, the trible, the race, and the nation). Theory of Population. Under population and Over-population Problem.

The Nature of Society:—Human Nature. The Individual and the Group Mind.

Socialization:—Social processes (influenced by factors like Climate, Resources, Environment, occupation) Socializing factors: Imitation: Compulsion: Sympathy: Vanity: Adaptation.

Individualization:—Causes of defferentiation, Conflict of Interest. Opposition. Class Struggles. Commercialization Professionalization. Exploitation. Forms of Exploitation (Slavery and Serfdom). Subjection of Women, Castes and races).

Social Reconstruction: -- Social Interactions. Crossfertilization of culture. Interprovincialism and Internationalism.

History:—Social Philosophy. Social Psychology. A brief survey of the development of Sociology.

(b) Applied Sociology and Indian Social Institutions.

Introduction:—General Sociology and Applied Sociology. The meaning and scope of Applied Sociology. Its relation to Science, Economics, Politics and Ethics.

Wealth and Welfare:—The meaning of wealth and welfare, Criterion of welfare. The standards of Living and Comfort, Theories of Welfare.

Poverty and Pauperism: -- Causes of Poverty. Extent of Poverty. Principles of Relief. Private Philanthrophy and Un-organised Charity. Charitable Institutions and organised Charity.

Vice and Crime:—Meaning of Vice and Crime. Extent of Vice and Crime. Remedies of Vice and Crime.

Social Pathology: Social Decadence. Intemperance. The Abnormals.

Social Reform:—Principles of Social Reform. (Public Utility): Cultural Advantage: Protection Human Rights).

Indian Social Institutions: The Caste System. The Problem of the Depressed Classes. The Joint Family System. Merits and Defects of the Indian Social Institutions with special reference to their economic bearings and consequence. Social characteristics of the Indian People. Islamic Influence and Influence on Mohammadans of Indian Institutions. The Effects of British Rule and Western Thoughts on Indian Society.

IV.--Ришоворну.

IV.—Philosophy.		
Problems of Philosophy :		
I. What is Philosophy. Poetry and Philosophy. 2. Philosophy and Science. 3. Philosophy and Religion. 4. Method in Philosophy. (a) Is Philosophy possible or profitable? (b) Positivism. (c) Scepticism. (d) Mysticism. (e) Instrumentalism. (f) Logic analytical Method.		
(y) Deductive Method. (1) The Cosmos .1. Our Universe. 2. Space and time. 3. Space—Time. 4. Bergson Theory of Time 5. The Origin of Earth. (2) The Nature & Origin of Life. The Nature of Life. Mechanism. Vitalism. Emergent Evolution—The Theory of Levels. (3) The Philosophy of Evolution. Herbert Spencer. Lamarck. Darwinism. The assumption in Darwinism and its difficulties. (3) Monism 1. Materialism—Naturalism.		
Energetics. Contrological Contrological		

378

- (2) Dualism.
- (3) Pluralism.

	1. The sources of knowledge.—
IV. The theory of Knowledge or Epistemology.	Rationalism.
	(a) Metaphysical Rationa-
	lism.
	(b) Mathematical Ratona-
	lism.
	(Plato, Descartes, Spinoza,
	&c.)
	(c) Formalistic Rationa-
	lism (Kant).
	(2) Empiricism.
	II. The Validity of knowledge
	Realism.
	Idealism—subjective, objec-
	tive.
	III. Pragmatism—Doctrine of
	Truth.
	(a) Correspondence Theory of Truth.
	(b) Coherence " "
	(a) Progratistic
	((c) rrakmanamo),),

Indian Philosophy:--

- 1. The Philosophical implications of Vedic religion.
 - (a) The sense of the one in the many.
 - (b) The question of Monotheism and Pantheism.
 - (c) Cosmology.
- 2. Philosophy of the Upanishads.
 - (a) Concepts of Atman and Brahman
 - (b) Law of Karma.
 - (c) Ethics and theory of knowledge in the Upanishads.
 - (d) Beginnings of Sankhya, Yoga and other systems.
 - (e) Idealism and Realism.
 - (f) Philosophy of the Absolute.
- 3. Early systems of Religious Philosophy Gita-its doctrines.
- 4. Systems of Philosophy-Darshanas.
 - (a) Charvoka.

- (b) Buddhistic systems.
 - 1. Doctrine of Truth and Error.
 - 2. Theory of Boing and Dialectic.
 - 3. Ethical Disciplines.
 - 4. Philosophical standpoints.
- (c) The Nyya--Vaisheshika.
 - 1. Epistemology and Logic.
 - 2. Theory of Reality.
 - 3. Theory of Causation.
 - I. The automic theory—Arambha Vada.
 - 5. Psychology.
 - 6. The proof of existence of Soul and God.
 - 7. Apaverga and its means.
- (d) Sankhya-- Yoga.
 - 1. Classification and analysis of the Pramanas.
 - Theory of Reality Evolution and Involution. Pursha and Prakriti.
 - 3. Sat Karva Vada.
 - 4. Psychology—Parinama Veda.
 - 5. Practical philosophy.
 - 6. The Individual and the World.
 - 7. The question of Idealism.
 - 8. The concept of Ishwara.
- (e) Purva Mimansa.
 - 1. The Doctrine of Atman.
 - 2. Realism and Conceptualism.
 - 3. Different views of Mukti.
- (f) Uttra Mimansa (Advaita)
 - 1. Theory of knowledge, logic and dialectics.
 - 2. Brahma—Maya and Avidya.
 - 3. Theories of Creation-Viverta and Parinama.
 - 4. Ethical standard—Self Realisation, Nishkama Karma
 - 5. Steps of Realisation.
 - 6. Mukti.
 - 7. Saguna Brahma and Nirguna Brahma.
 - 8. Other Development.
 - (a) Vishishtadvaita.
 - (b) Dviata.
 - (c) Shudhavaita, etc.

Islamic Philosophy:-

- (1) Ilm-ul-kalam.
- (2) Pure Philosophy.
- (3) Mysticism.

A. Ilm-ul-kalam.—

- (1) Freedom and necessity.
- (2) The relation of Divine Being to its attributes.
- (3) The word of God created or eternal.
- (5) Prophethood and Revelation.
- (6) Substance and attributes.
- (7) The problem of values.

The above problems to be studied chiefly with reference to the teachings of Wasil ibn-i Ata, Abulhasan Ashari, Abul Huzail Allaf, Nazzam, Ghazzali, Ibn Rushd.

B. Pure Philosophy:-

Logic, Metaphysics and Ethics, Alkindi, Farabi, Ibn Sina, Ibn Rushd, Ibn Miskwaik, Shaikh-ul-Ishraq.

C. Tusawuf:-

The mystical elements in the Holy Quran and the Hadis. The special doctrines of Tasawaf.

Historical Inducaces.

The relation of Islamic Mysticism to non-Islamic doctrine like Neoplatonism, etc.

Psychology:—

- 1. Definition, Scope, Methods and Postulates of Psychology.
- 2. Psychology of the Nervous system.
- 3. Attention.
- 4. Sensations—General Nature.
- 5. Perception .-
 - (1) of space.
 - (2) of time.
 - (3) of Reality.

١

- 6. Imagination: Association, Dreams, Play.
- 7. Memory.
- 8. Conception.
- 9. Reasoning.
- 10. Intelligence-General Nature.
- 11. Feelings and Emotions.
- 12. Instinct.
- 13. Learning, and Habit Formation-Imitation.
- 14. Will.
- 15. Self.
- Nature of consciousness—Automatom theory, Behaviourism, Purposive Psychology.

B. Sc. EXAMINATION.

I Physics (Main).

Theory.—The course includes a more extended study of the matter included in the Intermediate Course and in addition the following:—

General Physics and Properties of Matter.

Uniform motion in a circle. The Hodograph. Simple Hormonic Motion-Composition of Simple Hormonic Motions. Angular Velocity and angular accelerations.

Angular momentum. Moments of Interia in simple cases. Gravitation. The Compound Pendulum and accounts of experiments to find the mean density of the Earth.

Elasticity. Hooke's Law. Compressibility of gases (at high and low pressure) and liquids. Compressibility and Rigidity of Solids. The Elastic Limits. Strain due to simple longitudinal pull. Young's Modulus and its expression in terms of 'k' and 'n'.

Bending in one plane of bars of simple and uniform crosssectional area. Simple twisting of wires of circular cross sectional area by couple in plane at right angles to length. Torsional rigidity. Application to torsion balance and shafts—The Bifilar suspension.

Capillary phenomena and general theory of Surface Tension.

Diffusion of Liquids and Gases. Osmosis. Viscosity. The elements of Kinetic Theory and its application to explain the simple gas laws. Van der Waal's equation. Modern method of producting high Vacua and of measuring pressure in them,

Heat.—The methods of calorimetry and thermometry. Vapour pressures. Critical temperature. Conduction and diffusion of heat and the determination of constants, Radiation and Absorption. Laws of Cooling. Methods of measuring radiation. Stefan's Law. Laws of Thermodynamics and their simple applications. Entropy.

Light.—Velocity of Light. Photometry. Combination of two or more thin lenses. Thick lenses. Achromatism in lens system. The Telescope and the Microscope. Direct vision spectroscope. Rainbow.

The Wave theory. Simple Interference Phenomena. Huygen's Principle. Explanation of Rectilinear propagation. Reflection and Refraction of light. Action of mirrors, prisms and lenses reviewed from this stand point.

Simple Diffraction Phenomena. Diffraction Gratings and determination of wave lengths. Spectrum analysis. Line and Band Spectra. Elementary knowledge of Bohr's theory of Hydrogen Spectram. Doppler's Principle. Double Refraction and Polarisation of Light. Rotatory polarisation, Simple applications.

Magnetism.—Forces on a magnet in a magnetic field. Magnetic Moment and intensity of magnetization. Magnetic potential and equipotential lines and surfaces. Interaction of two short magnets. Determination of field strength.

Magnetic Shell. Its potential energy in a magnetic field-Magnetic induction in magnetic substances. Magnetic permeability and susceptibility. Outline of the theory of magnetism.

The magnetic field of the Earth. The magnetic elements and their variations. The Compass and its corrections.

Electricity.—Electric Capacity. Dielectric constant. Distribution of Electricity on a surface of conductors. Total normal induction. Gauss's theorem. Value of electric forces in simple induction. Electric images. The Mechanical force on charged conductors. Energy of electrified system. Electrometers and their use.

Tubes of induction and lines of force. Stresses in tubes and pressure at right angles to them.

Wheatsone's bridge. Specific resistance. Resistance thermometer. Conductivity of electrolytes. Ionisation. Migration of Ions. Accumulators. Standard cells. The potentiometer system of measurements. Thermoelectricity. Application of

thermodynamics. Peltier and Thomson's effects. Thermoelectric diagrams. Electromagnetic induction. Induction-coils. Energy of circuit carrying current when placed in a magnetic field. Mechanical force on conductors carrying a current. Moving coil instruments. Theory of Ballistic galvanometers. Lenz's Law. Determination of current, resistance, E. M. F. and capacity in absolute measure. Elements of alternating current theory. The oscillatory discharge of a condenser.

The elementary theory of the continous current dynamo and motor. General principles of the application of electricity to lighting. Power transmission. Telegraphy and Telephony.

Elements of wireless telegraphy and telephony, with the theory of the thermoinies. The discharge of electricity through gases. X-Rays and radioactive phenomena.

Sound.—The transmission of energy through material media by wave motion. Speed of propogation of waves of permanent type. Forced and free vibrations. Resonance. Nature of musical sound. Pitch scales. Reflection and refraction of sound. The vibration of string, bars, plates and gas columns. Organ pipes. Interference phenomena. Analysis of sound. Sensitive flames. Sound ranging. Measurement of wave length, velocity and pitch.

Practical Course.—Candidates will be required to possess general acquaintance with the phenomena and to make Physical measurements dealing with these phenomena.

PHYSICS (SUBSIDIARY).

The course will be of somewhat lower standard than that in which Physics is taken as a main subject and the syllabus will be the following:—

General Physics and Properties of matter .-

Uniform motion in a circle. The Simple Hormonic Motion. Composition of Simple Hormonic Motions. Angular Velocity and angular accelerations.

Angular momentum. Moments of Inertia in simple cases.

Gravitation. Elasticity. Hooke's Law. Compressibility of gases (at high and low pressure). Young's Modulus. Torsion balance.

Capillary phenomena and suface Tension.

Diffusion of liquids and gases. Viscosity. The elements of Kinetic theory and its application to explain the simple gas laws. Van der Waal's equation. Methods of producing high vacua, Macleod Gauge. Resultant pressure and centre of pressure in simple coses.

Heat.—The methods of calorimetry and thermometry. Vapour pressures. Critical temperature. Conduction and diffusion of heat and the determination of constants. Radiation and Absorption. Laws of Cooling. Methods of measuring Radiation Laws of Thermodynamics and their simple applications.

Light.—Velocity of Light. Photometry. Achromatism in lens systems. The Telescope and the Microscope. Direct vision spectroscope.

The Wave theory. Simple Interference Phenomena. Huygen's Principle. Explanation of Reflection and Refraction of light. Action of mirrors, prisms, and lenses reviewed from this stand point.

Simple Diffraction Phenomena. Diffraction Gratings and determination of wave lengths. Spectrum analysis. Line and Band spectra. Elementary knowledge of Bohr's theory of Hydrogen Spectrum. Doppler's Principle. Double refraction and polarisation of light. Rotatory polarisation, Simple applications.

Magnetism.—Forces on a magnet in a magnetic field. Magnetic Moment and intensity of magnetization. Magnetic potential. Determination of field strength.

Megnetic Shell. Magnetic induction in magnetic substances. Outline of the Theory of magnetism.

The magnetic field of the Earth. The magnetic elements and their variations.

Electricity.—Electric Capacity. Dielectric constant. Lines of force, Coulomb's Law. Quadrant Electrometer.

Wheatstone's bridge. Specific resistance. Resistance thermometers. Conductivity of electrolytes. Ionisation. Migration of Ions. Accumulators. Standard cells. The potentiometer system of measurements. Thermoelectricity and Thomocouples. Poltier and Thomson's effects. Electromagnetic induction. Induction coils. Energy of curcuit carrying current when placed in a magnetic field. Mechanical force on conductors carrying a current. Moving coil instruments. Ballistic galvanometers. Lenz's Law. Determination of Current, Resistance, and E.M.F and capacity in absolute measure.

Elementary theory of the Direct Current Dynamics and motor.

The discharge of electricity through gases. Cathode rays, Hertzian waves and X-Rays.

Thermionic valve.

Sound.—The transmission of energy through material media by wave motion. Speed of propogation of waves of permanent type. Forced and free vibrations. Resonance. Nature of musical sound. Pitch scales. Quality. The vibration of strings, and gas columns. Measurement of wave length, velocity and pitch.

Practical course.—Candidates will be required to possess general acquaintance with the phenomena and to make Physical measurements dealing with these Phenomena.

PRACTICAL WORKS FOR SUBSIDIARY PHYSICS.

Properties of matter.

- (1) Young's Modulus by stretching of wire.
- (2) Surface Tension of a liquid by rise in a capillary tube and by drop method.
- (3) Vicosity of a liquid by flow through a Capillary tube.

Heat

- (4) Co-efficient of Expansion of a liquid by Weight Thermometer.
- (5) Constant Volume and Constant Pressure Gas Thermometers.
- (6) Melting point of a solid.
- (7) Specific Heat of solids and liquids with Radiation Correction.
- (8) Co-efficient of Thermal Conductivity of:-
 - (a) Good conductors (Searle's method).
 - (b) Bad ,, (Lees' method)
- (9) Mechanical Equivalent of Heat.

Sound.

- (10) Determination of Frequencies of tuning forks with a sonometer.
- (11) Velocity of Sound by Kundt's tube.
- (12) Melde's experiments.

31

386

Light.

- (13) Refractive Index of a liquid and a solid by means of a Spectrometer.
- (14) Focal lengths of mirrors and thin lenses using an Optical Bench.
- (15) Wave length of a monochromatic light by Diffraction Grating.
- (16) Photometry.

Magnetism.

- (17) Determination of 'M' and 'H'.
- (18) ,, of magnetic Dip.

Electricity.

- (19) Measurement of Current by Tangent Galvanometer.
- (20) " Specific Resistances of wire:-
 - (a) by Metre Bridge.
 - (b) by Post Office Box.
- (21) Measurement of Internal Resistance of a cell by Potentiometer.
- (22) Measurement of current by Potentiometer.
- (23) Comparison of E. M. F.'s Potentiometer.
- (24) Measurement of Temperature Co-efficient of resistance of coil.
- (25) Determination of Electro-Chemical Equivalents of H and Copper.
- (26) Determination of the Mechanical Equivalent of heat by Joule's Calorimeter.
- (27) Measurement of Temperature by Thermo—Electric Couple.
- (28) Comparison of Capacities by Ballistic Galvanometer (Direct Deflection Method).

II CHEMISTRY (MAIN).

Theoretical.

General and Physical.—Laws of chemical action, atomic and molecular theories, determination of atomic and molecular weights, general properties of gases, liquids and solids, kinetic theory. Van der Waal's Equation. The Phase Rule, Law of Mass action, Catalysis, thermochemical changes, properties of solutions, Osmotic Pressure, Electrolytic Dissociation. Avidity of acids and bases, relation of physical properties to constitution, crystalline structure, radio active property of matter, classification of elements.

Inorganic.—Systematic study of the following elements and their important compounds:—

Elements of the Zero Group, Lithium, Sodium, Potassium, Rubidium, Cæsium Copper, Silver, Gold, Glucinium Magnesium, Calcium, Strontium, Barium Zinc, Cadmium Mercury, Boron, Aluminium, Thallium, Carbon, Silicon, Zirconium, Tin, Lead, Nitrogen, Phosphorus Arsenic, Antimony, Bismuth, Oxygen, Sulphur, Selenium, Tellurium, Chromium, Molybdenum, Tungston Fluorine, Chlorine, Bromine, Iodine, Manganese, Iron, Cobalt, Nickel and Platinum. Important Radio-active elements.

Organic.—Modes of occurrence, preparation, characteristics and constitutional formulæ of the following:

The Paraffins, Olefines, Acetylenes and their derivatives, viz. haloid derivatives, alcohols, ethers, aldehydes, ketones and acids, Amines, Amides, Di-carboxylic acids, Hydroxyacids, Glycol; Glycerine, Compounds of the alchol radicals with sulphur, nitrogen, phosphorus, arsenic and silicon, organic metalic bodies, carbohydartes, Glucosides, cyanogen, hydrocyanic acid, urea, and uric acid, Benzene, its homologues and their principal substitution derivatives, diazo-, Azo-, Azoxy-, hydrozo—compounds. Naphthalene, Anthracene and their principal derivatives, pyridine, pyrrol, quinoline, and its common alkaloids.

Theory of Sterio-isomerism.

Practical.

Inorganic,---

- (1) Analysis of mixtures of salts, containing not more than four radicals.
- (2) Gravimetric estimation of copper, iron, aluminium, calcium, magnesium, sulphate, chloride, carbonate.

- (3) Volumetric analysis comprising (a) titration of acids, alkalies and alkaline carbonates. (b) Estimation of non-with permanganate and highermatic (c) Use of standard lodine solution, and (d) titrations involving precipitation.
- (4) Simple Inorganic preparations.

The preparation of the following organic compounds:

Chloroform Ethylene, Ethylbromide, Ether, Iodoform, Ethyl Acetate. Oxatic acid. Nitro-Benzene. Aniline. Acetanilide, Phenol. Methyl Orange. Benzoic acid. Sulphanilic acid.

CHEMISTRY (SUBSIDIARY).

General and Physical.—Elementary ideas on modern Atomic Theory and Valency; properties of Solutions; osmatic pressure and related phenomena; Theory of electrolytic dissociation, transport numbers, conductivity, haw of Mass Action, Velocity of reactions, cutalysis, Thermo-chemical changes. Radioactive properties of matter.

Inorganic.—Classification of the elements; Systematic study of the following elements and their important compounds.

Hydrogen, Argon, Sodium, Potassium, Copper, Silver, Gold, Magnesium, Calcium, Strontium, Barium, Zinc, Mercury, Boron, Aluminium, Carbon, Silicon, Tin, Lead, Nitrogen, Phosphorus, Arsenic, Oxygen, Sulphur, Chlorine, Bromine, Iodine, Manganese, Iron.

Organic.—The modes of occurrence, preparation, characteristics, and coinstitutional formulæ of the following:

The paraffins and their chief derivatives viz., haloid derivatives, alcohols, ether, aldehydes, netones and acids, Amines, Amides, Oxalic, Succinic, Tartaric, Citric acid, Lactic acid, more important carbohydrates, Ethylacetoacotate, Benzene, its nonologues and its principal substitution derivatives, Naphthalene.

Practical.—Qualitative analysis of inorganic substances, containing not more than two radicals.

Volumetric estimation of alkalies and acids, Estimation of Iron with permanganate. Use of standard iodine solution.

Gravimetric estimation of Copper, Calcium and Chlorine.

III. BOTANY (MAIN).

- 1. External Morphology—The detailed morphology of the root, shoot, and reproductive organs, (including fruits and seeds), floral mechanisms and seed dispersal
- 2. Histology.—The structure of the cell, the cell-contents, their micro-chemical reactions, cell-division (Karyokinetic and other methods of division). The origin and growth of tissues, and their distribution; the secondary tissues of the flowering plants.
- 3. Systematic.—Principles of classification. The Morphology, physiology and life-histories of the following groups and types:—
- (a) Cryptogams:—Bacteria, Cyanophyceae (Oscillaria, Nostoc); Diatomaceae; Conjugatae, (Spirogyra, Desmids), Chlorophyceae (Chlampdomonas, Volvox, Pleurococcus, Ulothrix, Ocdogonium, Cladophora, Vaucheria); Characeae. (Chara); Phacophyceae (Fucus); Rhodophyceae (Callithamnion); Myxomycetes (General characters only); Phycomycetes (Pythium, Mucor); Ascomycetes (Yeast, Eurotium, Claviceps); Basidiomycetes, (Ustilago, Puccinia, Agaricus); Lichens (general characters only). Hepaticae (Marchantia); Musci (Funaria); Filicineae (Ophioglossum, Nephrolepis, Marsilia; Equisetales (Equisetum); Lycopodiales (Selaginella and Lycopodium).
- (b) Phunorogams:—Cycadaceae (Cycas); Coniferae (Pinus); Gramineae, Araceae, Palmae, Liliaceae, Amaryllidoceae, Scitaminaceae, Anonaceae, Nymphaeceae, Papaveraceae, Cruciferae, Malvaceae, Rutaceae, Meliaceae, Sapindaceae, Anacardiaceae Leguminosae, Lythraceae, Passifloraceae, Cucurbitaceae, Cactaceae, Umbelliferae, Rubiaceae, Compositae, Apocynaceae, Acclepiadaceae, Boraginaceae, Convolvulaceae, Solanaceae, Scrophulariaceae, Bignoniaceae, Acanthaceae, Verbenaceae, Labiatae, Nyctaginaceae, Uriticaceae and Euphorbiacae.
- 4. Physiology:—Turgidity and tension of tissues; Nutrition—the food of plants and its absorption; Osmosis, Root-pressure, Conduction of food; Transpiration; Photosynthesis; Digestion and transference of the food products of assimilation; storage of food; Nutrition of parasites, Saprophytes, and insectivorous plants, Respiration, Enzymes and the digestion of reserve food, Growth, the effect of external influence on growth; Movements, Protoplasmic movements, Imbibition movements, Heliotropism, Geotropism, Chaemotropism, Contact stimuli and their effects.

- 5. Ecology. The reaction of plants to their environments as illustrated by aquatic plants, hygrophytes, mesophytes, and Xerophytes.
 - 6. Evolution.-Variation, Heredity and Evolution.

Practical.

The practical examination shall include:-

- (a) Examination and description of plants or parts of plants.
- (b) Examination and description of microscopic specimens.
- (c) Identification of specimens.
- (d) A knowledge of micro-technique including fixing, staining, and section-cutting.
- (e) A practical knowledge of simple physiological experiments.

The students are expected to keep a complete record of laboratory work in a special note-book.

BOTANY-SUBSIDIARY.

- 1. External Morphology.—The detailed morphology of the root, shoot, and reproductive organs, (including fruits and seeds) Floral mechanism and seed dispersal.
- 2. Histology.—The structure of the cell, the cell-contents and their micro-chemical reactions, cell-division (Karyokinetic and other methods of division). The origin and growth of tissues and their distribution, the secondary tissues of the flowering plants.
- 3. Systematic.—Principles of classification. The morphology physiology and life-histories of the following groups and types:—

Cryptogams.—Bacteria. Cyanophycea (Nostor), Conjugate (Spyrogyra), Chlorophycea (Chlamydomonus, Volvox, Spirogyra and Oedogonium), Pheophyceae (Fucus), Phycomycetes (Mucor), Ascomycetes (Yeast, and Claviceps), Basidiomycetes Puccinia graminis and Agaricus), Hepaticeae (Marchantia), Muscic (Iunaria), Filicinae (Pteris and Marsilia, Epuisetum, Selaginella).

Phunerogams.—Cycadacew (Cycas), Coniferæ (Pinus). Gramineæ, Palmæ Liliaceæ, Anonaceæ, Papaveraceæ Cruciferæ, Malvaceæ, Anacardiacæ, Leguminoceæ, Myrtaceæ, Passifloraceæ, Cucurbitaceæ, Compositeæ, Apocynaceæ, Asclepiadaceæ, Solanaceæ, Labiata, Urticaceæ, and Euphorbiaceæ.

- 4. Physiology.—Turgidity and Tension of tissues. Nutrition the food of plants and its absorption. Osmosis, root-pressure, conduction of food, transpiration, photosynthesis; digestion and transference of the food, products of Assimilation, Storage of food, the Nutrition of parasites, Saprophytes and insectivorous plants. Respiration, reserve food; Growth, Movements, Protoplasmic movements. Imbibition movements, Heliotropism, Geotropism, Chemotropism, Contact Stimuli and their effects.
 - 5. Ecology.—The reaction of plants to their environments illustrated by aquatic plants hygrophytes, mesophytes, and Aerophytes.
 - Evolution.—Variation Heredity and evolution.
 N. B.—Physiology and Ecology to be treated in an elementary manner.

Practical.

The Practical examination shall include:-

- (a) Examination and description of plants or parts of plants.
- (b) Examination and description of microscopic slides.
- (c) Identification of specimens.
- (d) A knowledge of section cutting and micro-technique including fixing and staining.
- (c) Λ practical knowledge of simple Physiologycal experiments.

Candidater should keep a complete record of laboratory work in a special note-book

IV. ZOOLOGY (MAIN)

Paper I.—The general principles of Zoology treated in an elementary manner, including the theory of Evolution with general notions of Variation, Heredity and Adaptation. Recapitulation hypothesis. The structure and phenomena of the

animal cell, and the classification and characteristics of the common forms of animal tissues. Sexual and Asexual modes of reproduction; Parthenogenesis; Alternation of generations, and Metamorphosis. General principles of Classification. The elementary principles of Geological and Geographical distribution of animals.

Paper II.—The structure, habits, and development of the Non-chordata as illustrated by:

Protozou—Amoeba; Euglena; Monocystis; Malarial parasite; Paramœeium; Vorticella; Polystomella; Trypanosoma.

Porifera-Sycon.

Coelenterata—Hydra; Obelia; Aurelia; a simple coral (Fungia).

Platyhelminthes-Liver-fluke; Tucnia.

Nemathelminthes-Ascaris.

Annolida Pheretima; Nereis; Leech.

Echnodermala-Star-fish and a Sea-urchin.

Arthropoda—Prawn (complete dissection) Daphnia and Cyclops (general characters only); Cockroach; Anopheles; Housefly; (Musca); Scorpion; and a Centipede (Scolopendra-External characters and mouthparts).

Mollusca—Fresh-water mussel (Unio) and Apple-snail (Pila). 90 Marks.

Paper III.—The principal characteristics, structure, and habits of Chordata as illustrated by Acrania:—

Hemichordata-Balanoglossus.

Urochordata—Ciona or any other Ascidian from Indian seas (Rhabdocynthia); Botryllus.

Cephalochordata-Amphioxus.

CRANIATA:---

Cyclostomata—Petromyzlon and Hag-fish (general characters only).

Pisces-

Amphibia—The Frog (Rana tigrima). General characters Ursdela and Gymnophiona, with twoical examples.

- Reptilia—Calotes or any other lizard. General characters of Lucertilia, Ophidia, Rhynchocephalia, Chelonia and Crucodilia (with typical examples).
- Aves—Columba (Skeleton of fowl may be substituted).

 Distinctions between Ratitae and Carinatae with typical examples.
- Mammalia—The general characters of Prototheria and Metatheria as illustrated by Echidna and Kangaroo respectively; Rabbit (Skull of Dog may be substituted).

 General characters of the various orders of sub-class Eutheria with typical examples.

The outlines of the development of Amphioxus, Ciona, the frog, chick, and rabbit. Amnion and allantois; Placentation. The elementary physiology of the various organs of the animal body as illustrated by Frog and Rabbit. 90 Marks.

Practical Course.

Candidates will be required to show a knowledge of simple microscopic technique and to examine, dissect, or describe the following:—

Amoeba; Monocystis; Malarial parasite; Paramœcium; Sycon; Hydra; Obelia; Liver-fluke; Taenia; Ascaris; Pheretima; Leech; Star-fish; Prawn; Coekroach; Scorpion; Fresh-water mussel; Pila; Ciona or Rhabdocynthia; Botryllus; Petromyzon; Carcharias; (or Scoliodon); Murrel; Frog; Lizard; Pigeon; four types of birds' skulls; Rabbit; dog's skull and Echidna (imbs and limb-girdles only). Simple section-cutting and staining methods..

Laboratory sketch-books containing complete record of bonifide work, as certified by the teacher, must be produced at the practical examination.

N.B.—Out of the marks alloted for the practicals 10 per

cent, marks will be reserved for the practical records.

ZOOLOGY (SUBSIDIARY)

The whole examination will comprise two theory papers and a practical test.

Elementary knowledge of the Animal cell; Asexual and Sexual modes of Reproduction; Parthenogenesis; Alternation of generations, and Motamorphosis. The elementary facts of Evolution, Heredity and Variation;

The elementary Principles of Classification, and those of Geological and Geographical Distribution of Animals. Elementary knowledge of the various kinds of tissues.

The structure, habits and development of the following types of Non-Chordata:

Protozou—Amoeba; Monocystis. Paramœcium; Malarial Parasite.

Porifera—Sycon.

Coelenterata-Hydra and Obelia.

Platyhelminthes-Liver-finke and Taenia.

Nemathelminthes-Asearis.

V. MATHEMATICS-(MAIN).

Algebra.—Interest and annuities, inequalities, simple tests of covergence of series, partial functions, summation of series; continued fractions; indeterminate equation of the first degree.

Theory of Equations and Determinants.—Relation between the roots and coefficients of an equation, solution of the biquadratic equation, solution of numerical equation by Horner's method. Development and elementary properties of determinants, and their application to the solution of linear simultaneous equations and in elimination.

Trigonometry.—De Moivre's Theorem; expansions of trigonometric functions; hyperbolic and inverse functions; summation of series; expression of trigonometric and hyperbolic funtion as infinite products.

Analytical Geometry of two dimensions.—Cartesian and polar co-ordinates; transformation of axes; straight line; circle; parabola; ellipse, hyperbola; the general equation of second degree; tangents; normals; focii; directrices; conjugate diameters; parametric representation; tracing of curves given by general second degree equation; polar equations of conics.

Analytical Geometry of three dimensions.—Equations of the plane and the straight line; standard forms of the equations of sphere and ellipsoid.

Differential and integral calculus.—Limits and continuity of functions; differentiation (standard forms); successive differentiation; mean value theorem; Taylor's and Machlaurin's theorem

(with remainder) for a single variable; expansion of functions in power series; indeterminate forms; partial differentiation; maxima and minima of a function of a single variable; curvature; asymptotes; envelopes; curve tracing.

General methods of integration; standard forms; reduction formulæ; rectification of plane curves; quadrature; surfaces and volumes of solids of revolution; approximate evaluation of definite integrals (Simpson's rule); elementary notions of double and triple integrals and their use; centre of gravity and moment of inertia.

Differential Equations.—Formation of a differential equation, ordinary and partial; equation of the first order (standard forms); linear equations of any order with constant coefficients; homogeneous linear equations; simple trajectories.

Statics.—Composition and resolution of forces; parallel forces, general conditions of equilibrium of a body under coplanar forces, centre of gravity and stability; work; virtual work; friction; simple machines.

Graphical Statics.—Funicular polygon; link and force polygon; shearing force and bending moment; stresses in a framework.

Dynamics.—Uniform and accelerated motion; laws of motion; impulse and impulsive forces; kinetic energy and potential energy; conservation of energy and momentum; projectiles; collision of clustic bodies; hodograph; tangential and normal acceleration; radial and transversal acceleration; elementary treatment of central orbits; simple harmonic motion; motion on a smoth curve; simple pendulum; units and dimensions

Hydrostatics.—Fluid pressure at a point; centre of pressure; resultant pressure in a given direction; equilibrium of floating bodies, stability and metacentre; specific gravity; Boyle's and Charles' laws about gases; mixture of gases; barometer, homogeneous atmosphere; simple application of hydrostatics to machines such as diving bell, water pump, air pump, syphon, and hydraulic press.

Astronomy.—Apparent motion of the heavens, principal constellations and the most conspicuous stars; celestial sphere; horizon; zenith; poles; meridian equinoxial points, solstices; celestial co-ordinates; astronomical instruments; viz., telescope; astronomical clock, transit theodolite, sextant, chronometer; altazimuth; magnitude of the earth; apparent annual motion of the sun; constellations of the zodiac; the ecliptic and its obliquity; seasons; sideral time; solar time; equation of time, conversion of time.

Refraction; twilight; parallax; aberration; precession; and nutation (simple explanation); determination of clock error and rate by observation; determination of right ascension and declination of a heavenly body; latitude and longitude of a station; solar system and the motion of the planets; Kepler's laws; comets and meteors; motion of the moon and her phases; nodes; moon's calendar; the use of the nautical almanac.

MATHEMATICS. (SUBSIDIARY).

Algebra.—Snaple tests of convergency of series. Exponential and Logarithmic Series. Simple cases of Summation of series. Determinants and their application in solving linear simultaneous equations and in elemination. Cardan's Solution of the Cubic.

Trigonometry.—De Moivre's Theorem and easy deductions therefrom. Hyperbolic Functions. Simple cases of Summation of Series.

Analytical Geometry of Two Dimensions .--

Cartesian and Polar Co-ordinates, Simple transformation of axes. Straight line, Circle, Parabola, Ellipse and Hyperbola. Tracting of curves given by the general second degree equation.

Differential and Integral Calculus.— Continuity of functions, differentiation (standard form). Successive differentiation. Mean value theorem, Taylor's and Maclaurins Theorems. Expansions, Indeterminate forms, Partial differentiation. Maxima and Minima of functions of a single variable. Points of inflexion, Curvature.

General methods of integration, standard forms, elementary reduction formulæ involving trigonometrical functions, definite integrals, rectification, quadrature, volumes and surfaces of solids of revolution, approximate evaluation of definite integrals, (Simpson's Rule).

Simple applications of the Calculus to physical examples, Elementary tereatment of double and triple integrals. Centre of gravity and moment of Inertia.

Differential equations.—Equations of the first order, standard forms, linear equations with constant co-efficients. Simple cases of particular integral.

Statics.—Composition and resolution of Coplaner forces, parallel forces. General conditions of equilibrium of a body unler coplanar forces. Gentre of gravity, work, simple examples of friction, machines.

Dynamus.— Uniform and accelerated motion in a straight line, Laws of motion, Impulse. Kinetic and Potential energy; Jouservation of energy and Momentum. Projectiles. Direct impact of elastic bodies. Normal acceleration and its applications. Simple Harmonic Motion. Simple Pendulum. Units and Dimensions.

M. Sc. EXAMINATION.

CHEMISTRY.

(Previous) Examination-Inorganic Chemistry.

Theory.

Study of the following elements and their important compounds. The group, Ra, Se, Y, Ce, Ga, In, Ti, Zr, Th, V, No, W, U, Pd, Ir.

Metallurgy of Cu, Ag, Au, Fe, Zn, Pb.

Manufacture of H_2So_4 , bleaching powder, Na_2CO_2 , NaOH

Paints and pigments Porcelian, glass cement, fuel gases. Study of the Theory of valency, Allotropy, Golloids, elementary ideas on intermetallic compounds, isotropism.

Practical.

Qualitative analysis of mixtures containing not more than six radicals (including silicate and thiosulphate).

Jodometria estimation of Cu, MNO₂, H₃ASO₃, thavimetric determination of Mn, PO₄, Ni, Cr, NO₃ (by Lunge's Nitrometer),

Qualitative and quantitative analysis of simple minerals such as dolomite, magnesite, calcapar and pyrites. Analysis of silver and nickel coins and brass (also electrometrically). Simple gas analysis.

Preparation of (NH₄)₂S₂O₈, Cro₃,H₃PO₄.

Organic Chemistry.

Theory.

Advanced study of the following: --

Organo metallic compounds, amino-acids and ploy-peptides, aceto-acetio-ester and malonic ester; sugars straches and celluloses; poly methylenes and their derivatives. Azoxy, Azo and hydrazo compounds, Diazo compounds and hydrazines, Azo dyes, Quinones, mono cyclic terpense and camphors. Benzidines, Triplienyl methane and Roseaniline dye stuffs, Naphthalenes, Anthracenes, Pyrrole, Furane and Thiophene, Pyridine, Quinoline, and their important derivatives. Conline, Nicotine, Piperine, Tropin Amion proteins.

Stereoismerism of carbon and nitrogen; Tautomerism.

Practical.

Detection of elements, Carbon, Hydrogen, Nitrogen, Sulphur, Halogens, and Phosphorous.

Detection of groups—(' H_2OH =CIIOH,=COII,,=CO,—C.HO—COOH= NH_2 ,=NH,=N.— OCH_3 ,— NO_2 , OH (phenolic),

Detection of unknown :- Simple and mixtures.

Quantitative estimation of:-OH. group.

Preparation of about 10 organic compounds.

Determination of molecular weight of an organic acid by means of its silver salts. Gas analysis of mixtures of Co, CO₂, CH₄, C₂H₄, etc. Quantitative estimation of Carbon, Hydrogen, Nitrogen, Sulphur and Halogens.

Physical Chemistry.

Theoretical.

Atomic structure, Valency; Relation between physical properties and chemical constitution; Gaseous, liquid and crystalline state. Thermo-chemistry; Free energy of chemical reactions; chemical equilibrium; velocity of chemical reactions; theories of chemical change; catalysis in homogeneous and heterogeneous systems; behaviour of weak and strong electrolytes; electrode potentials; electromotive force of galvanic cells; Hydrogen in concentration; photo-chemical reactions.

Practical.

The following measurements and determinations:-

- 1. Density of liquids.
- Vapour density.
- 3. Molecular weight by the boiling point method.

- 4. Molecular weight by the freezing point method.
- 5. Solubility of liquids in liquids.
- 6. Solubility of solids in liquids.
- 7. Viscosity.
- 8. Surface tension.
- 9. Specific and molecular rotation.
- 10. Spectroscopic analysis.
- 11. Concentration by means of refractometer
- 12. Heat of neutralisation.
- 13. Distribution co-officient of a solid in two liquid phases.
- 14. Velocity co-efficient and order of a chemical reaction.
- 15. Degree of dissociation from molecular conductivity.
- 16. Solubility of sparingly soluble salts by conductivity method.
- 17. Measurement of electromotive force.
- 18. Solubility by means of E.M.F. measurement.
- 19. Hydrogen in concentration.
- 20. Comparison of radio-active properties of different sub-

(Final) Examination.

In-organic Chemistry.

Paper I.

Per-acids and their salts, complexions, radioactive substances metal of the rare earths, history of Chemistry from the middle of the 19th century.

Paper II.

Intermetallic compounds, electric furnaces and electrolytic products, by-products of industries, permutities, hafnium, fixation of nitrogen and transmutation of elements.

() RGANIC (!HEMISTRY (Theory).

Paper I.

Some theories of the natural synthesis of vital products. Alkaloids of the *Isoquinoline group*:—Papaverine, Narcotine. Hydrastine and Berberine.

The Phenanthrene groups-Morphine, Codein and Thebaine.

The Purinc group:-Purinc. Theobromine, Theophylline,

Caffeine.

The Strychnos alkaloids:-Strychnine, Brucine.

Paper II.

Terpenes and Camphors:-

- (1) Monocyclic terpenes and Camphors:—
 Limonene and Dipentene; Terpinolene, Terpinenes,
 Sylvestrene and Phellandrene. Methol, Menthone
 and Terpin, Cincol and Terpipneol, Pulegone and
 ('arvone.
- (2) Dicyclic terpenes and camphors:-

The Camphene-Bronylone group-

Camphor, Camphporic acid, Borneol and camphane, Borylene, camphene.

Fenchene und its derivativess-

Fenchene and Fenchyl alcohols, Fenchenes.

Pinens:-

Pinene, Pinonic and Pinic acids.

Olefinic terpenes:-

Isoprene; Citronellal, The citral group.— Methyl heptenone, Geranic acid, Rhodinal, Citral. The Chemistry of Rubber.

PHYSICAL CHEMISTRY

Paper.I.

Photo-chemistry including photosynthesis.

Paper II.

Molecular structure, chemical equilibrium, chemical kinetics absorption.

PHYSICS.

In addition to wnat is included in the B.Sc. Course a detailed study of the following.

(A) Previous Examination.
Paper I.—General Physics and Sound.

Gravitation: Elasticity; Theory of Surface Tension Phenomena: Visocosity of Liquids, Gases and Vapours; Compessibi-

ty of liquids; Kinetic Theory of gases and its appplication; ibration of Strings, membranes, plates and bars; Forced-Vibrations; Combinational Tones; Resonance; Reflection and Revaction of Sound Waves; Supersonic Waves.

Paper II .- Optics (Geometrical and Physical).

Mirrors, System of lenses; Chromatic and Spherical aberra ons; Interference; Diffraction; Dispersion; Double refraction 'Crystals; Polarisation; Elements of Spectroscopy; Spectroraphs; Line Spectra; Series Spectra; Band Spectra; Bohr's heory of Spectra; elementary knowledge of Electro and Mageto-optics.

Paper III .- Heat (including Thermodynamics).

Thermometry; Measurement of High and Low Temperatures; quations of State; Specific Heats at high and low Temperatures; Vapour pressure of Metals; Conductivity; Laws of Radiaon; Radiation Pressure; Thermodynamical Formula and oplications; Entropy; Nernst Heat Theorem.

Paper IV.—Practical work in Properties of Mater. Heat Sound.

- 1. Young's Modulus by Koenig's Method.
- 2. Do of a Spiral Spring by Wilberforce Inertia Bar.
- 3. Do of a glass plate by interference Method.
- 4. Determination of Poisson's Ratio.
- 5. Modulus of Rigidity of a spiral Spring by Wilbeforce Inertia Bar.
- 6. Torisonal Hysteresis for a wire.
- 7. Temperature coefficient of Rigidity and Young's Modulus.
- 8. Surface Tension of liquids by Jager's Method.
- 9. DO by Ferguson's Method.
- Surface Tension Balance for liquids at different concentrations and temperatures.
- 11. Viscosity of liquids at different temperatures by flow through a capillary tube (with Kinetic energy correction).
- 12. Viscosity of liquids by rotating clyinder Method. (Willow's appr.).
- 13. Viscosity of liquids by Oscillating Disc (Meyer's Method).
- 14. Viscosity of Liquids by Stoke's Law.

15. Viscosity of a gas by Rankine's Method.

16. DO by Anderson's Method.

17. Variation of Viscosities of air with temperature and determination of Sutherland's constant.

18. Specific Heat of a substance by Joly's Steam Calori-

meter.

- 19. Do of liquids by Callendar and Barne's flow Method.
- Determination of Specific Heat by Bunsen's Ice Calorimeter.
- 21. Latent Heat of vaporisation by Berthelot's Apparatus.

22. Heat of solution of salts.

23. Use of Beckkmann's thermometer in determining the rise of Boiling point and the depression of the freezing point of a solvent.

24. Vapour Density by Hofmann's Method.

25. Do by Dumas Bulb. (with correction.).

26. Vapour Tension of water at various Temperatures.27. Thermal Conductivity of a metal bar (Angstrom's Me-

thod).

28. Do of a bad Conductor in the form of a powder.

29. Total Emissivity of the surface of a wire at various temperatures.

30. Use of Platinum Thermometer.

31. Use of a thermo-couple as a thermometer.

32. Velocity of sound in different gases and deducing the value of Y.

33. Finding the value of the coefficient of expansion of a gas by determining velocities of sound at two different temperatures (by Kundt's tube).

34. Frequency of a tuning fork by Stroboscopic Method.

Paper V.—Practical work in Optics.

1. Determination of the Focal Length and the positions of the Principal Planes of a thick lens and optical system by varous Methods.

2. Investigation of the Spherical Aberration of a thick lens.

3. Determination of the Refractive Index of a liquid by total reflection using a prism.

4. Determination of the thickness of a thin glass plate by interference method.

5. Measurement of the Wavelength of light by Fresnel's Biprism, using:—

(a) Optical Bench.

(b) Spectrometer.

and determination of "u" of the material of the Biprism.

- Determination of the Wavelength of light by Fresnel's Double Mirror.
- 7. Determination of the Wavelength of light by Billet's Split lens.
- 8. Measurement of Wavelength by Diffraction. (various methods).
- Measurement of Wavelength by Diffraction Grating usings oblique incidence.
- 10. Measurement of the Resolving Power of:-
 - (a) a prism spectroscope.
 - (b) a Diffraction Grating.
- 11. Calibration of a spectroscope.
 - (a) by using lines of known Wavelengths.
 - (b) by Interference fringes.
- 12. Polarisation by Reflection (verification of Brewster's law).
- 13. Measurement of Specific Rotatory Power of a substance.

Additional Experiments.

- Determination of the Refractive Index for liquids and gases by means of Rayleigh's Interferometer.
- 15. Comparison of Refractive Indices of gases by Jamin's Interferometer.
- Determination of Refractive Index of substances by Pulfrich Refractometer.
- 17.. Determination of the difference of wavelengths for the Sodium D lines by means of Michelson's Interferometer.
- 18. Measurement of e|m for an Electron by observing Zeeman Effect for yellow Helium light, using:
 - (a) Lummer Gehreke plate.

mounted on Constant Deviation

(b) Fabry Perot Etalon.

Spectroscope.

(c) Michelson Echelon Grating.

(B) Final Examination.

Puper I.—Classical Electricity and Magnetism.

Determination of Dielectric Constants for solids, liquids and gases; Electrical Images; Electric Fields; Pyro and Piezo electricity; Ferro, Para, Dia-Magnetisms; Various methods of determining Susceptibility and Permeability of solids, liquids and

ises, Theory of Magnetism; Theory of Electrical instruments; heory and Measurement of Inductance and Capacity; Theory of Iternating Currents; Electromagnetic Waves. Their generation and application.

Paper II .- Modern Electracity.

Conduction of Electricity through gases; Ionisation curents; Ionisation by Collision; Mobility of Ions; Diffusion of ons; Variation of the mass of eletron with velocity; Determination of e|m and e; Positive ray analysis and Mass Spectrograph; hermionic Currents; Photo-Electricity; X-Rays; Radioactity; Atomic Structure.

Paper III.—Special subject as detailed above.

Students are expected to possess a detailed knowledge of the ubjects chosen by them.

Paper IV .- Practical Work in Magnetism and Electricity.

- 1. Plotting B-H Curve and measurement of Permeability
 - (a) Magnetometer Method.
 - (b) Ballistic Method.
- 2. Measurment of Susceptibility of para and dia-magnetic substances.
- 3. Adjustment and use of various types of Galvanometers.
- 4. Calibration of Meter Bridge wire by two Methods.
- 5. Variation of the resistance of a wire with temperature.
- 6. Measurement of low resistances.
 - (a) Direct Deflection Method,
 - (b) Mathiessen and Hockin's Method (Potentiometer Method).
 - (c) Kelvin's Double Bridge.
- 7. Measurement of high resistances.
 - (a) Direct Deflection Method.
 - (b) Leakage Method.
- 8. Calibration of Callendar and Griffith's Bridge and use of Platinum Resistance Thermometer.
- 9. Electrolytic resistances.
 - (a) Direct Current Method.
 - (b) Kohlrausch Bridge.

- 10. Determination of the thermo-electromotive force.
- 11. Measurement and comparison of Self Inductances
- 12. Do do (various methodsi)
 Mutual Inductances
- (various methods.)
- 13. Do do Capacities (various methods.)
- 14. Use of Gassorts Flux-meter.
- 15. Adjustment and use of Quadrant Electrometer (Comparison of E. M. F. and other expts.)
- 16. Measurement of small capacity in E.M. and E.S. Units and deducing V.
- 17. Determination of the velocity of Electric Waves (Leacher's).
- 18. Determination of e|m (Thomson's Method).
- 19. A and B-rays Electroscopes.
- 20. Characteristic Curves of the three-electrode valve.
- 21. Determination of electronic charge by Millikan's Method.
- 22. Determination of Saturation Voltage across an ionised chamber.

ZOOLOGY.

Practicals: -- Non-Chordata.

Amoeba; Actinosphaerium; Skeletons of Foraminifera and Rudiolaria; Badhamia; Euglena; Ceratium; Dendrocometes Trypanosoma: Noctiluca: Paramoecium; Vorticella: Opalina: Monocystis; Malarial parasite; Sarcocystis; Leucosolenia; Sycon; Spongilla; a Hexactinellid; Geodia; Euspongia; Hydra; Tubularia; Syncerpne; Sertularia; Plumularia; Aglaophenia; Obelia; Millepora; Stylaster; Halistemma; Velella; Physalia; Porpita; Diphyes; Aurelia; Rhizostoma; Haliclystus; Sea-anemone; Alcyonium; Tubipora; Corallium; Gorgonia; Pennetula; Madrepora; ('estus; Beroe; Leptoplana; Tomnocephala; Distomum; Polystomum; Taenia; Echinococcus; Iineus; Carinella; Ascaris; Oxyuris; a hookworm; Trichina; Filaria; Sagitta; Brachionus Phoronis; Sipunculus; Pedicellima; Bugula; Flustra; Plumatella; Magellania; Terebratula; Lingula; Pheretima; Nereis; Leech; Arenicola; Serpulid; Chaetopterus; Terebella; Sabella; Polynoe; Tubifex: Phyllodoce; Aphrodite; Spirorbis; Syllis; Myzostoma; Bonellit; Echiurus or Thalassema; Polypordius; Asterias: Echinus: Holothuria: Synapta: Antedon: typical representatives of all the orders of Crustracea; Tritobita; Peripatus Centipede Millipede; typical representatives of each order of Insecta and Arachnida and Phylum Mollusca.:

406

PRACTICALS: CHORDATA GROUP.

i) Acrania:-

Hemichordata-Balanoglossus.

Urochordata—Oikopleura; Rhabdocynthia (Herdmannia) or Ciona; Botryllus; Salpa, and Doliolum.

Cephalochordata—Branchiostoma (Amphioxus).

b) Craniata:-

Cyclostomata—Lampreys (Petromyzon) and Hagfishes (Myxine and Bdellostoma).

Pisces—Trygon, or any other fresh-water Elasmobranch; Carcharias or Scoliodon; Torpedo; Chimacra; Polypterus; Acipenser; Lepidosteus; Amia; Gadus; Pleuronectes; Sca-horse, a common bony-fish such as 'Murrel' (Ophiocephalidae) or 'Rohu' (Cyprinidae) and special features of Clarias, Saccobrachus, Anabas, and Amphipnous; Lungfishes (External characters).

Amphibia—The typical representatives of Urodela, Anura and Gymnophiona.

Reptilia—The typical representatives of Rhynchocephalia (External characters and skeleton only),
Lavertilia, Ophidia, Chelonia and Crocodilia.

Aves—Ratitae; The typical representatives. Their external characters and skeletons only.

Carinatae: Pigeon. skeleton of fowl and comparative study of the four types of birds' skulls.

Mommalia-Typical representatives of each order.

Microscopic mounts and other preparation. Bona-fide pracical sketch-books (for which 10 marks are reserved for each practical paper) must be produced at the time of the examination. Microtomy (simple section-cutting methods.).

BOTANY.

Thallophyta:---

Bacteria; Gleocapsa; Oscillaria; Nostoe; Rivularia; Euglena; Diatoms; Chlamydomonas; Sphaerella; Pandorina; Eudorina; Volvox; Pleurococcus; Ulothrix; Oedogonium Coleochaete; Cladophora; Vaucheria: Desmids; Spirogyra; Zygnema; Chara; Ectocarpua; Dictyota; Laminaria; Fucus; Nemalion; Batrachospermum; Callithamnion; Polysiphonia; Synchytrium endobioticum; Pythium; Phytopthora infestans; Peronospora parasitica; Cystopus; Mucor; Rhizopus; Penicillur Eurotium; Sphaerotheca Mors Uvae; Saccharomyces cerevisieae; Peziza; Pyronema; Claviceps; Ustilago; Puccinia graminis; Agaricus; Polyporus; Lycopendron.

Bryophyta and Pteridophyta:---

Riccia; Plagiochasma; Marchantia; Fimbriaria; Aneura; Porella; Anthoceros; Sphagnum; Andreaea; Funaria; Polytrichum; Equisctum; Lycopodium; Selaginella; Psilotum; Isoctes; Fossils; (Lepidodendrom; Sigillaria; Calamites; Sphenophyllum). Ophioglossaceae; Marattiaceae; Osmundaceae: Schizaceae; Gleicheniaceae Cyatheaceae; (General characters only.); Aspidium; Pteris; Salvinia; Azolla; Marsilia; Fossils; Psaronius; Osmundites; Botryopteridaceae and Zygopteridaceae; Gymnosperms:—

Cycas; Ginkgo; Pinus; Taxus; Gnetum; Ephedra.

Fossils:—

Cycado-filicales (Lyginodendron); Bennettitales and Cordaitales (general account only).

Histology—Practical:—

Micro-chemical tests for starch, cellulose, lignin, suberin, cane-sugar, grape-sugar, and fats. Microscopical preparations. microtome technique.—simple section-cutting methods.

Part II Practical Course A

- (a) General Morphology.
- (b) The following families of Angiosperms with special reference to the Deccan flora.

Magnoliaceae; Ananaceae; Menispermaceae; Nymphaea ceae; Papaveraceae; Cruciferae; Capparidaceae; Polygalaceae; Caryophyllaceae; Portulacaceae; Guttiferae; Ternstoemiaceae; Malvaceae; Stecuiliaceae; Tiliaceae; Linaceae; Malpighiaceae; ygophyllaceae; Geraniaceae; Rutaceae; Burseraceae; Maliapae; Celastraceae; Rhamnaceae; Ampelideae; Sapindaceae;
nacardiaceae; Moringeae; Leguminosae; Rosaceae; Combretapae; Myrtaceae; Lythraceae; Passi floraceae; Cucurbitaceae;
actaceae; Umbelliferae; Rubaceae; Boraginaceae; Convulvulapae; Solanaceae; Scrophulariaceae; Labiatae; Nyctagineae;
marantaceae; Chenopodiaceae; Liliaceae; Palmae; Aroideae;
ramineae; Compositae; Myrsinaceae; Sapotaceae; Ebenaceae;
leaceae, Apocynaceae; Asclepiadaceae, Loganiaceae; Bignoniaedaliaceae; Acanthaceae; Verbenaceae; Urticaceae; Orchidapae; Scitamineae; Amaryllidaceae.

- 2) Physiology:—The following experiments to be performed:—
 - 1. Water-Culture experiments.
 - 2. Osmosis.
 - 3. Osmotic Pressure.
 - 4. Root Absorption.
 - 5. Course of Absorbed Solutions.
 - 6. Root-pressure.
 - 7. Excretion of fluid water from leaves.
 - 8. Transpiration.
 - 9. To show dependence of withering upon loss of water.
 - 10. To show the suction caused by Transpiration.
 - Estimation of the absorption of water by the roots, and the loss by evaporation from the leaves.
 - 12. Photo-synthesis.
 - 13. Properties and reactions of Chlorophyll.
 - 14. Conditions necessary for the production of Chlorophyll.
 - To show that carbon dioxide is necessary for starch formation.
 - 16. To demonstrate the effects of lights of different wave.
 - To show the exhalation of carbon dioxide by germinating seeds.
 - 18. Intramolecular Respiration.
 - 19. Plasmolysis.
 - 20. Measurement of growth by auxanometers.
 - 21. Distribution of growth in roots.

FACULTY OF MEDICINE

M.B.B.S. Examinations

ANATOMY.

A. Lectures and Demonstrations.

Osteology.—General description of bones and their structure. Demonstration and description of all the bones of the human body (with reference also to their centres of ossification).

Myology.—General description of fasciæ and different kinds of muscles—their structure—demonstration and description of all the fasciæ and muscles (treated regionally) as regards the origin, insertion, action, relation, innervation and blood supply of each muscle.

Syndesmology.—General description of joints—their classification and various movements permitted in different types of articulations. Description of each joint (in detail) as regards its formation, movements and blood supply (with demonstrations on a dissected part).

Angiology.—Outline of circulation of blood—description and structure of heart—Cardiac cycle fætal circulation.

Blood vessels.—General description and structure of different kinds of blood vessels.

Arteries.—Each artery described as to its course, relationship and branches.

Veins.—Each vein described as to its course, relationship and tributaries.

Lymphatic system.—Structure of lymph glands and lymphatic vessels—with their description according to different regions of the body.

Neurology.—General description of the nervous system (Corebro-spinal and sympathetic)—Structure of nerves and ganglia—Description (in detail) and demonstration from specimens and section of different parts—Medulla Spinalis—Various parts of the Encephalon—The Meninges, the cranial and spinal nerves—Different portions and plexuses of the sympathetic system.

Organs of taste, smell, sight, hearing, and peripheral termination of nerves of general sensation. Skin and its appendages.

Splanchnology.—Demonstrations and full descriptions of Organs of Respiration and Digestion—Peritoneum, Uro-Genital apparatus (male and female), Ductless glands.

EMBRYOLOGY.—Germ cells, their origin and structure; maturation and fertilization; segmentation, germinal layers; early stages in the development of the embryo; Feetal membranes and placenta; Development of organs.

B. Disection of the Whole Human Body by every student.

PHYSIOLOGY.

Lectures.

1. Histology.—The animal cell and its division. The varieties and structure of epithelia and connective tissues including cartilage, bone and teeth with their development.

The varieties and structure and functions of voluntary, and involuntary muscles and nerves with their development. Irritability and contractibility of the tissues. Changes during the contraction of muscle in form, extensibility and elasticity, temperature and electrical condition, also chemical changes.

- 2. The Circulatory System.—The structure of the heart, arteries, capillaries and veins and lymphatic vessels. Physiology of the heart, circulation of blood in the fætus and the adult. Blood pressure, velocity of blood arterial and venous pulse, flow of blood in arteries, capillaries and veins, and lymph flow. Innervation of the heart and blood vessels.
- 3. Blood.—Composition, quantity, and coagulation of blood, chemistry of blood corpuscles. Compounds and derivatives of hæmoglobin. Enumeration of blood corpuscles. Estimation of hæmoglobin, Tests for blood.
 - 4: Lymph and Lymphalic glands .-
- 5. Ductless glands.—Their structure and functions and internal secretion.
- 6. Respiratory System.— Organs and mechanism of respiration; gases of blood, cause and regulation of respiration. Special respiratory acts and artificial respiration. Effects of respiration on circulation. Relation of respiration to nutrition. Oxygen want. Respiration at high pressure. Abnormal respiration and asphyxia.

- 7. Digestion.—Structure of secreting glands connected with digestion including liver and pancreas. Composition and actions of their secretions on various food-stuffs. Mechanical processes of digestion and absorption of food.
- 8. Urinary System.—The structure and functions of the apparatus, composition of urine, formation of urea, uric acid, ammonia, creatine and creatinine and hippuric acid. Inorganic urinary constituents and deposits. Tests for abnormal constituents of urine.
- 9. Skin and its Appendages.—Structure, and functions of the skin and its appendages. Composition and secretion of sweat. Regulation of heat.
- 10. Chemical composition of the body.—Chemical physiology of the carbo-hydrates, protein and fats. Enzymes and their actions. Metabolism of carbohydrates, fats and proteins, and conservation of energy.
- 11. Nerve, Nerve Centres, Nerve Cells.—Their structure and functions. Degeneration and regeneration of nerves. Velocity, direction, and nature of the nerve impulse, chemistry of nervous tissue, changes in the electrical condition and excitability of nerves. Autonomic nervous system.
- 12. Central Nervous System.—Structure and functions of white and grey matters of the spinal cord. Results of section of spinal cord. Reciprocal action of antagonistic muscles. Principle of the common path structure of bulb, pons and midbrain. Origin and functions of cerebral nerves.

Structure of functions of cerebellum.

Structure of the cerebrum. Localization of cerebral functions. Motor and Sensory areas. Association fibres and centres.

- 13. Structure and functions of:-
 - (a) the organs of taste and smell.
 - (b) Anatomy of the ear and physiology of hearing.
 - (c) Structure and function of the eye.

Accommodation and defects in the optical apparatus. Visual sensations and theories of vision.

- 14. Cutaneous sensations and their varieties. Motorial and visceral sensation.
- 15. Anatomy of the Larynx. Production of voice and speech.
 - 16. Reproduction, development and growth of the body.

PHYSIOLOGY.

Practical Course.

EXPERIMENTAL PHYSIOLOGY.

- (a) Circulation.—Dissection of frog's heart, graphic record f its action. Dissection of the sino-atrial junction. Dissection of the vagus. Dissection of the cardio-sympathetic. Stimulation of the sinoatrial junction, of the vagus, of the cardio-sympathetic. Apex preparation of the heart. Action of muscarin and atropine-eat, cold, and electrical current on heart. Stannius experiment.
- (b) Muscle.—Voluntary and involuntary stimulation of nuscle—mechanical, chemical and electrical. Muscle-nerve preparation.

Result of single stimulus. Influence or stimulus strength pad on fatigue, temperature and drugs. Successive stimulii on auscle. Tetanic contraction. Elasticity and extensibility. Electrotonus. Rheoscopic frog. Marey's tambour. Myograph, ardiograph, Mammalian heart and its nutrition.

- (c) Blood.—sphygmograph, sphygmometer. Respiration and artificial respiration. Pneumograph. Polarimeter. Strouhr. Kymograph.
 - (d) Nervous system.—Extirpation of cerebellum in pigeon. Extirpation of cerebrum in pigeon.

Reflex actions, Nerve and its microscopical examination. Eye ccommodation. Phakoscope. Retinal shadows.

Laryngoscope, opthalmoscope. retinoscope, perimeter, cold leat, pressure and pain spots.

CHEMICAL PHYSIOLOGY.

- (a) Chemical compositions of and tests for proteins, carbolydrates and fats and principal food-stuffs. Emulsification of
 ats.
- (b) Digestion:—Actions of saliva and gastric juice, and tests or hydrochloric and lactic acids.

Actions of pancreatic juice, bile, and succus enterious. Tests or glycogen.

Examination of urine—tests for albumen, sugar, bile, blood and deposits; quantitative estimation of albumen, sugar, urea, aric acid and chlorides of urine.

HISTOLOGY.

Microscopical preparations (hardening, embedding, sectioncutting, staining and mounting) of tissues; examination of hystological slides of different tissues.

MATERIA MEDICA.

In the course of systematic lectures, the natural history chemical and physical properties of all the official drugs and the most important non-official medicinal agents with full accounts of their pharmacological action and their Therapeutic uses on the gastro intesterial tract, respiration, circulation, secretion, excretion, sensory, motor and reflex mechanism, heat regulation and absorption will be dealt with and also the method of preparation, doses, composition, sources, with physical, chemical and physiological incompatibilities of the British Pharmacopæcal drugs will be lectured upon.

Definations of all the technical terms commonly employed in Pharmacology and Therapeutics.

Pharmacology of various drugs in the British Pharmaand copeia acting on different systems.

Therapeutics

- (a) Prescribing (b) Latin phrases used in prescriptions.
 (c) Action of drugs:—
- (1) The primary action (2) The secondary action. (3) The direct or local action. (4) The indirect or remote action. (5) The relation between chemical constitution and physiological action. (6) The relation between physical condition and physiological action.

INORGANIC MATERIA MEDICA.

- Group I. Oxygen and Peroxide of Hydrogen.
 - " II. The alkaline metals:—
 Polassium, Sodium, Ammonium and Lithium.
 - " III. The alkaline earths:— Calcium, Barium, Strontium and Magnesium.
 - " IV. Lead, Silver, Zinc, Copper, Bismuth, Aluminium.
 - " V. Mercury.
 - " VI, Iron and Manganese,

" VII. (a) Arsenic.

Organic Arsenic compounds.

- 1. Aliphatic or fatty series, and
- Benzol ring compounds or aromatic (Benzol) Series.
- (b) Antimoy Chromium, Uranium and Phosphorus.
- ,, VIII. Drugs used to kill parasites.
- " IX. Chlorine, Iodine, Bromine and (Idoform Halogens).
 - X. Hypontics.
- " XI. Acids.

••

- " XII. Carbon and its compounds.
- " XIII. Gluside, Paraffin, Benzene, Carbon disulphide.
- ., XIV. Water,

ORGANIC VEGETABLE MATERIA MEDICA.

Group. I. Drugs acting on the nervous system.

- " II. " Cardio-Vascular System.
- , III. , Respiratory Organs.
- " IV. " which are antiperiodic, antipyretic, and antiseptic.
- , V. Purgatives.
- ", VI. Volatile Oils, and Solid Volatile Oils (Stearoptones).
- " VII. Vegetable Bitters.
- " VIII. Vegetable Astringents.
- " IX. Demulcents.
- " X. Anthelmintics and Parasiticides.
- " XI. Diuretics.
- " XII. Drugs acting on the uterus.
- " XIII. Drugs used for gout.
- " XIV. Bodies related to volatile oils.
- " XV. Drugs containing important acids.
- " XVI. Colouring agents.
- " XVII. Drugs whose action is mechanical.
- " XVIII. Drugs whose action is not known.

415

ORGANIC ANIMAL MATERIA MEDICA.

Substances derived from the Animal Kingdom including the following Sera and vaccines.

- I. Antidiphtheritie Serum.
- II. Antitetanic Serum.
- III. Antipneumococcic Serum.
- IV. Antiplague Serum and Vaccine.
 - V. Antistreptococcic Serum and Vaccine.
- VI. Tubercular Serum and Vaccine.
- VII. Cholera Scrum and Vaccine.
- VIII. Typhoid.
 - IX. Hydrophobia Vaccine.
 - X. Antigonococcic Serum.
 - XI. Shigas' Antidysenteric Serum.
 - XII. Pollantin.
- XIII. Coley's fluid of Sarcoma.
- XIV. Wright's Staphylococcic Vaccine.
 - XV. Sclavo's Serum for Anthrax.

ORGANO-THERAPY.

The Thyroid gland.

The milk of Thyroidectomised goats.

The serum of

sheep.

Thymus Extract.

Acid Extract of Duodenal Mucous Membrane.

The Kidney.

The Liver.

The Spleen.

The Sex Glands.

Bone Marrow.

416

PHARMACY AND DISPENSING.

- I. General directions.
- II. Weighing and Measuring.
- III. Decoctions.
- IV. Infusions.
 - V. Emulsions and Mixtures.
- VI. ,, of special drugs.
- VII. Pills.
- VIII. ,, of special drugs.
 - IX. Excipients.
 - X. Powders.
 - XI. Blisters and Plasters.
- XII. Suppositories, Pessaries and Bougies.
- XIII. Tincures.
- XIV. Lozenges.
 - XV. Ointments.

PATHOLOGY.

. General Pathology—

The Cell in health and disease. General retrogressive proesses. Inflammation and Repair. Diseases of Metabolism, e. g., out, Diabetes, Intoxications and Autointoxications. Disturbanis of circulation:—Dropsy, Thrombosis, Embolism and Infartions, Tumours, Infective Granulomata. Animal parasites, ifections and Immunity. Internal secretions. Fever and inective diseases.

Systematic Pathology—

Diseases of:—The circulatory system. 2. The blood and lood-forming organs. 3. The lymphatic system. 4. The spleen. The respiratory system. 6. The digestive system. 7. The uctless glands. 8. The genito-urinary system. 9. The generave system. 10. The nervous system. 11. Cartilage, bone and pints. 12. The voluntary muscles. 13. The tendon sheaths and bursæ. 14. Diseases of the skin.

. Tropical Pathology-

Malaria. Relapsing fever. Kala azar and Leishmaniasis. ropical splenomegaly. Trypanosomiasis. Dengue fever. Malta ever. Yellow fever. Plague. Filariasis. Leprosy. Yaws Beri.

Beri Sprue. Cholera. Dysenteries. Amæbic abseess and Mycetoma. Schistosomiasis. Bilharzia Hæmatobium, Schistosomium japanicum.

Tape-Worms.—Tœnia solium, Tœnia mediocanellata, Tœnia echino-coccus, Bothriocephalus latus.

Thread-Worms.—Ascaris lumbricoides, Oxyuris vermicularis, Trichocephalus dispar, Ankylostoma duodenala, Trichina spiralis, Filaria snaguinis hominis, Dracunculus medinensis. Fluke-Worms.

BACTERIOLOGY.

1. Introduction: General Bacteriological Methods:-

Apparatus. Microscope. Micrometer. Dark-ground illumination. Sterilisation and disinfection Cultivation of bacteria. Anarobic cultivation; various methods.

2. General Characters of Micro-organisms.

Classification and Morphology.

Biology of Bacteria. Multiplication: Sporulation. Motility. Aerobiosis. Anarobiosis. Saprophytes and Parasites. Fermentation. Putrefaction. Bacterial products and Pathogenesis.

3. Study of Specific Infective Bacteria.

Pyogenic hacteria. Staphylococci. Streptococci. Pneumocotcus. Meningococcus. Gonococcus. Allied pyogenic organisms. Bacilli of Colon-Typhoid and Dysentery Group. Agglutination reactions. Cholera and allied vibrio. Anthrax and B. Subtilis. Diphtheria. Preparation of anti-toxin. Diphtheroid organisms. Bacilli of Hamorrhagic-septicamia. B. pestis. Rats and rat fleas. Anti-plague vaccine.

Influenza. Whooping Cough. Malta fever.

Anarobic bacteria. Tetanus. Antitetanic serum. Allied organisms.

Acid-fast bacilli, Streptothrices. B. Tuberculosis.

B. lepra and B. Mallei Actinomyces.

Blastomycetes and Hypomycetes Spirillar disease.

Protozoa—Amœba coli, Entamœba histolytica. Trypanosoma. Malarial parasites, Terponema pallidum and Leishman's bodies.

(Filterable viruses. Measles. Scarlatina. Hydro-phobialables and Anti-rabic inoculation. Small-pox and vaccinia.)

Immunity.—

Infective process, Natural immunity, Artifical immunity, 'accines. Theories of immunity. Anti-toxins. Antisera and Vasseremann reaction and its modification. Bactriolysins, Aglutinins, Precipitins and Hæmolysius.

- . Micro-organisms in Air, Dust, Soil, Sewage-water and Food.
- i. Disinfectants.
- . Practical Course.

Technique of collection and examination of morbid materials such as—blood, gastric and intestinal contents, urine, pus, putum and exudates. Examination of Tumours.

Hygiene.

- 1. Water.—Sources—Collections, Distribution and storage, —Chemical composition—Properties and impurities and their ffects on health—Purification without filtration and with filtration—Filter beds and domestic filters—Collection of samples for nalysis—Chemical, Microscopical and bacteriological examination. Physical.
- 2. Air.—Composition and physical properties of air—Imurities, their sources, and effects on the general health—Examiation—Kata thermometer.
- 3. Ventilation.—Amount of air required—Theory and ractice of Ventilation—Purification of air—Examination of rentilation—Heating and cooling of dwellings.
- 4. Occupational Disease and Offensive Trades.—Lead, Aercury, Phosphorous, Arsenie etc.—Offensive trades and their ffects on health—Nature and regulation of such trades—laughter-houses.
- 5. Soils.—Soil water-Origin and varieties of soil—Features affuencing climate and health—Diseases arising from soil.
- 6. Sites and Buildings:—Selection of sites for building odging house—huts. Principles and rules regulating the sanitary oustruction—cowsheds and stables.
- 7. Food.—Classification—Nature—and uses of food-stuffs—Quantity required—Relative Value—Cooking—Diseases connected with food—Vitamines—Preservation of food-deficiency liseases.

- 8. Vegetable Food-stuffs.—Cereals—pulses—roots and tubers green vegetales—fruits and nuts—sugar—honey and C.
- 9. Animal food.—Inspection of animals—Characteristic features of good and had meat—Diseases produced by unwholesome meat.
- 10. Milk.—Comparison—Preservation—Diseases produced by—Preventive measures.—Adulteration—Improvement of Milk Supply—Gliec.
- 11. Reverages and Condiments.—Non-fermented and fermented drinks—Condiments.
- 12. Diet in India.—Standard vegetarian diet—Food and physical development—Physiological effects—Daily diet.
 - 13. Refuse.—Collection, Removal and Disposal.
- 14. Sewage.—Collection, Removal and Disposal—Advantages and disadvantages of different systems—Analysis.
- 15. Disposal of the dead.—Cremation—Burning—Earth burial—Different methods adopted.
- 16. Personal Hygiene.—Habit—Cleanliness—Clothing—Eating—Drinking—Smoking—Sleeping—Principles as regards exercise and rest—Calculation of work done—exercise.
- 17. Climate and Meteorology—Varieties, causes and effects of climate—Acclamatization—Temperature—Atmospheric pressure—movements of wind, etc.—Thermometer—Barometer—Hygrometer—Rainfall.
- 18. Infection and Carriers of Infection.—Infection—Incubation—Bacteria—Modes of Infection—Insects—Mosquitoes—Sand Fly, etc.
- 19. Animal Parasites.—Cestoda—Nematoda—Hookworm—Filaria, etc. Guinea-worm.
- 20. Restraint of Infection.—Notification—Isolation—Quarantine—Disinfection—Immunity—Vaccination—and methods.
- 21. Preventable Infectious Diseases.—Malaria—Kala Azar
 —Enteric Fever—Plague—Cholera—Diphtheria—Tuberculousis
 —Small-pox, etc.
- 22. Medical Inspection of Schools.—Scope and Nature of medical inspection.—Duties of Medical Inspectors—Methods of inspection,

- 23. Maternity and child welfare. Protection of Mother-hood.—Ante and Post natal period—Child welfare centre—Health Visitors—Midwifery service.
- 24. Vital Statistics.—Importance—Estimation of population—Birth and Death rates—Registration of vital events—Infant mortality, their causes and prevention—Death certificates—Occupation and mortality—Special death rate—Marriages.
- 25. Sanitation of fairs and Religious festivals.—Accommodations—Medical and Sanitary arrangements—Water-supply—Conservancy—Food supply.
- 26. Village Sanitation—Education—Water-sumply—Conservancy—Water-borne diseases.
- 27. Practical Demonstrations.—Hygiene Models and charts—Water Analysis—Examination of milk and its adulterants—Microscopic examination of different starches, cotton, wool, silk fibres—Slaughter-houses—Filter Beds—Observatory—Vaccination—Isolation Hospital.

FORENSIC MEDICINE.

Part I.

- 1. Introduction.
- 2. Identification of the living including anthropometry, fingers prints, personal markings and estimation of age.
- 3. Identification and Examination of the Dead with estimation of age and determination of sex.
 - 4. Autopsy for medio-legal purposes and exhaumation.
- 5. Medico-legal relations of death—modes of dying—syncope, asphyxia and coma, sudden death; classification of the causes of death for legal purposes.
- 6. Signs of Death—Molecular and Somatic death, inconclusive and certain signs of death.
 - 7. Different forms of decomposition in the dead.
- 8. Conditions resembling death—Syncope, trance, partial asphyxia, premature burial and cremation.
- 9. Death by drowning.—Suffocation, Hanging, and Strangulation.

- 10. Death by burning-Sunstroke and Electricity.
- 11. Death from cold and from starvation.
- 12. Wounds and Mechanical Injuries including examination of blood and other stains.
- 13. Wounds of special regions of the body with their causes and effects.
- 14. Sexual offences including abnormalities of the generative organs, impolence and sterility. Rape and unnatural offences.
- 15. Preynuncy and legitimacy including conception, signs of pregnancy, duration of gestation and superfectation.
 - 16. Criminal Abortion.
- 17. Birth and Infanticide including live and dead birth, infanticide and post-mortem examination of a newly born infant.
- 18. Different forms of Insanity and other abnormal states of the mind, examination of lunatics, medical certificates for lunacy and methods of placing lunatics under restraint, Hypnotism, Somnambulism and feigned insanity.
- 19. Medical Examination for attendance at court, damages, reigned diseases, etc.
- 20. Legal and moral obligations of the medical man including registration of birth, certificate of death, dying declaration, notification of diseases, malapraxis, professional secrecy, etc.
- 21. Evidence of the medical man and procedure in the courts.

Part II.

(Toxicology)

- 1. General facts regarding poisons with diagnosis of poisoning. Principles of treatment, separation of poisons and their classification.
 - 2. Corrosive Poisons.
 - 3. In ritant Poisons (Metals and non-metals).
 - 4. Guscous Poisons.
 - 5. Poisonous Carbon Compounds.
 - 6. Poisons of Vegetable origin.
 - 7. Poisons of unimal origin and Mechanical poisons.

MEDICINE.

Introduction.—Definition of Disease—Infection, etc.

Pyrexia. Infectious diseases: Specific Fevers.

Diseases of the organs of Respiration, Nasophranyx—Larynx
—Trache—Bronchi—Lungs and Pleura.

Diseases of the circulatory System. Abnormalities of Heart beat—Diseases of the Endocardium—Myocardium and Pericardium—Diseases of the Blood vessels.

Diseases of Alimentary System—Mouth—Tonsils—Pharynx and Salivary Glands—Oesophagus, Stomach and Intestines, Liver—Pancreas and Peritoneum.

Diseases of the Blood—Spleen and Lymphatic System.

Discases of the Endocrine Glands—Thyroid and Parathyroids, Thymus—Suprarenals—Pituitary—Pincal and Pancreas.

Diseases of the Urinary System—The Urine, Kidneys—their inflammations, degenerations, and Tumours.

Diseases of the Nervous System—Carnio—Spinal Nerves—Spinal Cord—Medulla Oblongata—Brain—Sympathetic System—Psychopathies.

Diseases of the Muscles.

Discuses of Bones and Joints.

Chronic Intoxications-Alcohol-Lead-Arsenie-Mercury.

Disorders of Nutrition and metabolism—Gout-Rickets—Scurvy—Beriberi, etc.

Skin Diseases.

SURGERY.

Part I.

Wounds—General Consideration—Classification of wounds—The treatment of wounds—General considerations regarding aseptic technic—Technic of cleansing the surfaces of the body. Sterilization of mucous membranes—Sterilization of dressing wipes, gowns, etc.—The Sterilization of suture and ligature material—Water and cleansing solutions—The Operating room—The Aseptic Operation—General and local Anesthesia, Plastic Surgery.

Part II.

Infections of wounds and surgical Infectious diseases.—General considerations regarding wound infections—The local disturbances in wound infection—Hypersusceptibility and Anaphylaxis—Fever—Pyogenie Micro-organisms—Examination of blood and wound secretions, etc., in connection with surgical infections—Entrance ports of Pyogenic infections—Pyogenic infections and their treatment—Pyogenic infections of the various tissues—General Pyogenic infections with Metastases (Metastatic infection)—The Putrefactive infections—Poisoned wounds—Rabics—Lyssa, Hydrophobia—Tetanus—Diphtheria—Anthrax—Glanders—Malleus—Actinomycosis—Madura Foot—Blastomycosis Sporothrichosis—Tuberculosis—Leprosy—Syphilis—Seleroma—Botryomycosis.

Part III.

Necrosis.—Necrosis—General Considerations—Necrosis due to trauma—Necrosis due to pressure, constriction, strangulation and torsion—Necrosis from thermal and chemical causes—Necrosis from embolism and thrombosis—Necrosis due to chronic diseases of blood vessels—Necrosis of neuropathic origin.

Part IV.

Injuries of the soft parts, of bones and joints and their treatment.

Injuries—Mechanical injuries of the different tissues. Dislocations—Injuries to the Osseous system—Special fractures—Dislocation of the Vertebræ—Operations on bones and joints—Amputations—Gunshot wounds—Chemical injuries, Thermal injuries—General effects of injury—Delirium Tremens—Fat Embolism—Traumatic Diabetes.

Part V.

Surgical diseases other than infections and tumors. Surgical diseases of the skin—Diseases of muscles and tendons—Diseases of tendon sheaths and burse—Diseases of the blood and lymph vessels—The ligature of Arteries in their continuity—Diseases of peripheral nerves—Diseases of joints—Diseases of bones.

Part VI.

Tumors.— Definition and classification—Etiology of tumors—Form, growth and clinical significance of tumors—The diagnosis of tumors in general—The treatment of tumors in general—The special tumors—Lipomata—Chondromata—Angiomata—

Sarcomata.—Tumors composed of muscle—Rhabdomyomata—Tumors composed of nerve elements—Chomata—Tumors developing from epithelium—Carcinomata—Malignant—Chorionic Epithelioma—Endothelial tumors—Mixed tumors—Teratoid tumors—Teratomata.

Part VII.

Cysts. (excluding cystic tumors).—Cystic other than cystic tumors.

Part VIII.

Surgery of Deformities.—Congenital deformities—Malformations, developmental deformities and softening of the bones—Congenital luxations and cantractures—Torticollis—Kyphotic anomalies of posture—Deformations of the upper extremity—Deformities of the lower extremities.

Part IX.

Regional Surgery of the spine.—General surgical conditions—Spina Bifida—Spondylitis—Injuries of the Spinal Cord-Spinal tumors—Surgery of the spinal roots—Laminectomy—Chordotomy.

Part X.

Surgery of the head.—The scalp—Surgery of the brain, its membranes and vessels—Contusions and wounds of the brain—Traumatic meningitis—Hernia of the brain—Abscess of the brain—Thrombosis of the intracranial sinuses—Epilepsy and its surgical treatment—Mental diseases following cranial injuries and the surgical treatment of mental diseases. The surgical treatment of brain tumors—The surgery of the Hypophysis Cerebri—the technic of trephining—Brain puncture, Resection of the skull, Craniectomy, Cranioplasty and Duraplasty—Craniocerabral Topography—Surgery of the ear.

Part XI.

Surgery of the face.—Congenital Malformations—Injuries of the face—Plastic surgery of the face, Neuralgias of the head—Surgery of the salivary glands—Diseases of the teeth and of the gums—Tumors of the jaws—Surgery of the Nose and its Accessory sinuses—Surgery of the mouth—Surgery of the Pharynx.

Part XII.

Surgery of the neck.—Malformations of the neck—Injuries of the neck—Discases of the neck—Tumors of the neck—Surgery of the larynx and trachea—Wounds of the larynx and trachea—Foreign bodies in the air passages.—Inflammatory diseases, stenoses, and neuroses of the larynx and Trachea—Tumors of the larnyx, trachea, and primary bronchi—Operations on the air passages—Surgery of the Thyroid gland.

Part XIII.

Surgery of the Thymus gland.—Diseases of the Thymus Gland.

Part XIV.

Surgery of the Esophagus.—Examination of the Esophagus.

Part XV.

Sugery of the Thorax—Injuries and diseases of the thoracic wall—Pneumothorax—Penetrating wounds of the thorax—Surgery of the lung—Operations on the thorax—The Diaphragm.
—Surgery of the Pericardium and heart—surgery of the breast.

Part XVI.

Surgery of the Abdomen.—Surgery of the abdominal wall—Surgery of the Pericardium and heart—surgery of the breast. intestines—Injuries of the stomach and gut, foregin bodies—Gastric and Intestinal Fistulæ-Methods of examining the stomach and gut—Pyloric stenosis, Hourglass stomach, Congenital anomalies of the stomach—Ulcer of the stomach and Duodenum—Tumors of the stomach—Surgery of the intestines—Ileus—Appendicitis—Perityphilities Gernia—Surgery of the liver—Surgery of the spleen—Surgery of the Pancreas.

Part XVII.

Surgery of the Rectum and the Anus.—Anatomical considerations—Malformations of the Anus. Foreign bodies in the rectum Fissura—ani-Spasm of the Anus—Periproctitis, Fistula in ano.—Narrowing of the Rectum. Strictures of the anus-Hæmorrhoids—Prolapse of the rectum—Tumors of the anus and rectum.

Part XVIII.

Surgery of the female organs of generation.—Cogenital and acquired malformations.

Part XIX.

Surgery of the Genito-Urinary System.

Surgery of the kidneys, ureters and suprarenal glands. Surjery of the bladder—surgery of the Prostate (Glandula Prostation)—Surgery of the penis and urethra—Surgery of the testicle and spermatic cord.

MIDWIFERY.

The Pelvis—Importance of study—Functions—Inclination—No. of bones—Difference between male and female—False and rue—Planes—Axes—Measurements—Articulation—Pelvis in nfancy—Development.

- 2. Development of genital Organs—Structure of ovarystructure of Grafin follicle—Corpus Luteum—Menstruction— Dvulation—Fertilisation.
- 3. Early development of the ovum—Changes in the Uterus -Formation of decidua.
- 4. Further changes in the ovum—The Liq Amini—its funcions—the allantois.
- 5. Formation of the Chorion and the Placenta—Full grown placenta and its functions—Demonstration—Umbilical cord.
- 6. Development of the Fœtus—Circulation of the fœtus—Fœtal head—Diameters. Show early specimens of fœtus.
- 7. Attitude-lic—presentation position—causes of head presentation—change in maternal organism.
- 8. Size of uterus at periods of pregnancy—changes in the Cervix--changes in the breast—changes in the nervous system.
- 9. Diagnosis of pregnancy—Symptoms—signs—differential liagnosis—duration of pregnancy—calculation of dates.
- 10. Hygiene of Pregnancy—Antenatal care—management of Pregnancy.
- 11. Labour—causes which determine it—Contractions—Retraction—polarity of uterus—causes of pain—premonitory symptoms—stages of labour.
- 12. Mechanism of labour-magnitude of force—vertex presentation—positions—movements—lateral obliquity—Synclytism moulding.
- 13. Diagnosis of positions—Abdominal palpation—vaginal examination—third stage of labour—duration of labour.

- 14. Management of normal labour—maternal and fætal mortality—Anæthetic—Twilight sleep.
- 15. Face presentation—frequency—causes-varieties—diagnosis—brow presentation—causes—treatment of face and brow.
- 16. Pelvic presentation—causes—positions—mechanism. diagnosis—prognosis—management.
- 17. Multiple pregnancy—Binovular and Uniovular twins— Triplets—acardiac monsters—double monsters—diagnosis—management.
- 18. The pureperal state—involution of uterus—lochia—afterpains—colostrum—diagnosis of puerperal state—Diagnosis of Parity.
- 19. The new born infant—changes in circulation after birth—management of puerperal state.
- 20. Ectopic gestation—varietics-causation—Tubal Fœtation—Tubal abortion—Tubal rupture—intra-ligamentous fœtation—Secondary abdominal—pregnancy in rudimentary horn.
- 21. Ectopic gestation—formation of decidua in uterus-expulsion of Cast—symptoms—diagnosis—prognosis—treatment.
- 22. Disorders of pregnancy—classifaction—toxemas—Hypremeisis gravidarum—permeious vomiting—acute yellow atrophy of liver.
- 23 Nephritic toxæmia—pre-Eclamptic toxæmia—diagnosis—symptoms—treatment.
- 24. Eclampsia—frequently—mortality—urine-clinical history.
- 25. Pathological changes—causation—prognosis—treatment—presumably toxemia.
- 26. Displacements—congenital malformation of uterus and vagina—antiversion and flexion—retroversion and flexion—Incarceration with retention of urine—prolapse of uterus and vagina.
- 27. Diseases of decidua and ovum—endometritis—hydror-rohæa. gravidarum—anomalies of placenta—carneous mole—blighted ovum—symptoms, diagnosis—treatment.
- 28. Diseases of decidua and ovum—vesicular mole—symptoms—diagnosis—treatment—hydropasmnii—anomalies of funis and loctus—retention of dead feetus.
- 29. Accidental complication of pregnancy—heart and lung diseases—pyleonephritis—jaundice— hæmorrhages—tumours—Malaria.

- 30. Premature expulsion of the ovum—classification—aborn—mechanism—causes—symptoms—incomplete abortion agnosis—prophylaxis—treatment.
- 31. Antipartem hæmorrhage—varieties—placenta previa-reties—causes—symptoms—diagnosis—treatment.
- 32. Accidental hamorrhage—causes concealed—variety—mptoms—diagnosis—prognosis—treatment.
- 33. Precipitate labour—prolonged labour—causes—primary erme mertia—secondary uterine—tonic contraction of the erus—treatment.
- 34. Dystocia from anomalies of soft parts—trismus uterii—ganic rigidity—diagnosis—treatment—satresia cervix-organic gidity—diagnosis—treatment—atresia cervix—cancers cervix splacement of tumours—complicating labour—distended blader—Hæmatoma.
- 35. Transverse presentation—varieties—causes—diagnosis—tural terminations—neglected cases—treatment.
- 36. Complex presentation—dorsal displacement of armeked twins—fætal monstrosities—conjoined twins—varieties iencaphalic—hydrocaphalic fætus.
- 37. Contracted pelvis—forces of growth and development—elvis at birth—common forms of pelvic contraction—diagnosis—pelvimetry—P. V. examination—results of contracted pelvis.
- 38. Centracted pelvis—classification—small round pelvis—echanism—flat pelvis—mechanism—Rare forms of flat pelvis.
- 39. Effects of pelvis contraction on labour—treatment of intracted pelvis.
- 40. Rare forms of pelvis deformity—Triradiate pelvis—Oscomalacia pseudo malacosteon—oblique pelvis—varieties—dianosis—treatment.
- 41. Transversely contracted pelvis—Roberts—Kyphotic—fechanism of labour—High and low assimilation pelvis—Sponyloisthetic pelvis—Exostosis—treatment.
- 42. Induction of premature labour and abortion—indications ethods—care of child—Incubator—artificial abortion—precauon—methods—choice of time.
- 43. Extraction of fœtus in pelvic presentations—Impacted reech—causes of impaction—indications for interference—deliery of trunk—liberation of arms—Traction on head—Prague 12thod—jaw traction—injuries to fœtus.

- 44. Instrumental labour—instruments—demonstration—forceps—varieties—application—indications—Anæsthesia.
- 45. Version—cephalic— podalic—bipolar —indications—Craniotomy—indications—method—instruments —Cranioclasm—version after craniotomy—perforation of after coming head—IEmbryotomy.
- 46. Cæsarian section—varieties—indications—choice of time preparation—Technique—Vaginal cæsarian section—Symphysiotomy—indications—dangers—preparations—external—subaneous—Hingston's method—Pubiotomy.
- 47. Accidents during labour—rupture of uterus—causes—Traumatic rupture—symptoms—diagnosis—prophylaxis—treatment—incomplete rupture—symptoms—perforation of uterus.
- 48. Laceration of cervix—Laceration of vagina and perenium prevention—suture laceration vulva—rupture symphysis publis—prolapse of funis—diagnosis—prognosis—treatment—inversion of uterus—causes—symptoms—treatment.
- 49. Retention of placenta—causes—adhesion of placenta—diagnosis—prevention—treatment.
- 50. Post partem hamorrhage—source—causes—symptoms—prophylaxis—treatment—secondary post partem hamorrhage.
- 51. Puerperal fever—Bacteria—Exciting and predisposing causes —varieties—Toxemia —Septicemia—Pyemia—lesions—prevention—symptoms—treatment.
- 52. Embolism and Thombosis—Sudden death after delivery—Chorion Epithilioma.
 - 53. Puerperal Insanity.
- 54. Injuries and diseases of the fœtus—Asphyxia Neonatorum—Opthalmia Neonatorum—disorders of lactation—Deficient secretion—Galectorrhea—Sore nipple—Abscess breast.

GYNAECOLOGY.

- 1. Anatomy of the female generative organs.
- 2. Menstruation-case taking—examination—Major and Minor Gynæcology—Hystoria—Neuresthenia.
- 3. Cardinal symptoms—Hæmorrhage—pain—discharge-painful menstruation—Dyspareumia—Sterility.
- 4. Dysmenorrhoa—Vicarious menstruation—Amenorrhoa—primary—secondary—partial—complete.
- 5. Displacements—normal position mobility—structure of pelvic floor—Backward displacement.

- 6. Prolapse —types—cystocele —Rectocele —degrees—uses—symptoms—diagnosis—treatment.
- 7. Inversion—acute—chronic— Endometritis—varieties—rvical endometrits.
- 8. Subinvolution—laceration cervix—Exfoliative and senile dometritis—chronic mastitis.
- 9. Fibro-Myomata—clinical features—diagnosis—second-y changes.
- 10. Fibro-Myomata—axial rotation—malignant changes—splacement of viscera—pregnancy complicating—treatment—lenomata.
- 11. Malignant tumours of the uterus—cancer cervix—sites spread—types diagnosis—treatment.
- 12. Cancer of body of uterus—Sarcoma—Chorionic Epitheoma—clinical feature—diagnosis.
- 13. Diseases of ovaries—Neuralgia—hernia—displacement—ematoma—tumours—classification—cysts—cyst—adenomata—ructure.
- 14. Papilliferus cysts—ovarian cancer--primary—secondary -fibrons tumours—Sarcoma—Endothelioma.
 - 15. Teratomata—Cysts—Solids genesis.
- 16. Dermoids—contents—clinical features—Parovarian cys—Cysts of Gærtners duct.
- 17. Axial rotation—infection—rupture—adhesions—clinical eatures of ovarian cysts—diagnosis—treatment.
- 18. Congenital abnormalities of Fallopian tubes—tumors—elvic inflammation—terms—causes—changes in the tube—pread of inflammation.
- 19. Parametritis Perimetritis symptoms diagnosis—hronic cases—results of inflammation—examination—Differenal diagnosis—treatment.
- 20. Gonorrhæa—mode of infection—spread—symptoms—iagnosis—Tuberele of Fallopain tubes, of cervix—Actinomyosis.
 - 21. Diseases of the vagina and vulva.
- 22. Tumours—cysts—disease Bartholian gland—Carbuncle rethra.
- 23. Malformation of uterus—Hermophroditism—vesicoaginal fistula.
- 24. Operations —major—minor —preparation —position—schnique.

DISEASES OF INFANCY.

- 1. Care of the new born infant—Training—Care of premature and delicate infants.
- 2. Growth and development—Dentition—Peculiarities of Symptomatology and diagnosis.
- 3. Examination of childern—Lavage—Gavage—Irrigation of howel—Dosage.
- 4. Diseases of the newly born—Asphyxia—Jaundice—Atalectasis.
- 5. Acute infective diseases—Omphalitis—Opthalmia neonatorm—Tetanus—Winckel's Disease—Buhl's Disease.
- 6. Skin Diseases—Hamorrhages—Birth paralysis—Tumours of the Umbilieus.
- 7. Infant feeding—Breast feeding—Diel of nursing mother—bottle feeding—Composition of human milk—Composition of cow's milk—Pasteurising milk.
 - 8. Preservation of milk-Proprietary Foods-Goat's milk.
- 9. Artificial food—Modification of milk—Care of feeding bottle—Character of normal stools.
- 10. Nutritional disturbances—daily weights—chart—Disturbances of balance—Failure to gain—Food tolerance—Diagnosis—Treatment.
- 11. State of dyspepsia—Symptoms—Treatment—Decomposition—Chronic Malnutrition—Treatment—Intoxication cholera infantum.
- 12. Coeliac disease Constipation Diarrhea—Simple—Febrile Heo colitis—Diagnosis—Treatment.
- 13. Deficiency Diseases—Vitamins—Infantile scurvy—Symptoms—Treatment—Morbid anatomy.
- 14. Rickets—Pathogenesis—Dietetic theory—Environmentul Infective theory—Calcium metabolism.
- 15. Rickets Symptoms State rickets—Prognosis Prophylaxis—Treatment.
- 16. Convulsions—Causes— Symptoms—Treatment—Malaria in infants.
- 17. Spasmodic croup—True croup—Laryngismus stridulus. Diseases of the respiratory system.
- 18. Totany—Encephalitis lethargica—acute anterior poliomyclitis.
 - 19. Hypertrophic-stenosis of the Pylorus in infants.
 - 20. Hydrocephalus-Meningitis.

OPHTHALMOLOGY.

History of Ophthalmology.

Eye-ball: its surrounding structures and accessories.

Eye-ball: its tunics and contents, structures of Cornea, siera, Choroid Ciliary body, Iris and Retina.

Refracting medica of the eye-ball—Aqueous Humour—Lens id Vitreous.

Eye-lid, lachrymal apparatus 2, 3, 4 and 6th cranial nerves.

Dioptrical consideration in healthy eye "Refraction in a convex lens—Refractive Index.

Image formation: optical defects of normal eye.

Quality of visual sensation, colour vision, colour fusion, binodar size.

Perception and judgment of solidity, judgment of distance ad size.

Visual acuity: distant vision, near vision. Snellen's test pe letters and gaeger's. Field of vision, Perimetry. Patholocal alteration in field of vision.

Opthalmoscope. Direct and indirect method of examinaon.

Retinoscope-Method of examination.

Diseases of eyelid: Blephritis Hordeolum Chalazion, Trinases, Entropion.

Ectropion Ptosis, injuries and tumours, etc.

Diseases of Lachrymal apparatus: Epiphora, acute and tronic, Dachryocystitis and adenitis, Excision of lachrymal sac.

Diseases of structures surrounding the eye-ball: orbital priostitis, Cellulitis Tenoninitis. Exopthalmos. Enotythalmos ulsating Exopthalmos.

Anucleation of eye-ball, eviceration, artificial eyes. Diseases of conjunctiva, Catarrhal, Purulent. Membranous, Granula, Phlyctenular. Conjunctivitis Symblephron Ptyregium.

Diseases of Cornea, Common and uncommon forms of Keratis, Ulcers, Keratoconus Opacities, etc.

Diseases of Iris, Sclera, Ciliary body, Choroid:-

Iritis, Prolapse, Iiedectomy. Staphyloma, Simple, Purulent, and Plastic Cyclitis choroiditis, Glaucoma, Primary, Secondry, Congenital, Trephining operation.

Diseases of lens. Varieties of entaract of treatment and operations, Aphakia.

Diseases of Retina inflammation, Vascular. Pigmentary Retinitis, Tumours, Glioma.

Diseases of Optic nerve, Intra-ocular and retrobulber optic neuritis.

Functional diseases of Retina, Amblyopia and Hæmianopsia. General optical principles, Prisms, refraction by prisms, numbering of Prisms, Lenses, spherical, cylindrical, concave and convex. Numeration and Neutralization of lenses.

Trial cases of lenses. Spectacles, eyeglasses.

Measurements for glasses and frames and prescription writing for glasses.

Errors of refraction, Ametropia. Hypermetropia etiology subjective and objective symptoms—treatment.

Myopia, symptoms, treatment.

Astigmatism, simple, compound, irregular and regular tests and treatment.

Anamolics of accommodation, presbyopia, cycloplegia.

Errors in extrinsic ocular muscles. Diplopia, Paralysis, Divergent squint, Convergent squint.

Maddox Rod, Orthrophoria, Hetrophoria.

Operations on extrinsic muscles, Advanced Tentomy.

Mydriatics and cycloplegia.

Anasthesia of eye, local and general.

Therapeutics of eye.

Instrumentology of eye.

Symptomotology of eye.

Bacteriology and vaccine Therapy of eye.

Practical Pathology, Preparation and staining of section of eye and methods of preserving the eye specimens.

Preparing and nursing of eye cases. Dressing and other necessary materials for eye cases. Case taking.

FACULTY OF ENGINEERING.

B. E. Examination.

Pure Mathematics.

(1st Year).

Algebra.—Binomial theorem and its applications, Determiants, Partial Fractions. Exponential and Logarithmic series, ummation of series: tests on convergence and divergence of cries. Interest and annuities, Probabilities. Approximate soluon of equations by Herner's method.

Trigonometry.—Solution of triangles. Practical use of Lotrithus. Natural Logarithus. De Moivres Theorem Adaptaon of formulæ to Logarithmic computation. Circular and Lyperbolic functions and their expansions.

Mensuration.—Plane and Solid.

Analytical Geometry.—Properties of and problems on the straight line, the Circle, the Ellipse, the Parabola and the Hyerbola by Cartesian and Polar co-ordinates.

Solid Geometry.-Elementary Euclidean Methods.

CALCULUS.

Differential Calculus.—Fundamental notions with geometrial and mechanical applications Theorems of Taylor and Macaurin. Partial differentiation. Euler's Theorem. Maxima and Minima of functions of a single variable.

Integral Calculus.—Integration of standard forms. Calcuation of curve lengths and areas. Integral as the limit of a sum s an area. Volumes and surfaces of solids of revolution.

2. Applied Mathematics.

Statics.—Concurrent and parallel forces, moments, couples, illibrium of forces in a plane, Virtual work, Simple machines, Pulley, the Wheel and Axle, the Differential Pulley, the Co the Balance, the steel yard. Stable and unstable equilib-Equilibrium of strings and chains. The parabolic chain. Discenary. Forces in three dimensions—Composition and tis, Ulcm and simple problems.

Hydroslatics.—Transmission of fluid pressure. Thrust on a plane area. Centres of pressure. Resultant thrust on any surface. Equilibrium of floating bodies. Stability. Metacentre. Hydrometers. The general phenomena of capillarity, elevation and depression. The principles underlying the action of the Suction Pump, the Force Pump, the Syphon, the Hydraulic Press.

Kinematics.—Displacement in one plane. Translation and rotation. Relative motion. Instantaneous centre of rotation. Composition and resolution of displacement.. Velocities and accelerations. Rotation of a rigid body.

Kinetics.—Equations of motion, momentum, work, power, and energy. Simple harmonic motion in a straight line or a curve. Pendulums, simple and compound. Impact. Moment of inertia. Radius of gyration.

3. Surveying.

Surveying.—Use and adjustment of surveying instruments. Theory of levelling; simple and compound, check and reciprocal levellings. Various causes of errors. Customary causes of errors in levelling. Elimination of such errors. Customary limits Methods of keeping various styles of field book. Use of boning rods. Chain survey. Chain and compass survey. Theodolite traversing by Gale's traverse system for city and town improvements surveys. Traverse tables. Theory and use of simple plane tables, tangent clinometers. Theory and use of stadia. Three point problems of plane tabling. values of position by observing three known points. Computation by rectangular co-ordinates with convergency correction. Contouring. Longitudinal and cross sections run with a level. The general principles of alignment of tunnels; railways, canals and roads. Simpson's rule for cuttings and hankings. Discussions on the latest patterns of instruments.

4. Elasticity and Strength of Materials.

(1st Year) .

Moduli of Elasticity; clastic limit, yield point and ultimate strength, resilience and fatigue. Strain beyond elastic limit. Poisson's ratio. Relations between the elastic constants; elementary principles of elasticity applied to the problems of bending, shearing and torsion. Strength of beams and girders, Factors of safety. Deflection,

5. Building Constructions.

(1st Year).

a) Materials.

Stone.—Characteristics and preparation. Varieties of Inlian and European stones and their suitability to Eugineering rorks, Methods of quarrying. Use of compressed air and steam ock drills. Explosives used for blasting. Absorption of water. Densities and crushing strength.

Bricks and Tiles.—Different classes of bricks and their disinguishing qualities. Suitable clays.

Methods of manufacture of bricks and tiles. Objectionable agredients in clays. Soundness and hardness. Uniformity of quality and size. Absorption of water. Weight and crushing strength. Terra Cotta. Stoneware pipes.

Cements, Limes and Mortars.—Sources of supply. Process f manufacture. Varieties of limes and cements. Tests for imes and cements; precautions necessary in their usc.

Clay Puddle.-Methods of making and placing in situ.

Metals.—Iron and steel; varieties and suitability for use; opper, zine, lead, tin, and other common metals and their alloys.

Timber.—Felling and seasoning. Classification and proerties of Indian and European woods. Preservation of timber gainst rot and attack by insects. Varieties of timber used in onstruction for different purposes and under varying condiions; characteristics of sound timber; density, tensile and rushing strength of different varieties of timber.

b) Construction.

Foundation.—Natural and various kinds of artificial founations, such as piles, wells, and tubular foundations; reinforced onerete rafts, etc. Coffer dams; Caissons; cast iron Cylinders; urbs.

Stones Masonry.—Rubble masonry, block in course; ashlar f various sorts; proper bedding of stones; proportion of bond tones; safe loads, keyed, Joggle, and lock joints; dowels; plugs; eys; cramps; methods of lifting; scaffolding.

Brick Masonry.—Types and their uses; object of bond, and arious methods by which it is attained; closers; bedding; moisure; scaffolding; plastering; pointing; coping; cornice; blocking

course; parapet; carbel; lintal; reveal; sill; footing drip course; pise walling; grouting; racking back; hollow masonry; reinforced brick work; fixing of timber to walls.

Plastering.—Materials; plastering mixtures; stucco; plane and rough cast; fibrous plaster, ornamental plaster.

Arch work.—Centring and timbering-segmental, elliptic, 3 & 5 centred, pointed, ogeo and horse-shoe, skew, hogback and stilted arches; domes and vaults; buttresses; abutments; striking centres.

Carpentary and Joinery.—The cutting up of logs for various purposes; shrinkage of timber; joining of timbers to resist various stresses; guilding principles for forming joints; wedges, keys, pins and spikes, etc.

Flat, Couple, Collar, Verandah, king and queen posts roofs.

Reinforced Concrete.—Fundamental principles governing the use of two materials in combination. Selection, compounding and testing materials employed. Regulations for reinforced concrete buildings.

EARTH-WORK AND FIELD ENGINEERING.

Earth-work.—Definitions. Contract. Stability and properties of soils. Measurements and setting-out Instruments used. Dressing and turling. Rates, lift and lead.

Field Engineering.—(i) Use of Spars.—Various knots and lashings and the suitability of each to certain circumstances. Coiling and handling of ropes. Blocks and tackle. Reeving of blocks. Use of handspikes and rollers. Holdfasts. Guys. Use and construction of derricks, shears, gins and trestles in placing girders or columns in position in building or for other similar work.

(ii) Ground Tracing.—General principles. Working plans for foundations on level ground and on slopes. Trenches with vertical and with sloping sides. Laying out buildings on the ground and similar practical instructions.

7. Physics.

Revision of the 1. Sc. course in physics with an advanced treatment of certain parts with reference to practical application.

Heat.—Calorimetry with radiation corrections. Critical temperature. Hygrometry. Determination of J. Adiabatics and Isothermals. Pyrometry.

Light.—Photometry. The direct reflection and refraction of small pencils at plane and spherical surfaces. Passage through a lens. The Telescope and the Microscope. The Achromatic lens. Polarisation.

Acoustics.—General laws relating to production of velocity of sound, pitch, intensity, and quality of a note, interference, echo, resonance, reverberation, and absorption.

Electricity and Magnetism.—Electric charge. Potential and capacity of condensers. Discharge current. Quadrant Electrometer. Dry cells, secondary batteries and behaviour in charging and discharging. Electromagnetic induction. Self—induction. Induction coil. Elementary description of D. C. and A. C. dynamos and motors. Electric measuring instruments including Wattmeters. Magnetic properties of iron and steel Hysterosis. Definition of magnetic flux. The magnetic field; direction and intensity. Methods of making magnets.

8. CHEMISTRY.

The general principles of qualitative analysis and elementary quantitative analysis. The properties and uses of certain metals and their important compounds.

The properties and composition of the common alloys, e.g., gun metal, phosphor, bronze, brass, etc. Chemical composition and analysis of fuels. Refractory materials.

Quicklime, Hydraulic lime, cements, their chemical composition and preparation.

Paints and Varnishes; preparation and use of the common pigments, etc.

Preparation of glass, solube glass, porcelian, pottery and bricks.

The general requirements of lubricants.

Natural waters, their chemical composition, analysis, bacteriological examination and suitability for various purposes.

Preservation of structural materials.

9. Drawing.

Plane Geometry:—Use and care of drawing instruments. Proportional division of a line. Construction of plane and diagonal scales and scale of chords. Construction of and problems relating to a triangles, quadrilaterals, circles, polygons; construction of the ellipse, tangents and normals. Parabola, hyperbola, cycloids, envolute of a circle, spiral, loci.

Solid Geometry and Projections:—Principles of Projection. Projection of points and lines. Traces, inclination and true length of a line. Traces and inclinations of planes. Sections of solids. Interpenetration of solids. Simple cases of intersection and development of plane and curved surfaces, and also of cast shadows.

Machine Drawing.—Drawings of simple machine parts such as holts, nuts, cotters, screws, studs, etc. Forms and proportions of pipes and cylinder flanges, couplings, pulley and speed cones, cranks and link work, connecting rods, eccentrices, pistons, stuffing boxes and valves.

Free-hand and Model Drawing:—Elementary instructions in careful observation and accurate sketching in pencil from sketches and drawings and also from simple models and architectural details. Elementary principles of free-hand perspective drawing, free-hand perspective views of geometrical models in simple positions.

Perspective and Isometric Drawing:—The general theory of conical projection and its application to perspective. Plan and shadows, Isometric projections and sketches.

Building Drawing:—Plan, cross-sections and elevation of buildings drawn to scale.

Making out large scale drawings of buildings parts involving elementary principles of architectural art.

10. Workshop.

Carpentry.—Construction of hand tools and the object and methods of using them. Exercises in bench work and at the lathe.

Filling.—Exercises in chipping, filing, scraping, screwing, and tapping. Use of scribing block, surface gauge and squares in making out work.

Smithing.—The forge and its tools. Management of fire. Drawing taper, square and parallel work. Bending, up-setting, twisting, punching and cutting. Welding and scraping. Forging, hardening, and tempering. Soldering and brazing.

Foundry.—Moulder's tools, appliances and materials. The cupola. The brass furnace. Core-making. Bench moulding, blackening, coring finishing moulds. Vents, gates and risers. Special methods required for brass moulding. Floor moulding. Open sand work.

Machining.—Exercises in drilling and boring. Turning with hand and slide lathes. Planing. Slotting. Milling.

MATERIAL TESTING LABORATORIES.

(1st Year).

Mctals.—Tests of specimens of iron, steel, east iron, wrought

iron, and various alloys in tension and compression.

Bricks, Limes, Mortars, Cements, and Timber.—Simple tests for specific gravity, absorption, strength under tension, compression, and shear for various proportions, and variation in time of setting.

11. PHYSICAL LABORATORIES.

Testing of spirit levels. Young's modulus of wires. Moments of inertia, Kater's rigid pendulum, pyrometric measurements. Thermal conductivity. Mechanical equivalent of Heat. Photometry, Intensity of Illumination, Ice pail test, Wheatstone's bridge, Potentiometer, Kelvin's balance, Heating effects of currents. Electrolytic current measurements. Electro-magnetic induction.

12. CHEMICAL LABORATORIES.

Gravimetric analysis of iron, copper, zinc, calcium, magnesium, silicon, carbon dioxide. Qualitative and quantitative analysis of lime, cement and clays.

Technical analysis.—Physical and Chemical tests of oils, coal and water with a view to their suitability for use for Engineering purposes.

13. FUELS AND METALLURGY.

(1st Year).

Fuels.—Classification of fuels; Solid, liquid, gaseous. Calorific values of fuels. Chemical analysis of fuels. Manufacture of charcoal. Manufacture of Coal-gas, its storage and purification. Storage of fuels. Selection of fuels for industrial purposes.

Metallurgy.—Outlines of the main metallurgical processes of the following metals, their chief uses and test:—copper, silver, aluminium, lead, tiu, antimony, iron, chromium, and manganese.

Simple Metallurgical Process.—Solid solutions, hardening, annealing, tempering, alloys, brasses, bronzes, and welding of metals.

Pig iron.—Its manufacture from ores, composition and uses. Details of blast furnace and management.

Cast vron.—Composition of several kinds of east iron and their strength in compression, tension, etc. Impurities in east iron and their effect on sound easting and strength.

Mild steel.—Manufacture by Bessemer and Open Hearth processes. Influence of cast iron and other metals on the properties of the metal. Simple tests for finding the quality of steel. Tempering and annealing process.

Wrought iron. -Its manufacture: properties and uses.

Other Metals.—Strength and properties of copper, lead, brass, and their alloys. Preservation of metals.

14. METALLURGICAL LABORATORIES.

Tests on extraction and purification of metals. Preparation and analysis of alloys. Technical examination of fuels. Determination of various constituents of steel such as carbon, silicon, manganese, etc.

15. DESCRIPTIVE MECHANICAL ENGINEERING.

Properties of materials. Description of steam boilers, steam oil and gas engines, and steam turbines. Hydraulic machinery. Machines and machine tools.

16. DESCRIPTIVE CIVIL ENGINEERING.

Description of bridges, dams, canals, roads, water-works, building foundations, railways, harbours and docks, etc.

17 DESCRIPTIVE ELECTRIC ENGINEERING.

What we understand by an electric current. The use to which we may put the Electric current. Heating effects. Electric light. Magnetic effect. Measurement of Electricity and magnetism. Electro Magnetic Induction. Generator and motor. Elements of Electrostatics. High Tension effects.

18. THEORY OF MACHINES.

(2nd Year).

The laws of friction as affected by speed, pressure and temperature. Theory of the screw and nut. Pin and pivot friction. Friction brake and clutches. Belt and rope drives. Friction of greased surface.

Definition of a machine, machine elements and pairs, links, chains and mechanisms. Constrained motion. Translation and rotation. Instantaneous centres and centrodes. Virtual motion in mechanisms, Velocity and acceleration diagrams. Worm gearing and universial joint, Rack and Pinion Eccentrics. Valve diagram and Valve gears. Screw propulsion and its application. Primary balancing of steam engines.

19. STEAM ENGINES.

Thermal units, Calorimetry and Calorimetric value of fuel. Behaviour of gases under isothermal and adiabatic expansion and compression.

Steam Engines.—Carnot's cycles. Perfect Heat Engine and Entrophy. Hot Air Engines. Properties of Saturated and superheated steam. Steam jacketing. Elementary theory of steam engine. Efficiency of steam engine on various cycles. Elementary theory of steam turbines. Air compressors and motors.

Internal Combustion Engines.—Gas, oil, and petrol engines. Principles of working: strength of mixture, speed, point of ignition. Effect of compression. Refrigerating plant. Elementary principles. Working substances.

20. Hydraulics.

(2nd Year).

Laws of equilibrium of fluids. Bernoulli's theorem. Flow of water through orifices and mouthpieces. Flow over notches of various section. Open and submerged wires. Narrow and broad crested weirs. Bridge openings. Flow of water through pipes. Coefficients, mean velocity and discharge. Losses due to convergency and divergency of pipes. Venturimeter, valves, syphons, nozzles, bends, and thrust blocks, Canal locks. Flow of water through open channel. Variation of velocity in the cross section of a channel. Mean and limiting velocities. Coefficients, mean velocity and discharge. Waves. Back water. Laws of fluid friction. Gauging the flow of water in open channels and rivers.

21. ELASTICITY AND STRENGTH OF MATERIALS.

(2nd Year).

Stresses in beams and girders. Deflection. Torsional, strength and deflection of shafts and springs. Theory of shear tress. Repeated loading. Elementary theory of built-in-beams.

Secondary effects of bending. The strength of cast iron, steels bronzes, and brasses, and their mechanical and physical properties.

22. THEORY OF STRUCTURE.

(2nd Year).

Bending moments, shearing forces for fixed and moving loads, Stresses in framed structures, like cranes, roofs and bridges, trusses, etc. Suspension bridges. Maxima and minima stresses in a point due to eccentric loading. Stability of block work structures, Earth-work and Retaining walls, High masonry dams, Foundations, steel and masonry chimneys. Graphical problems arising out of the foregoing to be worked out by students on the drawing board.

23. PURE MATHEMATICS.

(2nd Year).

Analytical geometry of two and three dimensions.—Properties of the general equation of the second degree in two variables: direction cosines of a straight line and problems thereon. Cylinder, Sphere and standard forms of second degree, surfaces.

Differential Calculus.—Tangents, normals, asymptotes, curvature. Tracing of curves from their cartesian and polar equations. Envelopes, Involutes, Evolutes.

Integral Calculus.—Double and treble integrals as applied to mass centres and moments of interia, Plainimeters. Approximate evaluation of definite integrals (Simpson's rules).

Differential equations.—Formation of differential equations, ordinary and partial. Solutions of the standard forms of equations of the first order. Linear equations with constant or homogeneous coefficients. Linear Simultaneous equations in two dependent variables only. Standard forms of elementary partial differential equations.

24. Applied Mechanics.

(2nd Year).

Statics, Hydrostatics, Dynamics.—Advanced treatment of the subjects taught in the first year with the help of Calculus, paying special attention to solution of Engineering problems.

25. Euonomics. (2nd Year).

The data of political economy and methods by which they are studied. Relation of economic science to practice. The meaning of economic law. Demand and supply. Law of diminishing utility. Factors in production and their combination. Labour and natural agents. Increasing and decreasing returns. Capital, its influence and conditions of its accumulation. Value in relation to riches. Price, utility, and cost of production. Determinants of ratios of exchange. Element of cost. Complex problems of value. The theory of international and internal trade and its relation to home trade. The law of rent. Interest and profits. Theory of the value of money. The value of foreign bills.

26. Engineering Laboratories.

(2nd Year).

Material testing Luboratory.

Metal.—Bending, torsion, shear and deflection. Ultimate strength, yield point, and elastic limit. Effect of time and repetition of load., Ball hardness test, coefficients of expansion, critical speeds of shafts, etc.

Reinforced concrete.—Tests of reinforced concrete beams and slabs and columns in tension, compression, and bending.

MACHINE TESTING LABORATORY.

(For Mechanical Engineering Students only).

The testing of lathes and other machine tools for determining their efficiency by the help of electrical instruments; transmission and absorption dynamometers.

27. ELECTRO-TECHNICS. (2nd Year).

Electric units. Measurements of electrical quantities. Current, E. M. F., Resistance, Electromagnetic, chemical and heating effects of current. Elements of alternating currents, Transformers. A. C. and D. C. machines. Elementary theory of Dynamos and motors; functions of their principal parts. Power transmission and distribution; Electric lighting, Switch Board. Internal wiring for power and light. Testing for insulation. Resistance and localization of faults. Wiring rules. Electric heating apparatus. Capital and maintenance costs. Cost of wiring per unit, systems of charging for electrical energy.

28. Electro-Technics Laboratories.

(2nd Year).

The operation of alternating current and direct current machinery. Tests on the running characteristics. Efficiency tests. Applications of Electrical driving to industrial purposes. Transmission and conversion of Electrical Energy.

29. GEOLOGY AND MINERALOGY.

(2nd Year).

Discussion of the geological agents at work on and beneath the surface of the carth; water; forest; snow; ice; the atmosphere; chemical, mechanical and organic actions, Phenomena of carthquakes, volcanoes, elevation and depression of land. Geological functions of plants and animals.

The classification of the stratified crust of the earth; the primary, secondary, and tertiary rocks, fossils and minerals Essential constituents of common rocks, such as limestone gneiss, micaceous and chloritic schists; granite: syenite trachtye, pumice; sandstone; slate, laterites, etc.

Description of bedding and joints; inclination of rock; dip outcrop and strike, curvature: monocline, syncline; anticline. Nature and origin of faults, veins and dykes. Igneous rocks. Metamorphism. Ore deposits, unconformability.

Indian Geology.--Mountain ranges, plains and rivers. Distribution of alluvium, trap, and crystalline rocks. Drift of Indian coasts. River drift of the Narbada and Tapti. Alluvial plans of the Indus and the Ganges. Formation of the Laterite and Regur, and their relation to vegetation. Rocks of the Siwalik Hills, and the pliocene mammalia. Nummulitic limestone and associated Tertiary strata in India. Distinctive fossils; (1) marine, and (2) terrestrial of the Tertiary period. Marine cretaceous rocks; their mineral character and fossils Volcanic rocks of the Deccan, and their interbedded deposits. The Jurassic rocks of Cutch. The lower Gondwana rocks in India. The Talchir series. The coalfields of the Gondwana rocks and their fossil plants. The marine Trias of the North of India. Relations of secondary to primary strata in India. Carboniferous rocks of the Salt Range. Vindhiyan and older stratified deposits. The Charnockite series of crystalline rocks. The gneiss and schists of South and Central India. General structure of the Himalayas.

Mineralogy.—Crystal form and symmetry; division into systems; their principal characteristics; classification based upon (a) chemical composition, (b) physical properties, e.g., specific gravity, hardness, cleavage, fracture; phenomena relating to light; simple description and identification of rock forming minerals, ores, veinstones, salts and gems.

30. DESCRIPTIVE CIVIL ENGINEERING.

(2nd Year).

This course is intended for lectures on estimating, descriptive engineering, reinforced concrete works, tunnels, harbours, locks, docks, bridges, cableways, foundations, roads, railways, highways, pile driving, reclamation and dredging, etc.

31. GEOLOGICAL LABORATORIES.

(2nd Year).

The object of the Laboratory work is to acquaint the students to identify the more common ores, salts and rock forming materials by the application of simple physical and chemical tests.

32. IRRIGATION.

(2nd Year).

- (1) Well Irrigation.—Sub-soil water reservoirs. Lined and unlined wells. Artesian wells. Duty of wells. Area irrigable from a well. Duty of water. Base of duty.
- (2) Tank Irrigation.—Catchment area. Rainfall, Yield. Maximum run-off. Reservoirs for storage of water. Earthen dams. Masonry dams. Theory of their stability and design. Absorption and evaporation. Losses in the reservoir, Open weirs. Floodgates. Sluices. Surface shutter. Undersluices. Syphon, spillways. Silt accumulations and life of reservoirs. Flood absorption capacity of reservoir.

33. MATER WORKS.

Sources of supply.—Springs, wells, rivers, lakes; choosing the supply.

Impounding storage and service reservoirs. Intakes, settling tanks, filters, rates of filteration. Various types of Mechanical filteration. Water towers.

Rising mains, expansion joints, losses in head, valves, service tanks, house connections, meters, cisterns. General types of pumping installations used in India.

34. CIVIL ENGINEERING DESIGN. (Lecture).

(2nd Year).

This course is intended to supplement the lectures on Theory of Structures, Irrigation, Reinforced Concrete, General Engineering works. The course will include the design of masonry buildings and bridges; steel buildings; plate and lattice girder bridges; steel arches; suspension, cantilever and tubular bridges; swing-bridges; reinforced concreted structures; retaining walls; masonry dams; aqueducts; roof trusses; steel and masonry chimneys; various kinds of foundations, etc.

35. CIVIL ENGINEERING DRAWING AND DESIGN.

(2nd Year).

The student will be expected to submit complete designs and plates of a masonry building and a steel structure.

36. MECHANICAL ENGINEERING DESIGN AND DRAWING.

(2nd Year).

(For Mechanical Engineers only).

Advanced examples. Inking in. Shade lining Flat washing in colour. Strip shading and soft shading. Tracing, Preparation of blue prints. Sketching. Preparation of working drawings from actual measurements of details and complete machines required in mechanical and electrical engineering. Proportional measurements and their meaning. Calculations of the proportions of machine details from given rules. Design of some simple machine.

37, LECTURE ON MACHINE DESIGN.

(2nd Year).

(For Mechanical Engineers only).

Principles of the strength of materials applied to the designs of the parts of machine. Fastenings used in machine construction, bolts, screws, keys, cotters, rivets, and rivetted joints. Journals and bearings. Shafts, couplings and axels. Toothed gearing. Transmission of power by gearing, belting, ropes and chains. Design of pipes, cylinders, cranks, eccentrics, pistons, and piston rods, crossheads and slides, stuffing boxes, flywheels and connecting rods.

38. Higher Theory of Elasticity. (3rd Year).

Continuation of second year work on strength and deflection of iron including theorem of three moments, etc. Combined stress and strain. Stresses in Pipes and thick cylinders. Stresses in long columns. Eccentric loading. Euler's theory concerning struts, modification due to Rankine, Gordon and others. Stresses in rotating discs and shafts. Vibration in shafts. Critical speeds, Transverse and longitudinal vibration of structure. Deflection of framed structures by the theory of work.

39. Hydraulics.

(3rd Year).

Theory and design of centrifugal and reciprocating pumps. Valves and air vessels. Efficiency of pumps. Methods of lifting water by animal power. Chief types of simple and series pumps. Pulsometers. Hydraulic. Bams.

Water wheels, Theory and design of Pelton wheel, of impulse and reaction turbines. Specific speed, best heads and quantities of water for the use of Pelton wheel. Governing of turbines. Draught Tubes.

Surge tanks. Their theory and application.

Calculation of afflux and back water curve. Standing waves. Application and use of Gould's function. Water hammer,

Hydraulic Transmission of power.—Accumulators. Valves, Hydraulic mains. Lifts, etc.

Theory of Dimensional Homogeneity.—Theory of dynamic similarlity and use of the coefficient of viscosity. Calculations for model experiment on Pelton wheels. Hydraulic turbines, Centrifugal pumps. Ship resistances. Standing waves and propellers.

40. Geodesy.

Surveying.—Theory of curves. Curves laid out with the aid of angular instruments. Curves laid by linear measurements only, by chords and offsets, and by offsets inside the curve. Compound curves. Division curves. Vertical curves. Curve spiral or Transition curve. Double centre method for laying out a straight line, setting out pegs for earth work. Curves with given data to pass through ruling point. Introduction to spherical Trigonometry up to the solution of spherical triangles and the adaptation of Napier's rules of circular parts.

Hydro-Electric Surveys.—Topographical maps, how to study and read them, areas suitable for water power schemes, preliminary reconnaissance, catchment areas, rainfall and runoff. Barlow's percentages, approximate discharge of streams and rivers, capacity of water impounded, hydrographical methods of survey, pipe line alignment, tunnel alignment, forebay, transmission line survey. Instruments used in reconnaissance, preliminary survey and final contour survey.

Astronomy.—Definition. System of celestial co-ordinates; The reasons for sidereal sun and the mean time; accelerations, retardation and equation of time; Julian and Gregorion Calendars; time and the various astronomical corrections.

The practical course consists in finding the meridian of a place by observations of the sun or a star at upper culmination by equal altitudes, by the sun or stars not on the meridian, and by circumpolar stars at elongation; and in finding time by the sun or stars on the meridian and ex-meridian: and in finding latitude, by polaris, and circum-meridianal observations. Use and construction of Sun-dials.

41. HIGHER THEORY OF STRUCTURES.

Secondary stresses in structure. Theory of arches. Masonry arches. Hinged arches. Three point hinged arches. Resilience tests for failure of long struts. Suspension-bridges. Swing-bridges. Approximate method of finding stresses from indeterminate equations. Design of revetted joints and stresses in boiler shells. The theory of least work and its application to the metal arch. Stresses in high masonry dams. Theory of earth pressure and of foundations.

42. IRRIGATION.

(3rd Year).

Canal Irrigation.—General description of Indian rivers. River discharges. (luaging silt and remedies against its excessive deposition. Kennedy's Theory and its applications. Garrat's tables and diagrams.

Perennial and Inundation canal system. Duty of canal water and Base of Duty. Losses in a canal. Waterlogging and lining of canals to prevent loss.

Inundation canals.—When permissible. General description of such system, Location of take-off to avoid silting.

Perennial canals.—Sources and quantity of supply. Location and design of headworks in boulders. Trough and delta stages of a river. Flood sluices. Head Regulators. Supply channels. Afflux Bunds. Temporary Diversion Bunds. Permanent Weirs. Automatic gates and shutters. Stony sluice gates.

Design and alignment of canals.—Peculiarities of alignments of eanal in plain and hilly countries. Determination of watersheds. Falls. Bridges. Regulators. Escapes. Outlets. Roads. Distributaries and Minors. Their design and running.

Cross drainage works. Maximum rate of run-off from catchments. Inlets. Super-passages. Level crossings. Aqueducts. Syphons. Reservoirs.

River Training Works.—Spurs. Groynes, Bell Bunds. Stream line Bunds. Mattresses. Aprons.

43. REINFORCED CONCRETE.

(3rd Year).

Nature, uses, properties, advantages and disadvantages of Reinforced Concrete over other types of constructions. Assumption made in theory of stress in R. C. beams.

Theory and Design of simple beams, T-beams and slabs for different conditions of loading.

Shear, bond, and diagonal tension, its nature, evaluation, and location of reinforcement.

Design of doubly reinforced beams, and continuous beams. Theory and Design of R. C. columns and piles.

Design of Slab foundations

Design of simple cantilever and counterpart retaining wall. Equivalent moments of inertia for R. C. sections.

Theory of Elastic deflections and outline of investigation of stresses in Reinforced Concrete Arches.

44. CIVIL ENGINEERING DESIGN LECTURE.

(3rd Year).

Continuation of 2nd year work. (See page 353).

45. Engineering Design.

The students will have to submit at least complete designs and plates of one steel structure and one major irrigation work.

56. ACCOUNTS.

General principles of Book-keeping. Cash book and initial accounts of P. W. D. Control of works and operations of manufacture by means of accounts, cost sheets etc. Workshop ac The relation of spending officers towards their superiors to sanction outlay and towards the auditing officers.

> 47. SANITARY ENGINEERING.

(3rd Year).

Sewerage, Sewage Disposal and Trade Waste,-General considerations in connection with the preliminary work of designing a scheme. Data necessary before scheme can be formulated. Methods of estimating the amount of sewage proper. Present and future population affected by scheme and circumstances modifying the same. Variation in rate of flow and causes of The problem of inclusion or exclusion of existing sewer The various systems of removal of sewage and their relative advantages. The disposal of rain water. Past and present methods of estimating rates of run-off. Intensity curves and Kuichling's law. Absorption power of the usual classes of surface. Rational method of calculating rainfall capacities of Effects of shape and slope of area on run-off. Effect sewers. of storm water overflows. General discussion of discharge formulæ for sewers. Discharge problems involving an increasing rate Self-cleansing velocities. The use of comparative discharge diagrams. Methods of guaging flow in existing sewers. Storm overflows. Inverted syphons. Sewers under rivers, canals, and other obstacles. Design of large sewer under external pressure. Tunnellings through rock and water-logged ground. The design of junctions of large sewers, sea and river outfalls. Automatic and other types of pumping. Tidal gates. Ventila-Timbering of trenches and tunnels. Sewage disposal, general consideration. Variations of the problem due to geographical position of town. General notes on sampling Bacteria and their relation to sewage disposal. The malignant bacteria and their identification. Transmission of bacteria. Methods of disposal by dilution, or by treatment and subsequent discharge into running water. General composition of sewage from an engineering point of view. Detritus tanks. Screens. Sedimentation. Septic and hydrolytic tanks. Colloidal treatment. Chemical precipitation. Coagulation. Contact beds. Activated sludge treatment. Percolating beds, Sludge and its disposal. Humus tanks. Automatic dosing apparatus. Various methods of collecting and disposing of solid, domestic and trades refuse. The transportation and handling of refuse. Design and operation of refuse destructors.

48. HEAT ENGINE LABORATORIES.

(3rd Year).

(For Civil Engineers).

Steam Engine.—Experiments on high pressure and low pressure boilers, horizontal and vertical steam engines, air compressors and steam turbines. Experiments on gas and oil-engines.

49. Architecture and Town Planning.

General principles of Modern, Classic, and Indo-Sarceni architecture of civic, religious, business premises, theatres, muscums, colleges and universities and other public buildings.

Town Plunning.—General principles of town planning. Suitability of an area. Boundaries. Adoption of design to natural features. Allocation of area for the several classes of buildings, park and open space. Advantages and disadvantages of private open spaces. Improvement of existing conditions of cities. Design and construction of streets, side walks and kerbs, markets, parks, cemetries, and shade trees. Ornamenting and beautifying of towns.

50. Specifications and Estimating.

Estimating.—Rules for taking out quantities in earth work masonry flooring, wood-work, mouldings, arches, groyned roofs, domes, steel work, and plumber's work.

Calculation of probable quantities of materials required to be furnished for the completion of work.

Common rates and their analysis.

Rates for carriage of material by different means of transport.

Specifications, contracts, and contract law.

Detailed estimates of some of the designs carried out by the students in the Civil Engineering Design Course.

Specifications.—Specifications of different kinds of stone and brick masonry, cement work, wood work, etc.

51. Work Management.

(For Civil Engineers).

Evolution of engineering industries, examples of successful organisation. Economics of manufacturing and construction. Methods of remunerating labour, cost analysis. Conveyance of goods by rail, road and water. Economical methods of construct-

ing civil engineering works under varying conditions. Productive and protective works. Systems of contract. Organisation of departmental works: economical lay-out of works and labour camps, sanitation, medical aid, water-supply, lighting. Recruitment and control of labour. General administration of large works with their labour camps.

52. THEORY OF MACHINES.

(3rd Year).

(For Mechanical Engineers only).

Altered mechanisms. Expansion of elements. Reduction of chanisms, balancing of steam engines, I. C. engines and locomotrains, cam trains, etc. Epicyclic and other forms of gearings. Differential gearing. Humpage gear. Various forms of teeth shafts, couplings and axles. Friction of rest and motion. Friction of lubricated surfaces. Friction in mechanisms and efficiency of machines.

Rectilinear and rotational motion. Inertia, forces in mechanisms, balancing of steam engines, I. C. engines and locomotive Gyrostatic action. Dynamics of the steam engine, Cyclics, speed variation, effort and resistance, steadiness: crank effort: governors and flywheels. Correction of indicated diagrams for acceleration. Secondary balancing pressure of the crank pin, Cushioning for acceleration. Stress in locomotive coupling rod; connecting rods. Vibration. Effect of vibration on the speeds of engines. Transmission and absorption dynometers.

53. ELECTRO-TECHNICS.

(For Mechanical Engineers only).

Direct current machines.—Characteristics and performance of generators and motors. Starting, reversing, and regulation of motors. Details of construction. Switch boards. Auxiliary machines, general arrangements of plant and installation.

Alternating current machines.—Production of an alternating E. M. F. maximum and R. M. S. value of wave forms. Effect of resistance, inductance and capacity. Poluphase circuit Power and power factor. Choke coils. Transformers. Alternators and motors induction. Transmission and distribution of electric energy for light and power. Wiring, Installations, and conductors. Cables. Systems of supply and distribution. Location of faults. Batteries. General principles of electric traction, Filament lamps: Are and vapour lamps.

54. ELECTRO-TECHNIC LABORATORIES.

(For 3rd year Mechanical Engineers).

Tests on A. C. and D. .C. instruments and circuits. Tests for characteristics, losses and efficiences of D. C. and A. C. machines, transformers, etc..

55. HIGHER METALIURGY.

(3rd Year).

Physical characters of metals. Changes resulting from heat and mechanical treatment. Pyrometry Metallography. Condition of equilibrium of Binary alloys. Electric smelting and preparation of steel.

56. METALLURGICAL LABORATORIES.

(3rd Year).

Experiments in roasting, fluxing, reduction, liquefaction, scorification, cupellation, amalgamation, etc., illustrating the various methods and processes employed in the extraction and purification of metals. Preparation of alloys. Detection and estimation of the common metals, viz., iron, copper, lead, silver, gold, tin, antimony, zinc, bismuth, manganese, in their ores by both the wet and the dry processes.

57. MACHINE TOOLS.

Construction and application of cutting tools. Shapes and speeds of cutting tools for various materials. Materials used for cutting tools and their heat treatment. Various machine tools and their uses, Lathes, planing machines, drilling machines, slotting machines, automatic and semi-automatic machines and their uses.

58 HIGHER THEORY OF THERMODYNAMICS.

The Advanced Physics of Thermodynamics. The various laws of gases, and cycles of operation. History of the development of various cycles of operations.

The steam engine.—Behaviour of steam in motal cylinder. Cyclical flow of heat in the walls. Experiments of Callender

and Nicolson Law of initial condensation. Law of valve leakage. Application of entropy and heat charts. Total consumption of an engine. Simple, compound and uniflow engines. Condensing and noncondensing engines. Effect on consumption of speed. pressure, ratio of expansion and vacuum. Design and proportion of cylinders. Combustion of coal on a grate. The effects of rate of firing. Furnace temperature. Osborne Reynold's law of heat transference. Chimney temperature. Number of tubes. Draft, General description of the various types of high speed boilers.

Steam turbines.—Flow of steam through orifices and nozzles, the De Laval turbines. The many stage impluse turbine, Rateau type. The few stage velocity turbine. Curtis type. The many stage reaction turbine. Parsons type. Combined types. Consumption and proportions. Effect of high pressure, superheat and vacuum. Strength of spinning discs. Governing.

Internal Combustion Engines.—Explosion type. More advanced parts of the theory of gas and oil engines. The variable specific heat theory. The standard cycle. Recent work on gascous explosions. Various types of gas producers. Theory and practice of Air Compressors and Motors, Single and multistage. Refrigeration. Theory of refrigeration, and its application in practice. The use of Molliers I. chart, Liquefaction of gases, The Humphrey Pump.

Diesel Type.—Theory and construction of the Deisel oil motors, with and without allowance for variation of specific heat with temperature. The various types manufactured. Effect on economy of speed and cylinder proportions. Semi-Diesels. Fuels available for Diesel Motors.

Various types of evaporators and their efficiencies. General arragement and construction of the more important types of generating plants.

59. PRINCIPLES OF APPROVALITIES AND APPOPULES.

The importance of Aeronautics and possibilities of its development in future. Theory of stability of the Aeroplane, and principles of the design of wings. Relation between the wing area, and total load. Principles of the Fusillage design and determination of the speed and size of propellers, to give the most efficient results. General types and fundamental principles of Aero-engines.

60. Organisation of Industries and Work Management.

The evolution of engineering industries. Examples o successful organisation. The economies of manufacturing Methods of remmunerating labour, cost analysis and factory accounts; labour-saving devices, and systems of handling and controlling orders. Conveyance of goods on road, rail, and water. Legislation affecting engineering industries.

61. MACHINE DESIGN AND DRAWING.

(For Mechanical Engineers only).

The complete design of a machine (such as a steam or internal combustion engine, a pump, a turbine, or a machine tool) is worked out, and the requisite working drawings and tracing are prepared.

62. HEAT ENGINE LABORATRIES.

(3rd Year).

(For Mechanical Engineers).

Same as for Civil Engineers (see page 452).

63. Machine Design Lectures.

(3rd Year.)

The application of theory to practice in the design of modern types of steam boilers, steam engines, including the uniflow steam turbines and internal combustion engines, including "solid injection" type.

FACULTY OF EDUCATION.

Diploma-in-Education.

PRINCIPLES OF EDUCATION AND ELEMENTARY

EDUCATIONAL PSYCHOLOGY.

- (a) Ideals and Aims in Education. The Elemental Educational Values. The question of Formal Training. Principles of the Curriculum. Correlation in Teaching. The Logical and Psychological order of Studies. Factors and Methods in the training of Thought. Definition and Language in Education.
- (b) Psychology and its relation with Education. Nervous System and its functions. Heredity and Environment. Instincts: Sensation, Perception, Imagination, Memory, Conception, Reasoning, Emotions. Volution. Habit formation.

 Attention. Interest. Fatigue.
 Play. Imitation and Suggestion.
 Laws of Learning.
 Formation of character.

SCHOOL MANAGEMENT AND HYGIENE.

Types of Schools.
Classification of Pupils.
Head Master and Staff. Distribution of work. Timetables. Home-work. Examinations. Records.
Hostels.
Infectious Diseases.
Order and Discipline.
Extra-curricular activities.
Parental Co-operation.

Hygiene.

Broad Outlines of Anatomy and Physiology.
Medical Inspection.
Defects and Diseases.
Conditions of healthy physical life.
Hygiene conditions of the school.
First aid in minor injuries and ailments.

HISTORY OF EDUCATIONAL IDEAS AND SELECT

CLASSICS IN EDUCATION.

A period will be prescribed from time to time along with a set book or two. There will further be prescribed a book or two under Educational Classics.

EDUCATIONAL CLASSICS.

Rousseau. Emile.

Plato. Republic.

Locke. On Education..
Spencer. Education.

Dewey. Democracy and Education.

METHODS OF TEACHING.

- A. General. Technique in Teaching. Deductive and Inductive Development lessons, Narration, Description, Explanation, Observation, Expression, Exposition and Illustration, Questioning and Discussion.
- B. In teaching the special subjects the following points will be dealt with:—

Aims and Values of the subjetc. Content and its organisation. Various methods of teaching the subject. Schemes and Notes of lessons. Correlation with other subjects..

MODERN EDUCATIONAL SYSTEMS AND PROBLEMS.

A comparative study of the modern educational systems of the leading countries of the world. Indian Education shall form the centre of the study, and along with this the systems of two or three leading countries shall be prescribed from time to time. The following will be the lines of study:—

Introductory—dealing with the historical aspects and general features of the system.

Administrative control of Education.

Elementary Education. Secondary Education Higher Education. Industrial and Technical Education. Professional Education, relating chiefly to the training of teachers. Education of Women.

Conclusion and Outlook.

ADVANCED EDUCATIONAL PSYCHOLOGY.

Psychology of Individual Differences.

Mental Testing.

Psychology of Learning.

Psychology of the fundamental school subjetes.

Statistics in Education.

CHILD EDUCATION.

Nature, Scope and Methods of Child Study.

History of Child Education with special reference to Rousseau, Pestalozzi, Proebel and Montessorie.

Observation and study of children. Study of exceptional children and the methods of dealing with them. Intelligence Tests. The stages of child development.

Play—Theories of play and play methods. Importance of play in the development of the child. Free and organised play.

Fatigue-Mental and Physical.

The Child under 5 and how to deal with him.

The Child above 5 and how to deal with him.
